- Zika hysteria a massive HOAX to justify aerial bombardment of awakening populations with brain damaging chemicals--Prepare to be doused in chemicals by the genocidal Zika warmongers in Washington, and when the wave of birth defects becomes ever more prominent in the cities that have been sprayed, watch for the media to claim they aren't spraying enough. No matter how much the government sprays, for some reason more birth defects keep appearing...
- FDA Approves Releasing Mutant Zika-Killing Mosquitos in Florida...

Ephesians 5:11, 13-16: "And have no fellowship with the unfruitful works of darkness, but rather **reprove** them. But all things that are reproved are made manifest by the light: for whatsoever doth make manifest is light. Wherefore he saith, **Awake thou that sleepest**, and arise from the dead, and Christ shall give thee light. **See then that ye walk circumspectly**, not as fools, but as wise, Redeeming the time, because the days are evil."

The **1828 Noah Webster Dictionary** defines:

Reprove: To blame, to convince of a fault, or to make it manifest, to excite a sense of guilt.

Circumspectly: Cautiously; with watchfulness every way; with attention to guard against surprise or danger.

Matthew 24:24: "...if it were possible, they shall deceive **the very elect.**"

II Corinthians 2:11: "Lest Satan should get an advantage of us: for we **are not ignorant** of his devices."

II Chronicles 7:14: "If **my people**, which are called by my name, shall humble themselves, and pray, and seek my face, and turn from their wicked ways; then will I hear from heaven, and will forgive their sin, and will heal their land."

Zika hysteria a massive HOAX to justify aerial bombardment of awakening populations with brain damaging chemicals

(NaturalNews) In case you didn't already know, everything is rigged these days, meaning it's contrived, fabricated or distorted to fit an official narrative that feeds a nefarious Satanic agenda. The Zika virus hysteria is no different: it was all engineered from the start for a specific purpose, and this report explains exactly what's really behind the Zika pandemic and why it's being pushed so aggressively by globalist governments nearing collapse.

According to the delirious state-run media of the United States, Zika is so incredibly dangerous that Olympic athletes are refusing to compete in Rio out of the horrifying fear that they might catch Zika. Women are cancelling their vacations to Florida. The sheeple are running around like chickens with their heads cut off, frantically slathering themselves with toxic DEET bug sprays in the hope that their own brains won't be turned to mush by Zika.

I've got news for them: **Their brains have already been turned to mush by the mainstream media** that promoted this Zika doomsday hoax from the get go. And besides, if you're going to slather yourself with bug spray, **use my [essential oils-based Bugs Away Spray](#) which is DEET free**. Yet, even when I'm plugging my own natural bug spray, I'm telling you right up front **that Zika is a total hoax**. **Even if you're infected, it's actually no big deal**. **Even the CDC admits most people carrying Zika are completely symptomless and require no hospitalization at all. (They don't even realize they were infected.)**

First, a little background that you won't get from any mainstream news source. The Zika virus has been around for more than 70 years, **and it was originally harvested, isolated and turned into a research product by none other than the Rockefeller Foundation, the same globalist cabal of medical criminals who sought to destroy alternative medicine and grant western chemical medicine a monopoly over society.**

Zika is completely harmless to nearly everyone, and your body self-immunizes against Zika without any vaccine needed (even if they were helpful).

Secondly, the Zika fear factor has been wildly overblown by the media for a specific political purpose that I'll reveal later. In reality, Zika virus is almost completely harmless to nearly everyone.

This is admitted by none other than the CDC which says [on its Zika overview page](#) that:

- "Many people infected with Zika virus won't have symptoms or will only have mild symptoms." (In other words, the symptoms are so mild, most people won't even experience any ill effects at all.)
- "People usually don't get sick enough to go to the hospital, and they very rarely die of Zika." (There's no hospitalization required because the infection is so mild.)
- "Once a person has been infected with Zika, they are likely to be protected from future infections." (Your body will self-immunize against Zika upon the first exposure, meaning that vaccines (even if they were not evil) are not necessary.)

And finally, the Big Lie about Zika is that it is responsible for every case of microcephaly (shrunken skulls and brains) being witnessed today. This Big Lie is repeated by the CDC which claims, without any scientific proof whatsoever, that "Zika infection during pregnancy can cause a birth defect of the brain called microcephaly and other severe fetal brain defects."

This conclusion was reached by the CDC using epidemiological statistics, not rigorous scientific studies of cause and effect. In other words, the CDC observed that women in regions of South America that hosted Zika-carrying mosquitoes were suffering from microcephaly in their newborn children. From this, they concluded a cause-and-effect relationship between Zika virus and the developmental deformities. What they failed to recognize, however, is the presence of the dominant cause: All these same areas were also being sprayed with highly toxic larvicide chemicals that work by interfering with the nervous systems of insects.

Those same chemicals, when ingested by pregnant women, also cause neurodevelopmental deformities in human children. This doesn't mean that Zika can't also cause microcephaly in rare cases, but Zika is likely to be only a minor factor that's far outpaced by the causative factor of larvicide exposure.

When brain-damaging chemicals were dumped into the water supply of Brazil... brain deformities quickly followed.

The larvicide chemical in question is called "pyroproxyfen," and it was dumped into the water supply (for the previous 18 months) by the Brazilian government, which is a government in a state of accelerating collapse. As any informed person will note from human history, when governments are on the verge of collapse, they deliberately create large scale crises that convince the people they need government to rescue them.

Brazil, much like the United States and much of Western Europe, is on the verge of a massive popular revolt against the failures of globalism and Big Government. To keep the sheeple in line, all these globalist governments must resort to creating large-scale problems that demand government "solutions."

The larvicide sprayed in Brazil is called "pyriproxyfen," and it's manufactured by Sumitomo Chemical, a corporation known to be a "strategic partner" of

Monsanto. The Argentinian doctors' report lists Sumitomo as a "subsidiary" of Monsanto. As [GM Watch reports](#), "Pyriproxyfen is a growth inhibitor of mosquito larvae, which alters the development process from larva to pupa to adult, thus generating malformations in developing mosquitoes and killing or disabling them."

Pyriproxyfen is also extremely toxic to all forms of life that have a nervous system. Via [PubChem](#):

10.1.1 GHS Classification

Signal: **Warning**

GHS Hazard Statements

H400: Very toxic to aquatic life [Warning Hazardous to the aquatic environment, acute hazard - Category 1]

H410: Very toxic to aquatic life with long lasting effects [Warning Hazardous to the aquatic environment, long-term hazard - Category 1]

Precautionary Statements

P273: Avoid release to the environment.

P391: Collect spillage.

P501: Dispose of contents/container to ...

from EU REGULATION (EC) No 1272/2008

View GHS Classification from all (2) sources.

GHS Hazard Statements

H400: Very toxic to aquatic life [Warning Hazardous to the aquatic environment, acute hazard - Category 1]

H410: Very toxic to aquatic life with long lasting effects [Warning Hazardous to the aquatic environment, long-term hazard - Category 1]

Precautionary Statements

P273: Avoid release to the environment.

See that? **Even though the warnings say "avoid release to the environment" and "very toxic to aquatic life," the government of Brazil decided it would be a genius idea to dump it into the water supply. This is the level of incompetence and criminality now demonstrated by all governments of the world, where populations are routinely subjected to mass chemical poisoning as part of a deliberate scheme involving a combination of depopulation and population control agendas.**

PubChem goes on to explain more about the risks of pyriproxyfen:

Effects of Long Term Exposure

The substance may have effects on the blood and liver. This may result in anaemia, impaired functions and tissue lesions.

Guess who owns the patent on this insecticide, awarded in 2014?

The more you understand about the way the globalist system of corporate-government fascism really works, the easier it is to grasp the real agenda behind Zika hysteria. Because if you look at who owns the patents on pyriproxyfen formulas, you sooner or later stumble across [this patent awarded in 2014](#) to none other than **BAYER CROPSCIENCE in Germany.**

Bayer, you probably already know, is one of the three chemical companies resulting from the war crimes breaking up of IG Farben, the Nazi-supporting chemical conglomerate that also manufactured Zyklon B to carry out genocide.

Don't forget that Bayer's executive Fritz ter Meer served prison time for crimes against humanity, as described in [this Truthwiki entry](#): "From 1950 to 1980, Bayer, BASF, and Hoechst filled their highest position, Chairman of the Board, with convicted mass murderers. Fritz ter Meer, convicted of mass murder, served just 5 prison years, then "conveniently" became the chairman of Bayer's supervisory board."

In other words, the very same chemical company that took part in the chemical genocide of Jews was just awarded a patent on a chemical cocktail that uses pyriproxyfen, the same chemical that was dumped into the water supply immediately before women suddenly started giving birth to deformed infants. Are you starting to see the real picture yet? What you are witnessing with Zika propaganda is nothing less than the latest chapter of globalists' chemical warfare against humanity. In 1939, it was done with large gas chambers and railroad cars full of imprisoned Jews. In 2016, it's pulled off with mass media, staged pandemic hysteria and a complicit CDC run by quack science criminals.

What's also revealing about all this is that Zika virus has been around for seven decades, and it has infected up to 75% of the populations in some countries during those decades. And guess what? No increase in microcephaly has ever been documented from Zika infections alone.

In other words, the only thing that recently changed in all this was the dumping of insecticide chemicals into the environment. These "extremely toxic" chemicals suddenly set off a wave of neurodevelopmental deformities.

The globalist agenda is now set in motion. Birth deformities can now be blamed on a mosquito and used to justify the release of more chemicals into the environment.

This is where the real agenda becomes obvious: The whole point of Zika hysteria is the old problem-reaction-solution dialectic, where the government creates the problem, then presents its desired "solution" as a reaction to that problem. In this case, the government "solutions" are to unleash chemical Hell upon large cities across southeastern USA by demanding aerial spraying of neurologically damaging chemicals in order to "combat Zika."

The real agenda is the mass chemical poisoning of the people.

This has already been proven in the U.S. Congress, where Zika hysteria was invoked by House Republicans to try to roll back pesticide and herbicide restrictions nationwide. By invoking Zika virus fear, they tried to push a new bill through Congress entitled the "Zika Control Act."

As [reported by Natural News](#):

While the rest of the world awakens to the damaging effects of pesticide pollution, officials in the U.S. are working to allow more pesticides into our water supplies.

The House of Representatives voted Tuesday to loosen already weak pesticide regulations in a purported effort to combat the spread of the Zika virus. The latest version of the bill is called the Zika Control Act.

Other ignorant lawmakers literally want to bring back DDT by claiming we need the chemical to stop Zika. Watch for more aggressive calls for legalizing extremely toxic chemicals to be loaded into airplanes and bombarded onto the populations of large U.S. cities. It's all okay, we're told, because we have to stop mosquitoes...

With Zika mosquitoes, the globalists finally have their leverage to unleash mass chemical spraying of large population areas

The justification for all this sounds exactly like this line from [Breitbart News](#):

The U.S. is on the verge of a Zika pandemic that may soon require extreme measures, including aerial pesticide spraying.

You're going to hear this line over and over again, across the rigged mainstream media. They're going to mercilessly hammer Zika fear into your head, repeating outright lies and disinfo by the hour, until the ignorant population of sheeple demand to be doused in chemicals.

But the real "genius" of all this is that the spraying will unleash yet more birth defects, which the mainstream media will use to ratchet up the apparent "pandemic crisis" and demand even more spraying.

The globalist "solution" to Zika, in other words, will cause a whole new wave of birth defects and brain deformities. And all the heartbreaking imagery of those children will be splattered across the news 24/7 while genocidal lawmakers in Washington vote to end restrictions on the mass spraying of both urban and rural areas with the very same chemicals that cause mass deformities in children.

What we are witnessing here is thalidomide on steroids, **and almost everything you're being told about it is a complete medical hoax.**

The "official sources" must keep up the official narrative, though, because really big lies require repeated propaganda assaults on the human psyche. Remember: The same lying, discredited media that tells you vaccines harm no one, GMOs are awesome and Hillary Clinton cares about children is now telling you that Zika mosquitoes alone are causing microcephaly.

Prepare to be doused in chemicals by the genocidal Zika warmongers in Washington. And when the wave of birth defects becomes ever more prominent in the cities that have been sprayed, watch for the media to claim they aren't spraying enough. No matter how much the government sprays, for some reason more birth defects keep appearing... hmmm...

The exact same strategy has been used on measles and mumps vaccines for decades. By the way, if all this sounds a little too familiar, **it's because the measles and mumps vaccines have been spreading measles and mumps for decades. When outbreaks occur, the media incessantly blames the lack of vaccines for the outbreak (even though almost everyone involved in the outbreak has already been vaccinated). The sheeple masses then rush out to get vaccinated, ensuring the next round of the vaccination-outbreak cycle upon which the entire vaccine industry depends.**

It is the predictable strategy of pandemic marketing:

- 1) Create widespread hysteria with false claims of pandemic origins.**
- 2) Use the hysteria to push vaccines or chemicals.**
- 3) Wait for the vaccines or chemicals to cause yet more outbreaks.**
- 4) (Brain)wash, rinse and repeat.**

And yes, **everybody is in on this: the CDC, the drug companies, the chemical conglomerates, the lawmakers and even government-funded "scientists."** They're all in on it because they all get more grants, more sales, more money and more prestige when they can be seen as "fighting for humanity" in the "courageous effort" to "end a pandemic" that they actually started.

Here's EXACTLY how this is going to unfold... just watch in amazement
Now you know the real story of Zika, and you can now write the script of exactly
what's going to unfold next. Here, I'll lay it out for you:

- 1) Massive aerial spraying will be unleashed on American cities like Miami.
- 2) A huge new wave of birth defects will result from the chemicals. These will be paraded on the evening news with heartbreaking imagery and video of deformed babies.
- 3) The media will claim the government "isn't doing enough!"
- 4) The government will respond by pumping a few billion dollars into Zika vaccines while ramping up aerial spraying of more cities.
- 5) Once the Zika vaccine is ready, it will be mandated across selected cities and regions, and anyone who refuses the vaccine will be shamed and ridiculed.
- 6) The eventual Zika vaccine will be weakened to include a few live Zika viruses, thus ensuring the continued spread of Zika.
- 7) Everything will get ratcheted up: Expanded aerial spraying of more cities, expanded vaccine mandates, and a rapid increase in birth defects.

The whole point is to create a crisis in which the sheeple are led to believe they need government to protect them. What they rarely come to realize is that government created the entire problem to begin with.

This is the cold, hard truth of how our rigged world really operates today. And anyone who demonstrates any ability to think critically about Zika or any pandemic will be labeled a "danger to society" because you refuse to be injected with their experimental vaccines or subjected to their chemical dousing.

Any expression of scientific rationality, reason or skeptical thought will be punished or even *criminalized* as the Zika hysteria balloons. We live, after all, in a scientific dictatorship where real science is censored to make room for all the politically motivated fake science that pushes these anti-human agendas.

Above all, remember: From the point of view of every totalitarian regime, science is a weapon of control to be deployed against the people. Science is never allowed to be free or factual. All science is controlled, contrived and distorted to serve the interests of the state.

[FDA Approves Releasing Mutant Zika-Killing Mosquitos in Florida...](#)

Our sci-fi future just got a whole lot closer to becoming a reality, after the Food and Drug Administration **gave the okay to a field trial that would release genetically modified Zika-killing mosquitoes in the Florida Keys.**

On Friday, the FDA released a final environmental assessment of the trial, [finding](#) that it **“will not have significant impacts on the environment.”** The project, led by Oxitec, a biotech company that focuses on insect control, calls for the release of thousands of genetically engineered male *Aedes aegypti* mosquitoes. The lab insects are bred so that over time they could kill off much of the local mosquito population by [passing on a gene](#) fatal to any offspring they have with wild females.

This is not the last hurdle Oxitec faces. The company will have to win the approval of the Florida Keys Mosquito Control District, which plans to vote on the proposal after issuing a survey testing local sentiment of Keys residents this fall. While [past surveys](#) have shown the project to have a majority of support, it has also had [vocal naysayers](#). Some fear the environmental impacts that removing the *Aedes aegypti* mosquitoes, a non-native species, might have. **Others have more imaginative objections, such as conspiracy theories about the project.**
