Ephesians 5:11, 13-16: "And have no fellowship with the unfruitful works of darkness, but rather **reprove** them. But all things that are reprov'd are made manifest by the light: for whatsoever doth make manifest is light. Wherefore he saith, **Awake thou that sleepest**, and arise from the dead, and Christ shall give thee light. See then that ye walk **circumspectly**, not as fools, but as wise, Redeeming the time, because the days are evil."

The **1828 Noah Webster Dictionary** defines:

Reprove: To blame, to convince of a fault, or to make it manifest, to excite a sense of guilt.

Circumspectly: Cautiously; with watchfulness every way; with attention to guard against surprise or danger.

Matthew 24:24: "...if it were possible, they shall deceive **the very elect.**"

II Corinthians 2:11: "Lest Satan should get an advantage of us: for we **are not ignorant of his devices.**"

II Chronicles 7:14: "If **my people**, which are called by my name, shall humble themselves, and pray, and seek my face, and turn from their wicked ways; then will I hear from heaven, and will forgive their sin, and will heal their land."

Doctor: U.S. Army Rejected Successful Ebola Drug 2 Weeks Before Outbreak

A medical doctor claims that he developed a successful drug to combat Ebola with the U.S. Army at Ft. Detrick Maryland, but that the research was inexplicably shut down two weeks before the first outbreak of the virus in West Africa.

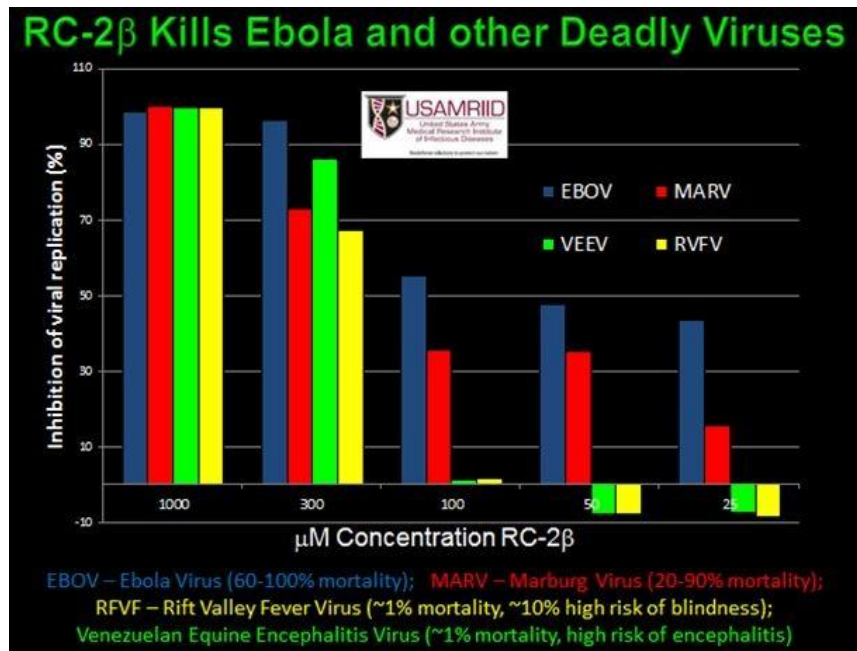

Richard C. Davis, M.D., a former flight surgeon with the U.S. Navy, told Infowars **that he was leading a project to develop a drug called RC-2Beta, which according to Davis works, "at the core of our cells to enhance mitochondrial efficiency and promote gene signaling to stimulate cellular self-repair and pathogen destruction."**

In the fall of 2013, **Davis' company began collaborating with the US Army at their Level 4 bioweapons facility at Ft. Detrick, Maryland to develop the drug, with astounding success.**

According to Davis, the drug **"Killed four of the world's deadliest viruses in a dose-dependent fashion. The Army also noted that uninfected cells in the same cultures were untouched by the drug (i.e., it was non-toxic)."**

"Everyone was very excited about these results since there has never been a broad-spectrum anti-viral drug that killed so many different viruses without affecting normal (uninfected) cells in this way," writes Davis.

However, after the Army initially indicated to Davis and his team that they were ready to move ahead quickly with further testing, communication completely ceased.

<<Army research data shows effectiveness of RC-2Beta in fighting the Ebola virus.

“Our once close communications and cordial relationship with the Ft. Detrick team went totally and inexplicably silent. Our phone calls went unanswered and emails unreturned,” writes Davis, adding he was “stunned” when the first reports of Ebola emerged in Africa just two weeks later.

The doctor also desperately contacted mainstream media outlets in an effort to get the story out, including CNN, ABC, MSNBC, CBS, the New York Times, the Washington Post, the LA Times and others. After making initial contact and agreeing to provide documents, Davis was subsequently stonewalled and every outlet dropped the story!!!!

Davis then turned to Florida Congressman David Jolly in an effort to reopen lines of communication with Ft. Detrick, a process that is ongoing.

While health authorities and the media aggressively promoted ZMapp and other less successful drugs to fight Ebola, Davis set about anxiously contacting the World Health Organization, which in June announced that experimental treatments for Ebola would be fast tracked.

“Out of concern and frustration, I made it my personal priority to obtain the two necessary documents (Humanitarian Use Exemption and Export Certificate) needed to ship our drug to the medical teams working desperately in Africa,” writes Davis. “So I began calling, and writing and faxing everyone who might be able to help. Since May, I have reached out over 200 times to every head of every organization in the world involved with this crisis. This includes the World Health Organization, the Centers for Disease Control, the various teams at the FDA, the National Institutes of Health, DARPA, multiple private relief and aid organizations (like Doctors Without Borders), and dozens just like them. The response was always the same... Silence...”

The doctor also slammed the Obama administration’s response to the Ebola outbreak.

“The response of the American government has been patently absurd,” writes Davis. “Every protocol that has been put in place to prevent the spread of the disease has been ignored. Our borders remain open, infected patients are being brought into our hospitals, and no truly effective countermeasures have been erected to stem the tide of infectious risk.”

Davis' conclusion on the government's handling of the Ebola crisis and the fact that a potentially successful cure for the virus was shut down by Ft. Detrick immediately before the outbreak in West Africa left him to draw a sobering conclusion.

"I am left to conclude that America's leadership is either guilty of gross misconduct, dereliction of duty, criminal negligence or worse – treason," writes Davis, warning that the "crisis will undoubtedly spiral out of control" if the advice of incompetent public health authorities, the government and the media continues to be followed unquestionably.

Davis boasts an impressive Curriculum Vitae, having authored over 400 patents and trademarks while also being awarded commendations from the Chief of Naval Operations.

"The inescapable conclusions of negligence or corruption or both cannot be simply swept aside for the sake of political correctness when the lives of every one of us are at stake," writes Davis, adding, "Ebola is real. It is here, now. There is no more time to waste."

Man Dies Vomiting On Plane To US! CDC Let's Everyone Go Home To Spread Ebola To Their Loved Ones?

A passenger died on a Nigeria-to-JFK flight after a vomiting fit Thursday — and a top lawmaker said officials gave the corpse only a " cursory" exam before declaring that the victim did not have Ebola.

Rep. Peter King said in a letter to Homeland Security and Customs and Border Protection that the handling of the remains exposed serious flaws in airport preparedness for an Ebola outbreak.

Between 70 and 100 passengers a day arrive at JFK from the Ebola epicenter countries of Liberia, Sierra Leone and Guinea, King noted, and they have access to public restrooms and mingle with other travelers before their first screening.

"Given the high volume of travelers at JFK, it is essential that extraordinary measures are taken to intercept possible Ebola-infected passengers," while keeping the public and first responders safe, King (R-LI) wrote to Homeland Security Secretary Jeh Johnson and Customs Commissioner Gil Kerlikowske.

VT Issues First Ebola Warning (Subject to National Security Hack!)

This is what we have reason to believe: There is an organized terror plot on behalf of financial entities to spread Ebola through the United States. We believe airlines and hospitals are part of it, that Homeland Security and the TSA are

involved. Rather than use a weaponized Ebola strain, people are being purposefully infected with Ebola.

It is (in part) related to potential profits related to vaccinations & it involves the upcoming US election, oil price fluctuations and manipulation of the US stock markets.

Billions have been lost during the last 10 days but, more importantly, hundreds of billions will be made in what is now a pure “pump and dump” at the hands of the “grand cartel” .

What is required is broad control over international travel, the media and the ability to move infected personnel into the US, using airlines but also human trafficking methods, this is how Ebola is now being spread.

We estimate that as many as 5000 Americans have now been exposed to Ebola. We are asking security personnel to record tail numbers, though the CIA doesn't always use them, of private aircraft used to transport “disease vectors” into the US and Europe.

We have confirmations that this is being done. We do not have confirmations as to all involved but we do know the US is targeted and that the intent is to kill as many Americans as possible to undermine social cohesion and destroy whatever confidence the American people have in government.

Watchdog: Obama to bring non-American Ebola victims to U.S. for treatment
President Obama is considering a plan to expand treatment of Ebola victims beyond Americans.

While the bipartisan voice grows to ban Ebola victims from entering the United States, **a new report claims that President Obama is considering a plan to bring the world's Ebola patients to the United States to be treated.**

Judicial Watch, the conservative public watchdog group, says in a shocking report that the president is “actively formulating plans” to admit Ebola-infected non-citizens just to be treated.

U.S. Troops Won't Get Hazmat Suits for Ebola Mission in West Africa

Posted By [Jim Hoft](#) | [The Gateway Pundit](#) On October 19, 2014

Nashville Public Radio reported:

Troops from the 101st Airborne Division leading the military response to Ebola in West Africa will only need gloves and masks to protect themselves from the deadly virus, so said Gen. David Rodriguez at a Pentagon briefing Wednesday.

“They don't need the whole suit – as such – because they're not going to be in contact with any of the people,” the commander of U.S. troops in Africa said.

Soldiers' health will be monitored through surveys and taking their temperature on their way in and out of camps. **If a service member does get sick, Rodriguez said they will be flown home immediately for treatment.**

#StopEbolaStrike: National Strike to Force Obama to Block West African Flights
Administration committing criminal neglect by failing to secure America against outbreak

Infowars.com is calling for a general strike across the United States in response to the federal government's botched response to the Ebola outbreak and the Obama administration's refusal to block flights coming in from West Africa.

Countries bordering those in West Africa impacted by the Ebola outbreak have been successful in stopping the

spread of the virus by blocking flights, including Ivory Coast, Guinea-Bissau and Senegal, and yet the Obama administration has refused to do likewise despite innumerable public figures calling on the White House to take action.

Numerous airlines have also restricted flights to Ebola-affected countries and yet the United States remains wide open to potential Ebola patients not only via airports but also via the country's porous southern border, where hundreds of illegal aliens from Ebola-hit countries have poured across in recent months.

Marine Corps Gen. John Kelly, commander of the U.S. Southern Command, has also warned that if the Ebola outbreak continues to rage it could cause "mass migration into the United States" of victims seeking treatment.

By refusing to block flights or tighten border security, the Obama administration is aiding and abetting the spread of Ebola and engaging in dereliction of duty by refusing to adopt the default position under such circumstances.

That's why we're launching a national campaign for all non-essential workers in the United States to strike from Monday through Wednesday next week.

We are calling on everyone to get behind the strike by tweeting under the hashtag [#stopebolastrike](#) and by personally participating in the general strike from Monday to Wednesday. We also invite other media outlets and media personalities to support the strike.

We have also launched a petition at [WhiteHouse.gov](#) which we encourage all Americans to sign [here](#).

If the Obama administration fails to respond to the strike by Wednesday, it will be prolonged until the federal government is forced to take proper action to fight Ebola.

The CDC has proven itself to be dangerously inept and woefully unprepared to deal with a wider Ebola outbreak in the United States after two nurses who should have been properly protected contracted the virus from patient zero – Thomas Eric Duncan.

The CDC also gave express permission for Ebola victim Amber Vinson to travel on a commercial airliner after she had frequent contact with Duncan during his treatment at Texas Health Presbyterian Hospital Dallas, potentially exposing 132 passengers who also flew on the Frontier Airlines plane.

The federal government is committing criminal neglect by failing to implement the very measures that have proven successful in other countries in stopping the spread of the Ebola outbreak.

[Read and sign the petition here.](#)

For more detail on the general strike and why we are calling for it, see Paul Watson's article, [#StopEbolaStrike: National Strike to Force Obama to Block West African Flights](#).

[I have had that training and Ebola is a "Level 4" bio-hazard threat which requires \(by their own protocols\) the use of a full containment suit \(moon suit just like you see the people from the CDC wearing](#)

Talk about another Government cover up! I knew they were lying when they said that the nurses at the Dallas hospital had been properly trained in the handling of bio-hazards. I have had that training and Ebola is a "Level 4" bio-hazard threat which requires (by their own protocols) the use of a full containment suit (moon suit just like you see the people from the CDC wearing). However I saw Sanja Gupta on CNN showing the "proper" method for suiting up and it was a cloth mask with a face shield. If this was how the healthcare people were instructed it is absolutely WRONG and they had to have known it all along because they were the ones who wrote the protocols! Your eyes are one of the most sensitive parts of the body and it is stupid not to have that type of protection with a Level 4 bio-hazard. Looks like to me they are trying to spread this intentionally. Either that or they are SO INCOMPETENT that it boggles the mind. Which ever one it is, it ain't good for us!

[Dallas Hospital Had the Ebola Screening Machine That the Military Is Using in Africa](#)

They have the equipment to do full quick check on this disease and others, but they are not allowing the medical profession to use it, plus they are hiding it from the sheeple. -. SQ:I STATED 3 MONTHS AGO THAT THE MILITARY HAD THE ABILITY TO CHECK WITHIN 30 MINUTES FOR ANY E -BOLA STRAINS--THIS WHOLE PLOT HAS BEEN BREWED OUT OF 'THE CAULDRONS OF HELL'

[1,000 being checked for Ebola virus in U.S.](#)

Whether by land, sea or air, the fear of Ebola has been spreading at a pace far faster than the growth in the number of people diagnosed with the disease. In recent days, the number of people who have been asked to monitor themselves for symptoms has been steadily growing, especially among health care workers who were involved in the original treatment of Thomas E. Duncan, the Liberian who died from Ebola on Oct. 8 in Dallas.

As of Friday, a pool of about 1,000 people are being watched for symptoms, have been asked to monitor themselves or have been urged to check with a counselor at the Centers for Disease Control and Prevention. The group includes a handful of people who have been ordered into quarantine, a larger group that is being closely watched with temperatures taken at least daily and a much larger group of travelers who may have flown on a Frontier Airlines jetliner used at some point by an Ebola patient traveling with a low-grade fever.

<http://www.freep.com/story/news/world/2014/10/17/number-people-checked-ebola-surges-toward/17462333/>

[Ebola: Liberia deaths 'far higher than reported' as officials downplay epidemic](#)

Posted By [Mark Townsend](#) | [London Guardian](#) The true death toll from the Ebola epidemic is being masked by chaotic data collection and people's reluctance to admit

that their loved ones had the virus, according to one of west Africa's most celebrated film-makers.

Sorious Samura, who has just returned from making a documentary on the crisis in Liberia, said it is very clear on the ground that the true number of dead is far higher than the official figures being reported by the World Health Organisation.

Liberia accounts for more than half of all the official Ebola deaths. Samura, a television journalist originally from Sierra Leone, said the Liberian authorities appeared to be deliberately downplaying the true number of cases, for fear of increasing alarm in the west African country.

[Full article here](#)

++ Ebola–RNs Call for Highest Standards for Protective Equipment, including Hazmat Suits and Training

National Nurses United Press Release, 10/12/14

In a recent press release from [National Nurses United](#), we see that 2,000 RNs at more 750 facilities in 46 states and the District of Columbia, were surveyed and the results are chilling. • **76 percent still say their hospital has not communicated to them any policy regarding potential admission of patients infected by Ebola; • 85 percent say their hospital has not provided education on Ebola with the ability for the nurses to interact and ask questions ; • 37 percent say their hospital has insufficient current supplies of eye protection (face shields or side shields with goggles) for daily use on their unit; • 36 percent say there are insufficient supplies of fluid resistant/impermeable gowns in their hospital • 39 percent say their hospital does not have plans to equip isolation rooms with plastic covered mattresses and pillows and discard all linens after use; • only 8 percent said they were aware their hospital does have such a plan in place.**

It has been well proven **that the US had sufficient time, since December 2013, to put protocols in place for Ebola's "inevitable" appearance in America, yet despite multiple warnings from those that are now on the frontlines, doctors and nurses, it hasn't been done and hospitals all across America are still completely unprepared for any type of massive outbreak, which leads us to the obvious question of why?**

We know they expected something because DART teams (Disaster Assistance Response Teams) were notified months ago to prepare to be activated in the month of October and that EMS and hospitals would be "overwhelmed," as reported on [October 4, 2014](#).

NEW YORK:They asked for volunteers to take care of any ebola patients that may come there....NOBODY would volunteer.....and it appears there is much dissent in the nursing ranks as the administration was sort of threatening them

Just returned from Albany, NY area where I went to say goodbye to my girls.....

Their mother, my ex, is a nurse manager at the major teaching hospital in

Albany.....**well thurs around 5:30 the hospital called a mandatory emergency meeting about ebola.....**

They asked for volunteers to take care of any ebola patients that may come there....NOBODY would volunteer.....and it appears there is much dissent in

the nursing ranks as the administration was sort of threatening them they have an obligation to take care of any ebola patients.....seems more than a few, my ex included, will simply quit work if they try to force them to take care of ebola patients.....

I believe this attitude of nurses there to reflect nurses country wide.....when this ebola spreads, we shall see massive numbers of already short, nurses and other health care professionals quitting their jobs...

HERE IS A HEADS UP CONFIRMATION RE: NYC BEING NEXT IN PLAY AND CDC WARNING TO THEM. LOOKS LIKE FEMA IS MAYBE GOING TO GET READY TO SET UP FIELD HOSPITALS OR VACCINE STATIONS?

I was with a group last week when one of the men got a call from the FEMA Contractor for which he had subcontracted, most recently in response to Hurricane Sandy. He stated that FEMA had just formed a number of hospital contracts and he was ordered to report to New York City (I believe) on Monday morning. He and his wife packed their things and left immediately. He is a specialist in hospital operations. This seems to validate the above story and indicate that FEMA knows something is about to go down there.

THE SHORT TERM PLAN? NEW YORK MAY BE FIRST CITY TO SEE THIS PUT IN PLAY

Stephen... Hope this gets to you...Just got off the phone with "The Guy"...

The plan is this: ID cards for First Responders, First.

It will contain personal data and inoculation records.

Next is the issuance of ID cards to regular US Citizens. Vials of vaccines will have barcodes on them... Lot numbers. As you are inoculated, a printed sticker... (with a lot number and the person who administered the dose) will be applied to you ID card.

The ID card will HAVE to be presented at all businesses... Run through the standard Credit/Debit card scanners. No current inoculation... NO SERVICE. Abandoned & underutilized malls and shopping centers will be re-conformed as intake centers/ Med evaluation/ Decontamination & Housing facilities.

Obama Announces CDC SWAT Teams To Round Up Infected People

President Obama, who has notably ignored our open Southern border, welcomed illegal aliens, and refused to institute a travel ban from Ebola-ridden countries, has a hardcore solution for Americans who are potentially suffering from Ebola. He'll just increase the police state another notch.

“What I have directed the CDC to do is that as soon as somebody is diagnosed with Ebola then we want a rapid response team, a SWAT team essentially, from the CDC, to be on the ground as quickly as possible. Hopefully within 24 hours.”

<http://beforeitsnews.com/alternative/2014/10/obama-announces-cdc-swat-teams-to-round-up-infected-people-3047538.html>

Military preps quick-strike team for Ebola response in United States

(CNN) -- The U.S. military is forming a 30-person "quick-strike team" equipped to provide direct treatment to Ebola patients inside the United States, a Defense Department official told CNN's Barbara Starr on Sunday.

Play: <http://www.cnn.com/video/data/2.0/video/us/2014/10/19/nr-starr-pentagon-preps-ebola-strike-team.cnn.html>

White House on Ebola Czar: We Weren't Looking For An Ebola Expert

After a CNN reporter asked White House Press Secretary Josh Earnest what experience "Ebola Czar" Ron Klain has with Ebola, **Earnest said the White House wasn't looking for an expert on Ebola.**

"To more directly address your question, what we were looking for is not an Ebola expert but rather an 'implementation expert,' and that's exactly what Ron Klain is," Earnest told the reporter.

In other words, the federal official heading up the federal response to Ebola knows nothing about the disease.

Earlier today, President Obama appointed Klain, a Democratic Party insider and former Chief of Staff to Vice President Joe Biden, to lead the nation's Ebola response.

"Klain does not have a medical or a health care background," CBS DC reported. The appointment brought nearly universal condemnation.

"Worst Ebola epidemic in world history and President Obama puts a government bureaucrat with no healthcare experience in charge," Rep. Andy Harris (R-Md.) wrote on Twitter. **"Is he serious?"**

For a complete write up on the corruption of this man see: [The Great Father's Ebola Solution: More Government Corruption](#)

Meanwhile, **U.S. soldiers are only receiving four hours of training on Ebola before deploying to the West African nations struck hardest by the virus, which amounts to little more than putting on latex gloves and zipping up protective suits.**

But don't worry, the Pentagon claims the nearly 4,000 troops being sent to Africa will be "kept safe" from the disease, even though health officials can't keep Ebola from spreading in the U.S.

Obama hits the links with ESPN host

<<President Obama is hitting the links on Saturday, joined by ESPN commentator Tony Kornheiser after a hectic week for the White House in response to the Ebola outbreak.

<http://thehill.com/blogs/blog-briefing-room/news/221178-obama-hits-the-links-with-espn-host>

Obama Golfs For 4 Hours, 40 Minutes On Saturday, Then Holds Nighttime Ebola Meeting—Which New Ebola Czar Skips! President Barack Obama's new Ebola "czar" Ron Klain has skipped another White House meeting on the Ebola crisis, a readout of who attended a Saturday meeting with Obama shows this.

Ebola hoax: hidden purpose of the operation

Behind every created pandemic, there are a number of agendas in play.

In this case, the Globalist heavy hitters, who are dedicated to managing the planet, view things this way: **Use a crisis to build a larger structure than previously existed. As in: one global healthcare system. All-encompassing.**

The future propaganda? **“We can’t defeat Ebola unless all nations form a world one system that allows prevention and quarantine and immediate treatment anywhere on Earth.”**

In that sense, Ebola is the occasion for adding wings to the system. Ditto for every so-called epidemic.

“Well, we faced down and ultimately defeated virus X. But at great cost of life. **Now we have to build better bridges between the healthcare systems of nations—and finally, we need one great Dispensary that adjudicates where drugs and vaccines go, who is quarantined, which borders are sealed off, at any point on the globe.”**

We’re talking about a very high-level op here.

The Globalist dream? A single cradle-to-grave maze every person on earth follows, as a docile patient taking orders, submitting to diagnoses, taking vaccines and drugs, allowing their bodies and minds and energies and strength and independence to be drained away.

A single global medical system is the ideal structure of control.

Crisis A? Build a bigger system. Crisis B? Add to that system. Crisis C? Add more to the system.

And of course—invent each crisis.

The “medical crisis” is ideal, because it seems to involve no political agenda, no partisan position, no motive other than “helping those in need.”

You’ll be hearing phrases like **“the pitfalls of privatized medicine,”** and **“uncaring corporations,”** and **“the UN has to step in to solve the Ebola crisis,”** and **“international cooperation.”**

Realize that behind these phrases, there is another op in progress. **At its deepest level it really has nothing to do with predatory corporations or greedy doctors, but has everything to do with building Medical Central for planet Earth.**

Under that system, up the line, a patient would have no choice about whether to accept a diagnosis or take a drug or vaccine.

The watchword will be: compliance. For “the greater good.”

Over the past hundred years, no force has been more powerful in shaping modern medicine than the Rockefeller empire.

In his 2003 [Memoirs](#), David Rockefeller wrote: **“Some even believe we are part of a secret cabal working against the best interests of the United States, characterizing my family and me as ‘internationalists’ and of conspiring with others around the world to build a more integrated global political and economic structure—one world, if you will. If that is the charge, I stand guilty, and I am proud of it.”**

Rockefeller is acutely aware that one of the prime strategies for bringing his dream (nightmare) to fruition is a one-world, all-embracing medical apparatus.

There are some who welcome such an enterprise, naively believing it will mean greater health for all.

For them, I cite (as I frequently do) Dr. Barbara Starfield's shattering review: ["Is US health really the best in the world?"](#)

Starfield was a revered public-health expert working at the Johns Hopkins School of Public Health. Her review was published on July 26, 2000, in the Journal of the American Medical Association.

Starfield concluded that, **every year in the US, the medical system directly kills 225,000 people. Every year. That's 2.25 MILLION deaths per decade.**

So imagine, if you will, what would happen if the Globalist dream of one "healthcare" system for the planet came true.

And don't imagine such a system would involve solving the ongoing, endemic causes of death in most of the world: contaminated water, starvation, lack of basic sanitation, poverty.

The World Health Organization has had decades to make a significant dent in those grinding problems. But they talk; they appoint task forces; they study; they demand the distribution of more (toxic) medicines, and vaccines that push already-compromised immune systems over the cliff.

<http://jonrappoport.wordpress.com/2014/10/17/ebola-hoax-hidden-purpose-of-the-operation/>

Ebola: Very Crafty, False-Flag Vaccination-Blackmail?

Russia and America have worked in the past militarizing the Ebola virus to be deployable as a bio-warfare weapon.

So is this Ebola Virus Disease being set up as a false-flag operation to create a major epidemic inside America, while bringing blame to folks who refuse a new Ebola Vaccine which will soon be rolled out.

Will those growing millions who are now routinely refusing all vaccinations and who are notably anti-vaccination be set up as patsies as this Ebola spreads out of control, after it is covertly and fully deployed across America?

Can Ebola be covertly deployed to beat down We the People even further, while thinning the herd significantly and frightening Americans into giving up more basic Constitutional Rights?

We know that the responsible authorities violated acceptable protocols to cut-off travel from areas of infection in order to isolate the infected from potential transmission Vectors.

The most negligent thing any nation's health authorities can do is to provide a free ticket for a lethal virus like Ebola into America.

Globalist mouthpieces and talking heads have emerged claiming that to cut off travel from the areas in Africa affected would be tantamount to causing the virus to spread, and keeping travel open is the best way to stop it. These talking points which were issued to these State Health Officials by the CDC big shots are the opposite of known truth about containing such lethal viruses. This kind of leadership from the CDC is basically criminal negligence.

Obviously, the State Health Officials are getting very bad information from the CDC and placing a great number of Americans at risk for Ebola, when such would

not have been necessary at all if all Travel had been cut off from known infected areas in Africa, and anywhere else the virus was not completely isolated and locked-down.

If any nation wanted to send health workers to help, they could be sent and proper protocols utilized. This would mean that, after their tour of duty was completed, these folks could be quarantined in a clean environment in that country for an acceptable period of time greater than the known incubation of 21 days. **There is never any valid reason to give any such lethal virus a plane ticket into America, as was done.**

My guess is that a new Ebola Vaccine will soon be rolled out and many will refuse it, while Ebola is “covertly seeded” across America. Then the vaccination-refusers will be blamed for it. And this blame will then perhaps be used as an excuse to attack and intern those who won’t comply, either murdering them in their own homes, or taking them to quarantined FEMA Camps, where they can be forcibly inoculated with vaccines containing Ebola.

It is a known fact that the numbers of Americans who distrust vaccines and are refusing them for themselves and their kids are growing daily. A great deal of negative information has been circulated in the Alternative media on the worldwide internet. Much of this new information is coming from esteemed medical practitioners and researchers and even reported in respected peer-reviewed journals. **You can do some basic research for yourself, but an association between vaccines and [autism spectrum disorders](#) has been firmly established, and deaths and disabilities have resulted from the HPV vaccine, which so many hospitals, doctors, nurses, health departments, employers and schools are pushing.**

And there are thousands of Gulf War vets who believe their illnesses and disabilities were caused by all the experimental vaccines they were required to take. These vaccines were not tested before being used on them. This is criminal beyond words and just as criminal as the continual deployment of DU weapons and the massive exposures allowed by American Soldiers which has disabled many and created a great deal of death, misery and hardship for their families.

Do your own research, come to your own conclusions. But consider this, **it is crazy to give young children 35 or more vaccinations by the time they are 6 years old. Many of these still contain [Thimerisol](#), a form of ethyl mercury — the most neurotoxic substance known to mankind, and one that is known to decrease IQ significantly in children, like lead exposure does. And yet why was this used? Supposedly, as a preservative in group vials, which few use.**

A growing number of experts believe that this use of mercury was a conscious decision to dumb-down the populace and keep them from rebelling, just like the addition of industrial waste from the gypsum, aluminum and uranium industries, the compound known as Fluoride. It was used in Nazi Internment Camps and in Russian Bolshevik Gulags to minimize escape attempts and rebellions.

Also we know that the US Military has spent millions working on long-acting, stealth viruses. Just do an Internet search. These viruses are deployed to sit idly by and be later activated through other viruses. We also know that the Pentagon has been financing multimillion dollar projects to develop a vaccine which will alter the brain to reduce fundamental religious behavior. Can you say partial lobotomy, destruction of the soul?

So will there be a new Ebola Vaccine soon rolled out to act as a catalyst for long-acting viruses already vaccinated into many Americans through the yearly Flu Vaccines, and will it induce partial brain lobotomies to reduce fundamental religious behavior, which the USG defines as Domestic Terrorism? The following video clip leaked by a Pentagon good guy shows just how serious the US Army has been about coming up with bio-warfare to reduce extremism and any belief in God Almighty.

Leaked Pentagon Video - Flu Vaccine Use to Modify Human Behavior
