Ephesians 5:11, 13-16: "And have no fellowship with the unfruitful works of darkness, but rather **reprove** them. But all things that are reprov'd are made manifest by the light: for whatsoever doth make manifest is light. Wherefore he saith, **Awake thou that sleepest**, and arise from the dead, and Christ shall give thee light. See then that ye walk **circumspectly**, not as fools, but as wise, Redeeming the time, because the days are evil."

The **1828 Noah Webster Dictionary** defines:

Reprove: To blame, to convince of a fault, or to make it manifest, to excite a sense of guilt.

Circumspectly: Cautiously; with watchfulness every way; with attention to guard against surprise or danger.

Matthew 24:24: "...if it were possible, they shall deceive **the very elect**."

II Corinthians 2:11: "Lest Satan should get an advantage of us: for we **are not** ignorant of his devices."

II Chronicles 7:14: "If **my people**, which are called by my name, shall humble themselves, and pray, and seek my face, and turn from their wicked ways; then will I hear from heaven, and will forgive their sin, and will heal their land."

Newtown school shooting story already being changed by the media to eliminate eyewitness reports of a second shooter

(NaturalNews) The national media is ablaze today with coverage of the tragic elementary school shooting in Newtown, CT, where 27 people have reportedly been killed, including 18 children. As always, when violent shootings take place, **honest journalists are forced to ask the question: "Does this fit the pattern of other staged shootings?"**

One of the most important red flags of a staged shooting is **a second gunman, indicating the shooting was coordinated and planned. There are often mind control elements at work in many of these shootings. The Aurora "Batman" shooter James Holmes, for example, was a graduate student actually working on mind control technologies funded by the U.S. government. There were also chemical mind control elements linked to Jared Lee Loughner, the shooter of Congresswomen Giffords in Arizona in 2011.**

According to multiple eyewitness reports from Aurora, Colorado, including at least one caught on camera by mainstream media news reports in Colorado, **James Holmes did not operate alone.** There was **a second shooter** involved. But the media quickly eliminated any mention of a second shooter from its coverage, resorting to the typical cover story of a "lone gunman." Today, the exact same thing is happening with the Newton, CT school shooting.

Eyewitness reports of a second shooter now being "scrubbed" from the news

As the story of this shooting was first breaking, the news was reporting a second gunman. FoxNews reported that this second gunman was "led out of the woods by officers" and then questioned. The original source of this report was the Connecticut Post.

A local **CBS affiliate was also reporting the existence of a second gunman and said "Police believe there may be a second gunman and are looking for a red or maroon van with its back window blown out..."**

ABC News also originally reported, "A second gunman is apparently at large. Car-to-car searches are underway."

Videos Contradicting Official Elementary School Massacre Story

A local CT CBS affiliate was also reporting, "CBS News reports that a potential second shooter is in custody and that SWAT is now investigating the home of the suspect. A witness tells WFSB-TV that a second man was taken out of the woods in handcuffs wearing a black jacket and camouflage pants.

But the more recent stories being put out by the media are scrubbing any mention of a second gunman and going with the "lone gunman" explanation, which holds about as much water as the "lone gunman" explanation of the JFK assassination.

"A lone gunman killed 27 people at an elementary school here, including 18 children, in a terrifying early Friday morning shooting spree," reports [USA Today](#). It makes no mention whatsoever of a second gunman.

[NBC News](#) is also now chiming in with the "lone gunman" version of the story, eliminating any mention of a second gunman from its coverage of the tragic event.

Journalists are trained to ask questions, and one of the questions I have right now is: **Why was the second gunman suddenly dropped from media coverage after the first few hours of this story developing?**

And why is there always a second gunman in these recent mass shootings that seem to be engineered to maximize emotional shock value due to the sheer horror of all the innocent deaths?

Our hearts and prayers go out to the children and families impacted by this violent tragedy.

Given the terrible loss of life that has taken place here, **shouldn't we all seek to get to the bottom of WHY these shootings all seem to fit a common pattern of multiple mind-controlled shooters followed by an almost immediate media cover-up of the facts?**

For the sake of those children who were killed today, I want to get to the bottom of this and expose the REAL story, for the purpose of stopping this violence from targeting yet more innocents in the future.

[To stop school shootings, we should let criminals have all the guns, argue gun control advocates](#)

(NaturalNews) If you're shaking your head after reading the headline for this article, you're not alone. **The idea of taking away guns from all the law abiding citizens while concentrating them in the hands of deranged, psychopathic criminals isn't my idea, however. It's Obama's. And Bloomberg's. And Nancy Pelosi and everybody else who is now pushing for "gun control" legislation in the wake of the Newtown, Conn. elementary school shooting.**

RELATED: [Daily Caller – ABC, NY Times reporters go full-on vulture tweeting the friends and family of the Connecticut massacre targets](#)

While the gun grabbing lobby continues their concert to exploit the tragic school shooting in Connecticut **in order to manufacture support for new firearm restrictions, the fourth column has been following families of the victims around in hope of catching a sound byte blaming the weapons used instead of the murderer.**

Gun control petition to White House gets large and immediate support online

A petition urging the Obama administration to "produce legislation that limits access to guns" has more than 25,000 signatures just hours after its inception.

"The goal of this petition is to force the Obama Administration to produce legislation that limits access to guns," it reads in part. "While a national dialogue is critical, laws are the only means in which we can reduce the number of people murdered in gun related deaths."

A petition on the White House's "We the People" website needs 25,000 signatures in the first month of being posted to earn an official White House response. The gun control petition – initiated in the wake of the Connecticut elementary school massacre on Friday – **reached that threshold in a few hours.**

[Full article here](#)

The problem with gun control laws is that **only law-abiding citizens follow laws. This should be self-evident. So while a gun ban law would see law-abiding citizens turning their guns in, law-abiding citizens are not the source of violent shootings.**

It's the psychopathic criminals who are committing the violence. And because they are criminals, they will by definition ignore gun ban laws.

Want proof? Well, for starters, it's already against the law to shoot and kill children. Yet Adam Lanza (and most likely another) did exactly that in Newtown, Conn., **defying what the law says. All by itself, this is proof that laws do not stop criminal-minded psychopaths from committing acts of violence.**

Remember all this **when you hear all the usual political suspects call for "gun control legislation." This legislation will, by definition, only hurt law-abiding citizens who would never even think of harming innocent children. At the same time, gun control laws will do absolutely nothing to stop psychopathic criminals from using guns, knives or other weapons to commit mass violence.**

Proof of this is readily apparent. **"One of the interesting characteristics of mass shootings is that they generally occur in places where firearms are [already] banned: malls, schools, etc,"** writes professor Glenn Harlan Reynolds in a [USA Today opinion piece](#). "That was the finding of a famous 1999 study by John Lott of the University of Maryland and William Landes of the University of Chicago, and it appears to have been borne out by experience since then as well."

Reynolds goes on to expose the "big lie" of gun control: **the idea that criminals will abide by "gun-free zones" or laws of any kind. The very premise of being a criminal is that they ignore laws.**

If anything, **gun-free zones are "a magnet for mass shooters,"** explains Reynolds. **And he's right: Aurora, Colorado had some of the most stringent gun control laws in America. But instead of**

reducing gun crime, all it did was **ensure that victims were completely disarmed** and unable to shoot back.

One report reads: *If someone were to truly want to solve the problem of school shootings, they would allow various, random staff members to carry guns, and post signs allowing intruders, and potentially violent students to know that they will not get very far if they plan on carrying out an attack.*

Allowing random staff members at choice to carry weapons, would bring an extra element of security to the equation, because no one would know which teachers were armed and which ones were not, forcing them to assume that all of them are.

For an attacker, knowing that they are walking into a firing squad can be a very strong deterrent. On the other hand, under our current "no gun school zone" policies, attackers are given the message that the whole building will be defenseless.

Another report reads: *Furthermore, when you put gun control measures into place you are merely taking a means of self defense away from those who need it, and placing an extra advantage into the hands of criminals who refuse to obey the laws anyway.*

Another report reads: Can anybody else see the connection between the shootings at Virginia Tech, the sniper attacks in D.C. and Baltimore, the Amish and Columbine massacres, and all of the public school shootings? **They all occurred at "gun-free zones."**

Even insane murderers aren't stupid. Even suicidal butchers of innocent people want to succeed at killing innocent people, and gun-free zones are the safest place to do that.

Fact: *Gun control has done nothing to keep crime rates from rising in the nations that have imposed severe firearms restrictions.*

*** Australia:** *Readers of the USA Today newspaper discovered in 2002 that, "Since Australia's 1996 laws banning most guns and making it a crime to use a gun defensively, armed robberies rose by 51%, unarmed robberies by 37%, assaults by 24% and kidnappings by 43%. While murders fell by 3%, manslaughter rose by 16%."*¹²

*** England:** *According to the BBC News, handgun crime in the United Kingdom rose by 40% in the two years after it passed its draconian gun ban in 1997.*⁴

None of this logic and reason, of course, will stop people like President Obama from trying to punish law-abiding citizens across America by taking their 2nd Amendment Rights to armed self defense. Then again, gun control advocates never claimed to have any basis in logic or reason. They have habitually resorted to fear and *contrived emotions* to try to push their disarmament agenda, even in the face of overwhelming evidence that gun control causes **MORE** crime, not less.

As history has shown, **mass disarmament leads to even more deaths via government violence against unarmed citizens.**

Crime Rates Plummet After Law Required Firearms for Residents in Kennesaw, GA

NEWS BRIEF: "[25 years murder-free in 'Gun Town USA'](#) World Net Daily, April 19, 2007

"As the nation debates whether more guns or fewer can prevent tragedies like the Virginia Tech Massacre, **a notable anniversary passed last month in a Georgia town that witnessed a dramatic plunge in crime and violence after mandating residents to own firearms.** In March 1982, 25 years ago, the small town of Kennesaw – responding to a handgun ban in Morton Grove, Ill. – **unanimously passed an ordinance requiring each head of household to own and maintain a gun.**"

Now, that is a dramatic requirement, don't you think? **Of course, opponents of such a drastic action predicted grave results, 25 years ago. What has really happened?**

"Since then, despite dire predictions of "Wild West" showdowns and increased violence and accidents, **not a single resident has been involved in a fatal shooting – as a victim, attacker or defender.**"

[Gun control? We need medication control! Newton elementary school shooter Adam Lanza likely on meds; labeled as having 'personality disorder'](#)

(NaturalNews) In mass shootings involving guns and mind-altering medications, politicians immediately **seek to blame guns but never the person or the medication they are taking.** **Nearly every mass shooting that has taken place in America over the last two decades has a link to psychiatric medication,** and it appears today's tragic event is headed in the same direction.

Adam Lanza has been described **as a 'Goth' loner, who dressed all in black and was obsessed with video games.**

Adam Lanza belonged to a technology club at Newtown High School **that held computer gaming parties.**

See Scott Johnson's teachings:

According to [ABC News](#), Adam Lanza, the alleged shooter, **has been labeled as having "mental illness" and a "personality disorder."** **These are precisely the words typically heard in a person who is being "treated" with mind-altering psychiatric drugs.**

One of the most common side effects of psychiatric drugs is violent outbursts and thoughts of suicide.

One report reads:

Prozac and its family of psychotropic drugs are at the heart of 99% off mass murder shootings. The media also hypes victim disarmament zones like public brainwashing centers as a great place for Prozac and Zoloft heads to kill. They always go to the place with no guns so they can take their time. Guns don't kill people kook psychologist pushing SSRI do.

Yesterday reports claimed he had been diagnosed with **Asperger's syndrome**, a form of **autism** where sufferers experience difficulties with communication and social skills, which can lead to isolation and emotional problems.

Dr. Johnson's Comment: **Autism was virtually unknown before the modern day advent of vaccinations. Before 1980, autism was diagnosed in just 1 out of every 10,000 children. But by 2005 (in accordance with huge increases in vaccination schedules in America), the National Institute of Health reported that autism disorders affect one in every 250 children, and that number is estimated to increase 10% every year.** New numbers released by the U.S. Center for Disease Control in late March of 2009 show the scope of the epidemic: **one in 88 children** being tracked are now diagnosed with an autism spectrum disorder by the age of 8. **And coincidentally, this steady rise in autism rates just so happens to coincide directly with CDC-endorsed vaccination schedules that have also risen sharply since the 1980s.**

Back in 1983, for example, the CDC recommended only ten vaccines for children from birth through six years old

(<http://www.cdc.gov/vaccines/pubs/images/schedule1983s.jpg>). Today, that number has risen significantly to 29 vaccines and counting, many of which are now administered all at one time or in combinations like the measles, mumps, and rubella (MMR) vaccine (<http://www.cdc.gov>).

And yet the mainstream medical system and its allies in the government and media are willfully ignoring this glaring fact, blaming "unknown" causes and "genetics" for causing autism, which are the two most common catch-all scapegoats. Vaccines, fluoride, MSG, GMOs, toxic chemicals, processed foods -- the real causes of autism.

http://www.naturalnews.com/035452_autism_vaccinations_children.html

The **Columbine High School shooters were, of course, on psychiatric drugs at the time they shot their classmates in 1999.** Suicidal tendencies and violent, destructive thoughts are some of the **admitted behavioral side effects** of mind-altering prescription medications.

No gun can, by itself, shoot anyone. It must be triggered by a person who makes a decision to use it. And while people like NY Mayor Bloomberg are predictably trying to exploit the deaths of these children calling for guns to be stripped from all law abiding citizens who have done nothing wrong whatsoever, none of these gun grabbers call for medication control.

Why is that? **After all, medications alter the mind, that controls the finger, that pulls the trigger.**

See Scott Johnson's Teaching:

Pharmakeia: Sorcery, Pharmaceuticals & the Roots of Modern Day Drug Industry

September 21st, 2008

Pharmakeia is a form of the Greek root word which is translated to our English words: **Pharmacy, Pharmacist, and Pharmaceutical.** In the Bible, pharmakeia carried with it the idea of sorcery, occultism, and black magic. It is in this sense that Paul used the term in **Galatians 5.20** as the word 'witchcraft'. In **Rev. 9:21 & 18:23** it is translated 'sorceries'. **Do you find it rather disturbing that approximately 60% of the population is taking at least one pharmaceutical drug every day? Some are taking up to fifteen and twenty!** We are told that we are living during a time of the greatest medical breakthroughs in the history of the world, yet over one hundred million Americans suffer from various health problems **with most relying on drugs to deal with the symptoms.** Why has such a large majority of the world become dependent on pharmaceutical drugs? Perhaps you're one of the hundreds of millions around the world that's ingesting a daily dose of pharmaceutical medicine? **Is it possible that the pharmaceutical/medical cartel has 'disease propagation' and not 'disease cure' in mind?** The most powerful German economic corporate emporium in the first half of this century was known as IG Farben; which was a powerful cartel of BASF, Bayer, Hoechst, and other German chemical and pharmaceutical companies. **IG Farben was the single largest donor to the election campaign of Adolph Hitler & the beginning of the modern day pharmaceutical industry.** Accordingly, after Hitler's seizure of power, IG Farben was the single largest profiteer of the German conquest in the Second World War. Zyklon-B, an extermination gas produced by Hoechst, was used to kill millions of innocent people in death camps. The U.S. government's investigation (of all the factors leading to WW2 in 1946) came to the conclusion that without IG Farben the Second World War would of not been possible. The Nuremberg War Criminal Tribunal convicted 24 IG Farben board members and executives on the **basis of mass murder, slavery and other crimes against humanity.** Amazingly however, by 1951 all of them had already been released, continuing to consult German corporations. The Nuremberg Tribunal dissolved the IG Farben into Bayer, Hoechst, and BASF.

Today each of the three daughters of the IG Farben is 20 times bigger than IG Farben was at its height in 1944, the last year of the Second World War.

More importantly, for almost three decades after the Second World War, BASF, Bayer and Hoechst (now Aventis) each filled its highest positions with former members of the German Nazis.

Along with the Rockefellers (Standard Oil, Chase Manhattan Bank), Mellons (Gulf Oil, Alcoa Aluminum), DuPonts (DuPont Chemicals), General Motors, Henry Ford, banks and shipping companies operated by the Bush family **were crucial players in setting up the industrial power behind the Third Reich.** These companies poured hundreds of millions of dollars into IG Farben and provided it with technology for tactically-essential synthetic materials-***while withholding the same materials and patents from the US government.***

The Rockefeller family, long aligned with the Bushes, owned Standard Oil. Through a stock transfer they became half owners of Germany's IG Farben with Farben likewise owning almost half of Standard Oil. According to the Encyclopedia Britannica, IG Farben built and operated more than 40 concentration camps in Nazi-occupied Europe, including Auschwitz.

At their slave labor/factory/death camps chemicals, weapons, drugs, synthetic fuels and other materials vital to the Nazi war effort were manufactured. In addition, eugenicists like Dr. Josef Mengele used the human subjects in the camps for experiments the data from which are today the basis for many drugs marketed by the pharmaceutical industry - not too surprising in light of the fact that more Americans die from prescription drugs than from any other single cause.

At the end of WWII the allies split up IG Farben into companies that are now the top pharmaceutical concerns on earth among them Bayer, Hoechst, BASF, the Agfa-Gevaert Group and Cassella AG. These companies just so happen to be some of Wall Street's favorite pharmaceutical/chemical companies behind the proliferation of genetically-altered foods, transgenic animals, human cloning, dangerous psychiatric drugs, deadly vaccines and pesticides.

<http://rense.com/general7/gw.htm>

Back to the main report: The saying that "guns kill people" is physically impossible. People kill other people, and as we all learned from watching the O.J. Simpson trial, you don't need a gun to commit murder.

A far better solution here would be to outlaw psychiatric drugs that cause the violent behavior in the first place. After all, if you only outlaw guns but fail to eliminate the drugs that cause the violence (in part), people dosed up on mind-altering meds will simply find alternate weapons to commit the same acts of violence. **You don't think a crazy guy with a sword can hack up 20 or 30 kids in a school? A sword, a knife or even a pick axe can be just as deadly as a firearm.**

A guy with a chain saw can do all kinds of damage if he's out of his mind. Should we ban chain saws?

I have thought for quite some time that **people on medication are dangerous operating automobiles on public roads.** If driving drunk is illegal, why isn't "driving on meds" illegal? Why are wildly medicated people allowed to operate heavy machinery?

Dr. Johnson's Comment:

Here are some natural alternatives to mind altering meds:

- [Mood Response 60 capsules](#)
- [Calm Response 60 capsules](#)
- [Min-Chex Product Detail Sheet](#)
- [Tuna Omega-3 Oil](#)
- [Cataplex G Product Detail Sheet](#)
- [Adrenal Support Brochure](#)
- [Natural Calmatives Brochure](#)

A high-ranking police officer in Tucson, Arizona once told me, on the record, that one-third of all automobile accidents in the city of Tucson were related to medicated drivers. That's an astonishing number that would seem to indicate that medications are far more dangerous than guns when it comes to the total daily body count.

[Medications kill roughly 100,000 Americans each year according to study statistics](#). The actual number is either 98,000 or 106,000 depending on which study you believe.

For guns to be as deadly as medications, you'd have to see a Newton-style massacre happening ten times a day, every day of the year. Only then would "gun violence" even match up to the number of deaths caused by doctor-prescribed, FDA-approved medications.

Why does America grieve for the children killed in Newton, but not for the medical victims killed by Big Pharma or the 4000+ aborted babies killed in abortion mills across America each day? Will Obama shed a fake tear for the victims of Big Pharma or abortion, or are his fake tears reserved only for politically expedient events that push his agenda of unconstitutional gun restrictions?

If our goal is to **stop the violence in America**, we are completely dishonest if we do not consider the mental causes of violent behavior. And that starts with mind-altering, **demon infesting**, psychiatric drugs which I believe have unleashed [a drug-induced epidemic of violence](#) across our nation.

Obama, Bloomberg and others will point to guns and try to convince you that inanimate metal objects are the cause of this violence. But they lie by omission. No guns shoot itself. The trigger must be pulled by someone, and the mental state of that person is the primary cause of the resulting action. To ignore this fundamental chain of facts is brutally dishonest.

Warning Gun Control Advocates are at a Fever Pitch to Ban Firearms
