Ephesians 5:11, 13-16: "And have no fellowship with the unfruitful works of darkness, but rather reprove them. But all things that are reprov'd are made manifest by the light: for whatsoever doth make manifest is light. Wherefore he saith, Awake thou that sleepest, and arise from the dead, and Christ shall give thee light. See then that ye walk circumspectly, not as fools, but as wise, Redeeming the time, because the days are evil."

The 1828 Noah Webster Dictionary defines:

Reprove: To blame, to convince of a fault, or to make it manifest, to excite a sense of guilt.

Circumspectly: Cautiously; with watchfulness every way; with attention to guard against surprise or danger.

Matthew 24:24: "...if it were possible, they shall deceive the very elect."

II Corinthians 2:11: "Lest Satan should get an advantage of us: for we are not ignorant of his devices."

II Chronicles 7:14: "If my people, which are called by my name, shall humble themselves, and pray, and seek my face, and turn from their wicked ways; then will I hear from heaven, and will forgive their sin, and will heal their land."

The Pentagon's "Fun Vax" Aerosol Viral Vaccine Program and the Elimination of Your Free Will-Especially "Religious Behavior"

What you are about to hear is not science fiction or conspiracy theory but a glimpse of what is going on behind the closed doors of the United States Pentagon in a briefing from 2005. In a small auditorium labeled BC232 a man is presenting a discussion on how the military industrial complex can spread a virus and use a vaccine to extinguish what the pentagon calls undesirable human behavior, specifically in this case religious behavior.

They want to alter populations DNA to breed out religious impulses via vaccinations and aerosol spraying from above. They purport to have isolated a problematic gene causing religious impulsive behavior, of which the presence supposedly can be identified with brain scans.

FunVax is a Government made viral vaccine that "cures" religious fundamentalism. It inhibits VMAT2 the so called "God Gene" which supposedly causes people to be prone to have spiritual experiences. The government has the audacity to claim this FunVax aerosol vaccine program will bring stability to several countries in the Middle East.

After a member of the audience asks the speaker if the idea is to "by spreading this virus....eliminate individuals who are going on to a bomb fest, who are going into a market and blowing it apart," the speaker confirms, "by vaccinating them against this, we'll eliminate this behavior."

The question of how to implement the vaccine is answered by the speaker when he responds to the man in the audience, who raises doubts over the feasibility of performing CT scans on suspected terrorists rather than just "putting a bullet in their head".

"The virus would immunize against this VMAT 2 gene and that would....essentially turn a fanatic into a normal person, and we think that would have major effects in the Middle East," states the speaker.

The audience member then asks, "How do you suggest this can be dispersed, via an aerosol?" -- to which the speaker responds, "The present plan and the tests we've done so far have used respiratory viruses such as flu and we believe that's a satisfactory way to get the exposure of the largest part of the population."

The speaker confirms that the name of the proposal is "Funvax -- the vaccine for religious fundamentalism."

Joey Lambardi (The Main Person to Originally Break the FunVax Bombshell) Arrested In Argentina

Posted on [September 19, 2011](#) If you have been following this blog, then you know that this page is maintained by people that support Joey Lambardi's cause – **the release of information about FunVax**. It's been over six weeks since we last heard from Joey and unfortunately our fears were realized. Four weeks ago, Joey Lambardi was arrested in Argentina. One of the contributors of this blog got a call from Joey's mother this weekend. Joey was not allowed to make any calls, but he was able to get word to his mother through another prisoner.

At this time we don't know what the charges are. Joey's Mother hired a lawyer, so hopefully, we'll know more soon. We'll keep you updated.

Biosecurity Advisory Board Reverses Decision on 'Engineered Bird Flu' Papers: Two scientific papers that describe experiments with a virulent and contagious bird flu virus should be published in uncensored form, a committee of scientists advising the federal government said Friday. That recommendation by the National Science Advisory Board for Biosecurity **reverses** one the committee made in January, when it asked two journals, Science and Nature, to hold off publishing studies about the lab-engineered strains of the H5N1 influenza virus. The about-face came after the heads of the research teams — one Dutch, the other American — clarified their work and provided new information on its possible importance at a two-day meeting of the committee in Washington. **While the studies could still be used by terrorists or mischief-makers, the committee said in a written statement that "the additional information changed the board's risk/benefit calculation."** [more](#)

78 percent increase in childhood autism rates over past decade coincides with sharp uptick in vaccination schedules

by Jonathan Benson, staff writer (Natural News) The rate of autism among American children **has nearly doubled over the past decade**, according to a new report released by the U.S. *Centers for Disease Control and Prevention* (CDC), jumping from about one in 150 children back in 2000 to about one in 88 children in 2008, which is the last time official estimates were calculated. **And interestingly, this steady rise in autism rates coincides directly with CDC-endorsed vaccination schedules that have also risen sharply since the 1980s.**

Back in 1983, for example, the CDC recommended **only ten vaccines** for children from birth through six years old (<http://www.cdc.gov/vaccines/pubs/images/schedule1983s.jpg>). Today, that **number has risen significantly to 29 vaccines and counting**, many of which are now administered all at one time or in combinations like the measles, mumps, and rubella (MMR) vaccine (<http://www.cdc.gov>).

And yet the mainstream medical system and its allies in the government and media are willfully ignoring this glaring fact, blaming "unknown" causes and "genetics" for causing autism, which are the two most common catch-all scapegoats. And in explaining the drastic rise in autism rates over the years, the talking heads actually claim that there is no rise -- the seemingly elevated autism rates are merely the result of improved autism screening methods that are now identifying more cases.

Sadly, these laughably unscientific excuses for this epidemic condition are actually being taken seriously by many people, while the true causes of autism – vaccines with the contributing factors of fluoridated water, monosodium glutamate (MSG), genetically-modified organisms (GMOs), toxic chemicals, processed foods, etc.-- continue to remain taboo subjects when talking about autism.

But any rational human being that takes the time to objectively investigate the science behind how autism spectrum disorders are, at the very least, spurred on by these and other toxins, will quickly realize that the ugly truth about autism is being concealed from the public. And while these factors may not cause autism symptoms in every single person that is exposed to them, they surely trigger it in many, especially when exposures are combined and persistent. Vaccines, for instance, which the medical establishment have presumptuously declared to play absolutely no role in autism, continue to show up in independent, non-pharma-sponsored research as a cause of autism. Whether they contain thimerosal (mercury) or not, vaccines are definitively linked to neurological disorders that were largely non-existent prior to mass-vaccination campaigns.

Even the kangaroo "vaccine court" has quietly admitted this, having settled with several families whose children were injured by vaccines. Back in 2009, for instance, a vaccine court ruled that Bailey Banks, a young boy who suffered acute brain damage after getting the MMR vaccine, had indeed been injured by the vaccine. Special Master Richard Abell wrote at the time that "the MMR vaccine at issue actually caused the conditions from which Bailey suffered and continues to suffer" (<http://www.ageofautism.com>).

The case was one of hundreds that has received little or no media attention, and yet it speaks volumes about the dangers associated with vaccines. It also exposes the lies of the deniers who have declared that vaccines are in no way related to autism.

And besides vaccines, fluoridated water, MSG (<http://www.msgtruth.org/autism.htm>), GMOs (<http://www.ageofautism.com>), toxic chemicals both in the environment and in the food supply, and processed foods in general have all been linked to autism spectrum disorders as well (<http://www.tacanow.org/family-resources/living-in-a-toxic-world/>).

[Paralysis Cases Spike in Wake of Bill Gates' Polio Vaccination Effort in India](#)

Aaron Dykes--Infowars.com--April 6, 2012

Expert medical pediatricians in India have criticized the World Health Organisation (WHO) and the Bill & Melinda Gates Foundation for its illusory goal of promising polio eradication without hinting at the side effects.

Numerous problems have surfaced from what these [doctors have termed](#) an "unethical" advocacy that spanned more than a decade. That vaccination program, funded only through an initial series of grants, has saddled the Indian government with health program costs and exposed the public to new risk factors.

As Dr Vashisht and Dr Puliyl of the Department of Pediatrics at St Stephens Hospital in Delhi point out in their criticism, not the least of these risks is the specter of polio's sudden return in weaponized form.

There has been a huge spike in cases of non-polio acute flaccid paralysis (NPAFP)– the very types of problems it was hoped would disappear with polio but instead have flourished.

There were 47,500 cases of non-polio paralysis reported in 2011, the same year India was declared “polio-free,” according to Dr. Vashisht and Dr. Puliyeel. Further, the available data shows that the incidents tracked back to areas where doses of the polio vaccine were frequently administered. The national rate of NPAFP in India is 25-35 times the international average. Related studies in India have already demonstrated that [polio vaccines are the leading cause of polio paralysis](#). Similarly, a [government inquiry in Pakistan found](#) that polio vaccines funded by the Bill Gates-led GAVI (Global Alliance for Vaccines and Immunization) were causing deaths and disabilities.

Regardless, research on these incidences in India confirm that the rate of non-polio paralysis increased in *correlation* with vaccine doses administered:

“From India’s perspective the exercise has been an extremely costly both in terms of human suffering and in monetary terms. It is tempting to speculate what could have been achieved if **the \$2.5 billion spent on attempting to eradicate polio, were spent on water and sanitation.**”

This kind of unethical partnership between the WHO and private entities is reminiscent of the corruption we saw in the H1N1 Swine Flu Scare where the World Health Organization declared a pandemic, later admittedly elevated on flimsy pretenses to create demand for the vaccine. This was exposed by Council of Europe Health Committee Chairman [Wolfgang Wodarg who demonstrated that drug firms collaborated with WHO officials to deliberately create a “campaign of panic”](#) and a ‘false disaster’ over swine flu pandemic fears not proportionate to the real dangers.
