Ephesians 5:11, 13-16: "And have no fellowship with the unfruitful works of darkness, but rather **reprove** them. But all things that are reprov'd are made manifest by the light: for whatsoever doth make manifest is light. Wherefore he saith, **Awake thou that sleepest**, and arise from the dead, and Christ shall give thee light. **See then that ye walk circumspectly**, not as fools, but as wise, Redeeming the time, because the days are evil."

Reprove: To blame, to convince of a fault, or to make it manifest, to excite a sense of guilt.

Circumspectly: Cautiously; with watchfulness every way; with attention to guard against surprise or danger.

Massive US Death Traps Exposed On Drudge Report - 'They Can't Hold It Back Much Longer' Survival Expert Warns

By Stefan Stanford - All News Pipeline - Live Free Or Die

It has long been argued that the #1 rule for survival is population density.

Imagine this. Should suddenly and without warning the world implode, where would YOU rather be; in a big city with hundreds of thousands to millions of others, the large majority of them completely unprepared for this situation, or out in the country or the mountains where the numerical odds begin in your favor with far fewer people

attempting to take what's yours?

While the globalists attempt to herd the masses into the big city/suburb population hubs that make up nearly 50% or more of the US population, our 'arrives just in the nick of time' system of resources is being stretched to the point of breaking and as we've been warned, all it needs is the right event to bring it all crashing down.

The story that [Drudge Report](#) linked to on their websites on Wednesday was called "[World's Worst Traffic Jam?](#)" and it showed a photograph and must-see video of traffic stuck for miles in pre-Thanksgiving gridlock in Southern California. While the photo shows a peaceful, orderly Thanksgiving weekend travel, it doesn't take too much imagination to visualize what it might look like should this travel be under an emergency scenario.

A shiny sea of red and white lights stretching as far as the eye can see, scenes like that are being replayed all across the country. Showing us why the big cities can instantly become 'death traps' in an emergency scenario.

So when it all comes down, do YOU want to be one of those trying to escape from the cities (along with several hundred thousand of your neighbors) or would you rather already be far, far away from the suddenly fleeing masses?

As we're told in the 2nd video below featuring survival expert [James Wesley Rawles of SurvivalBlog.com](#) there is still a very real chance that the globalists will

try to bring down the economy on Donald Trump's watch, putting the blame upon nationalism and thus ensuring globalist power in the future, so people better be prepared for that possibility.

If such a worst-case scenario happens, and the chain of supplies that keep our country glued together suddenly stop whether via massive cyber attack that takes down our system's infrastructure, or simultaneous Muslim terrorist attacks, or an EMP attack or a solar flare that creates a 'lights out scenario' or a pandemic or simply economic collapse; imagine what might happen should a million people or more suddenly be unable to get food, toilet paper or other basic necessities.

The anti-Trump riots that are happening now across the country would be nothing compared to millions hungry, unable to find their next meals.

As we're told in this new story from Survival Dan, economic collapses often go hand-in-hand with a disruption of supplies that leads to the breakdown of our society, often causing massive unrest and chaos. With huge food shortages possibly leading to famine, those who think such a situation could never happen here in America only need to look back several decades to see that it already did... and many Americans died because of it from starvation, malnutrition and all of the associated illnesses and disease that come with people not eating properly and living on the streets.

During the Great Depression, the population of the US was only about 125 million; according to Deagel.com, in 2015 the population of the US was nearly 321 million - almost 3 times as many people living here as there were 70 to 80 years ago. Certainly a massive economic collapse that leads to major famine across

America could account for why Deagel is predicting that ONLY 61 million will be living in the US by 2025, just over 8 years from now.

How else might the US population SHRINK to less than half of what it was during the Great Depression? Keep in mind, 61 million Americans is about 1/5 of those living here now... how might our population be reduced so drastically and so quickly? From

Deagel.:

The key element to understand the process that the USA will enter in the upcoming decade is migration. In the past, specially in the 20th century, the key factor that allowed the USA to rise to its colossus status was immigration with the benefits of a demographic expansion supporting the credit expansion and the brain drain from the rest of the world benefiting the States.

The collapse of the Western financial system will wipe out the standard of living of its population while ending ponzi schemes such as the stock exchange and the pension funds. The population will be hit so badly by a full array of bubbles and ponzi schemes that the migration engine will start to work in reverse accelerating itself due to ripple effects thus leading to the demise of the States. This unseen situation for the States will develop itself in a cascade pattern with

unprecedented and devastating effects for the economy. Jobs offshoring will surely end with many American Corporations relocating overseas thus becoming foreign Corporations!!!!

We see a significant part of the American population migrating to Latin America and Asia while migration to Europe - suffering a similar illness - won't be relevant. Nevertheless the death toll will be horrible... When pensioners see their retirement disappear in front of their eyes and there are no servicing jobs you can imagine what is going to happen next. At least younger people can migrate. Never in human history were so many elders among the population. In past centuries people were lucky to get to their 30s or 40s. The American downfall is set to be far worse than the Soviet Union's one. A confluence of crisis with a devastating result.

With George Soros and the globalists already getting the masses charged up to fever pitch with paid anti-Trump protesters causing havoc all across the country, imagine what will happen if suddenly, this winter or next spring, the globalists follow through and bring our economy crashing down. Certainly such a collapse

would explain the Deagel.com numbers and gives us another good reason to get out of the cities, and ASAP.

As we learn in the new story from Michael Snyder over at the Economic Collapse Blog, half of the world is dirt poor and the global elite want it to stay just that way. If you think that doesn't include the US,

this new story from Zero Hedge tells us which US states have seen an increase in the use of food stamps between 2000 and 2015 and how much that percentage is. This chart alone shows us why America is in deep trouble.

And as Wall Street told us just days ago, the strongest pillar of a shaky US economy has just cracked. Telling us the 'car recession' is supposed to spread into 2017, we see why survival experts such as James Wesley Rawles are telling Americans to double down on our prepping... "they can't hold back collapse much longer".

As we're told in this story from AltMarket.com, Donald Trump's win and the defeat of the left comes with a cost. With Trump now the perfect scapegoat, or conduit, for economic collapse, we're not surprised the globalists are still talking 'war' as we've long been warned, "when all else fails, they bring us to war".

During this time that we are thankful for all of the blessing bestowed upon us, we need to remember that such a war will likely come home to US soil, fought in the same US cities where Americans are now fighting traffic jams.

As we're told in the final video below, there is so much to be thankful for here in America, having the opportunity to prepare for a moment we pray never comes. Meanwhile, every day both here in America and in other places around the world, people are living their own very real survival stories.

With the number of Americans on food stamps going through the roof as seen in the chart above, we pray that the days ahead are loving, hearty, bountiful ones for everybody while preparing for the days that aren't.

[++ United Nations Soldier Says: They Will Soon Occupy America: “Going Door-to-Door Taking Guns Or Shooting To Kill”](#)

According to a recent alert posted at [SteveQuayle.com](#), the United Nations may already be preparing for such an outcome:

This does not come from a high level source. Just an everyday average Joe. But a guy that works in the same industry that always gave me a hard time about the tinfoil hat-stuff. Well he recently returned from a Great Divide concert at which a gentleman (just passing by), stopped to mingle with this group of people. They had a couple of drinks, and this guy states, he likes America, he likes the people. He wished he could dance like, the Americans. Laugh.

He states he had been fighting beside US troops over past 6-7 years. And this is why I feel I need to tell someone over here in the states a little something. He said he was from Norway. And he would be back in 3-4 months as a part of UN troops.

He said there was nothing he could do. But felt compelled that he needed to say something, just to let such good people know what is coming. He said that they were going to be going door to door taking guns, or shooting to kill. They already had the lists of names, and addresses.

I have no reason to not believe the words from acquaintance. It actually pretty much freaked him out. He is rather overwhelmed from the conversation. From his reaction, and as long as we've been acquainted, I have no reason not to believe what he was told. I just wanted to pass this on to someone with the means to possibly get the word out.

One of our observant readers from Texas [submitted a similar comment](#) recently. Via HCKS:

I just heard some really disturbing s*** about something going on in Texas down here. I am sorry but I cannot post it. All I can say is that Chinese soldiers have been inching their way closer to all the major cities including Houston, Woodlands, Conroe, and other major cities and our state government knows that we will be under attack between now and the next 3-4 months. A chi-com soldier just threatened someone that I know very well recently and he is not happy about the incident. When chi-coms are telling Americans in my state where they can go from where they can't go, then we have a BIG PROBLEM. All the military equipment is here in Texas, pre positioned during JADE HELM 15-16 and the soldiers have already been placed in our state and all they have to do is just go out, jump into the UN vehicles and roll out to the major highways, and deploy to neighborhoods. All over 2017 is when the civilians will be getting the worst of it. I know something is up because this link is matching up with what I am hearing. The UN and Chinese know already in advance that they will be rolling down Hwy 45, Hwy 290, 1960/Hwy 6 from 45 north to deploy to take out these area of subdivision, and one of the biggest major attacks by the UN, and chi-coms will take place between 1960-hwy6-south down to Sugar land. They plan to do the same thing on the Katy Mason rd area, hwy10 area. Good luck when you get to that area...We have a very, very serious situation on the horizon.

Now, on its face such claims may sound as if they are coming from the very fringes of the internet. And perhaps they are.

But before you dismiss these claims outright, keep in mind that it has been confirmed United Nations soldiers are actively involved in military training in the United States of America. Moreover, U.N. tank vehicles have been spotted moving across U.S. highways. The United Nations has even tried to hide the fact that their soldiers and equipment have been deployed to the U.S. as evidenced by the following images showing how they are covering up the logos on their vehicles.

While it's impossible to know exactly what the United Nations is planning in conjunction with sympathetic U.S. political leaders, we know for a fact that U.N troops are actively operating on our soil and their equipment is already here, laying dormant for whatever orders were to come down the pipeline.

As of the November 4, 2016 Paris Agreement, we are "NOW" Governed by the U.N.

By [MICHAEL ASTOR](#) Oct. 5, 2016

From this report <http://www.un.org/sustainabledevelopment/blog/2016/10/paris-climate-agreement-to-enter-into-force-on-4-november/> we read:

UNITED NATIONS (AP) — The landmark Paris agreement on climate change will enter into force on Nov. 4 2016, after a coalition of the world's largest polluters and small island nations threatened by rising seas pushed it past a key threshold on Wednesday.

President Barack Obama hailed the news as "a turning point for our planet," and U.N. Secretary-General Ban Ki-moon called the agreement's strong international support a "testament for the urgency of action." Katharine Hayhoe, a climate scientist at Texas Tech, called it: "A moment of bright hope in the increasingly discouraging landscape of climate science."

U.N. deputy spokesman Farhan Haq said late Wednesday that the European Union and 10 countries deposited their instruments of ratification on Wednesday. The percentage of emissions they account for topped the 55 percent threshold needed for the treaty to take effect, he said.

"I am delighted to announce that today the Paris Agreement will cross the second and final threshold needed for entry into force, and will enter into force on 4 November 2016," Ban said in a statement issued from Europe. "Global momentum for the Paris Agreement to enter into force in 2016 has been remarkable. What once seemed unthinkable is now unstoppable. "

Obama welcomed the news with a special address in the Rose Garden.

"Today, the world meets the moment," Obama said. "And if we follow through on the commitments that this Paris agreement embodies, history may well judge it as a turning point for our planet."

The Paris agreement commits rich and poor countries to take action to curb the rise in global temperatures that is melting glaciers, raising sea levels and shifting rainfall patterns. It requires governments to present national plans to reduce emissions to limit global temperature rise to well below 2 degrees Celsius (3.6 degrees Fahrenheit).

Democratic presidential candidate Hillary Clinton supports the accord, **while Republican Donald Trump opposes it.**

What this really means:

It appears most countries of the World as of Nov 4 have to submit to the UN control, AKA the New World Order when the Paris Climate Agreement takes effect on Nov. 4 2016, & this will be "ENFORCED" by UN troops.

But no citizens of any country voted for this, the elite gangsters wrote it up "WITHOUT" the 7 BILLION citizens of the World approving it.

A New World Global Order "IS" NOW IN PLACE!

Hidden in the agreement is the notion of POPULATION stabilization which is TO RESTRAIN POPULATION GROWTH. It is actually Operation Depopulation.

"AND WORSE YET": The UN has the RIGHT to move in and use force in each country to GO DOOR TO DOOR TO TAKE YOUR GUNS under the lie of the U.N. protecting mother GAIA & its citizens in times of unrest.

Obama Just Birthed Another Executive Order—Invasive "Humans" Dealt With! As World Economic Forum Drops Shocker!

Thursday, December 8, 2016 11:56

"Welcome to the year 2030. I own nothing, have no privacy, and life has never been better." Ida Auken, Member of Parliament, Denmark (World Economic Forum Website)

How about that! I bet you feel all gooey inside, don't you? Imagine a world that controls your every move, knows what you are going to do next, and in which you own nothing because it's all FREE!!! Sounds wonderful doesn't it? Well maybe if you're the one doing the controlling it does, but for the average every day person, it sounds like a living HELL!

Well this is exactly what the [World Economic Forum](#) is suggesting via Agenda

2030. A plan in which everyone works with no pay, because they get their payment through "FREE Services" (food transportation, shelter, etc). A plan in which everything you own belongs to everyone else; your clothes, your home, all of it! So if someone needs to use your space for business, no worries, they are welcome to it! This is socialism/communism at its finest. No need to be rich or earn a good living because everyone simply and

MINIMALLY get's their needs met... never mind the fact that you are dirt poor and the elite are dirty rich and control it all. Just take your vaccines, stop having children and comply, and they'll be good to you.

There are the times I just get so sick and tired of the garbage these globalists spew, **but unfortunately their plan is already underway via Agenda 2030, America 2050, DAVOS, the World Economic Forum, The United Nations, and multiple other globally minded groups.**

Most recently here in the U.S., the Obama administration signed another Executive Order which furthers the agenda you just heard above, called **Safeguarding The Nation From The Impacts of Invasive Species**. This EO further ensures the compliance of the **National Environmental Policy Act**, **the Act that calls attention to the HUMAN population problem:**

"The Congress recognizes the profound impact of man's activity on the interrelations of all components of the natural environment, **particularly the profound influences of population. growth, high-density urbanization, industrial expansion, resource exploitation, and new and expanding technological advances** and recognizes further the critical importance of restoring and maintaining environmental quality to the overall welfare and development of man, **declares that it is the continuing policy of the Federal Government, in cooperation with State and local governments, and other concerned public and private organizations, to use all practicable means and measures, including financial and technical assistance, in a manner calculated to foster and promote the general welfare, to create and maintain conditions under which man and nature can exist in productive harmony, and fulfill the social economic, and other requirements of present and future generations of Americans.**" [National Environmental Policy Act Section 101 \(a\)](#)
