Reformed Christian Wretch Comment Regarding My Information on Easter Says: I mean this with all respect but EVEN IF what you are saying is true, why would it be a bad thing to take an old pagan practice and transform it into a Christian reality?

Scott Johnson's Response: Because it was pagan from the beginning and never had a thing to do with the resurrection of Jesus Christ. In other words the modern-day celebration of Easter by Christians is based on a total lie. How could that ever be good? JOB 14:4 "Who can bring a clean thing out of an unclean? not one." The foundation of this pagan holiday was corrupted from the beginning and the

The man behind Academy of Divine Knowledge is Sacha Stone. He has quite a few alarming connections, to put it mildly.

According to Stone's biography, (see [archive](#) here), he has headed the UN Intergovernmental Renewable Energy Organization, or UN-IREO since 2010. However, it appears to have been expelled as a UN NGO in 2016, for failing to update its status.

To address the elephant in the room: it's a cause for concern when one of the main voices opposed to UN-WHO medical tyranny is also a part of the UN.

Stone also founded **Humanidad in 1999**, another NGO.

Humanidad "One World, One Humanity" is dedicated to inspiring tolerance and goodwill between people of all nations and faiths. It is committed to ushering in a new era of truth, transparency and right-mindedness whilst inspiring growth in the spiritual framework within which we function as a species.

USDA: 69% of total U.S. winter wheat production currently in drought zones... sharp decline in yields right around the corner--Most of the Great Plains except for eastern Oklahoma is seeing record drought conditions

Saturday, April 23, 2022 ([Natural News](#)) Only 32 percent of the winter wheat crop in the United States received a “good” or “excellent” rating from the U.S.

Department of Agriculture (USDA), [new reports show](#).

While this represents a slight increase of two points compared to a week ago, the figure is far behind 2021’s 53 percent rating, **illustrating just how bad America’s wheat crop is due to persistent drought conditions in many areas.**

According to the USDA, a whopping 69 percent of total U.S. winter wheat production is currently in a drought, including hard-red winter, soft-red winter, and soft white.

This includes 82 percent of all wheat production in both Kansas and Colorado, as well as 99 percent in both Texas and Montana.

Pattern of fires striking food facilities across the USA suggests ARSON TEAMS are burning down America’s food production infrastructure

Friday, April 22, 2022 by: [Mike Adams](#) ([Natural News](#)) A pattern of fires striking food facilities across the United States suggests that arson team are targeting food facilities for destruction. This theory, if confirmed, is consistent with other engineered tactics now being deployed to destroy food abundance in America:

- The [partial halting of grain and fertilizer deliveries by Union Pacific railroad](#), which is largely owned by Blackrock and Vanguard investment funds.
- The mass culling of chickens and turkeys, using fraudulent PCR testing to claim there’s another “bird flu epidemic” that requires the mass destruction of egg-producing chickens (and other birds used for meat).
- The government paying farmers to plow their crops under, effectively incentivizing the destruction of the food supply.

- Joe Biden's dismantling of America's energy infrastructure (pipelines, drilling, etc.) which directly impacts agriculture, creating vastly increased prices for farming inputs such as fuel and fertilizer.

HHS Secretary confirms covid vaccines are killing BLACKS AND LATINOS "at about two times the rate of white Americans" ... ethnic cleansing via VAX?

The head of the U.S. Department of Health and Human Services (HHS) under Joe Biden [has claimed](#) that vaccines are killing people with dark skin at a much higher rate than people with light skin.

Speaking at a digital "White House Convening on Equity" seminar on April 14, Xavier Becerra casually blurted out that he thinks non-whites are suffering from more deadly vaccine side effects than white people.

"By the way, we know that vaccines are killing people of color – blacks, Latinos, indigenous people – at about two times the rate of white Americans," Becerra said.

He then went on to talk about how the government needs to "work" much harder to get more people injected.

1000% Increase in Vaccine Deaths and Injuries Following Pfizer COVID-19 EUA Vaccine for 5 to 11 Year Olds

Pfizer announced this week that they were asking the FDA to issue an emergency use authorization (EUA) for a "booster" COVID-19 vaccine for children between the ages of 5 and 11. [\(Source.\)](#)

The FDA issued an EUA for the first Pfizer COVID-19 shots for this age group of children in October of 2021. [\(Source.\)](#)

At the time, a doctor on the FDA Advisory Committee deliberating on whether or not an EUA should be given for this age group, stated that the only way to find out if the Pfizer COVID-19 vaccines were safe for this age group was to start injecting them with it.

“We’re never gonna learn about how safe the vaccine is until we start giving it, and that’s just the way it goes.”

So now that we have almost 6 months of data since the first EUA was issued for this age group to be injected with Pfizer’s COVID-19 shots, just how safe is it? So far over 10,000 cases have been filed to VAERS (*Vaccine Adverse Event Reporting System*) of deaths and injuries among children in this age group following the experimental COVID-19 vaccines. ([Source.](#))

By way of contrast, there have been 939 cases of vaccine adverse events during this same time period for all of the FDA approved vaccines for children in this age group. ([Source.](#))

That means there has been an increase of over 1000% of vaccine injuries and deaths for this age group following the COVID-19 vaccines.

[FDA Springs Into Action Over 100 Reports Of ‘Lucky Charms’ Cereal Poisoning, But What About The One Million Plus Reports Of Adverse Vaccine Reactions?](#)

The U.S. Food and Drug Administration (FDA) announced Monday it is investigating 100 reports of people becoming sick after eating Lucky Charms breakfast cereal, but what about over one million vaccine adverse reactions that have been reported through the VAERS website?

The FDA, the federal Food and Drug Administration, has sprung into action over recent reports of people feeling sick after eating the very popular [‘Lucky Charms’](#) cereal recently, and are vowing a full investigation into the situation. I am thankful we have a board watching over these things, I truly am, but it begs the question of: what about the 1,226,312 adverse reactions reported to the VAERS site over vaccine reactions? Is cereal *really* more important?

You would think with over [1.2](#) million reports, that would be a pretty good indication that *something* was wrong, right? So, in what brand of math does 100 reports of adverse reaction to a breakfast cereal prompt swift action, but over a million reports of adverse reaction to a vaccine does not?
