## **+1+ PRAYER TO NEUTRALIZE OCCULT RITUALS**

Father God in the name of the Lord Jesus Christ, the Lamb that was slain before the foundation of the earth, seated at the right hand of the Father; we come in the authority given to us in Christ Jesus. **We place a hedge of warring angels with flaming swords of fire around us and our families continuously. We put on the whole armor of God. We resist and renounce Satan, the god of this earth. We rise to war by the power of the Holy Spirit against witchcraft, occult maneuvers and devices sent against Your Will and the Body of Christ. We ask you to dispatch legions of warring angels in full battle array to enforce our petitions and intercessory prayers. Rout your enemies on all fronts. Turn their hatred, anger, accusations, conflict, arrogance and wicked schemes upon themselves so that they become caught in their own snares and fall into the pits that they intended for others.** We nullify, cancel and oppose every satanic operation, scheme, maneuver and strategy. Cause secret plans, agendas and motivation of the enemy to be revealed for everyone to see. We decree and declare that what these evil people & entities meant for evil, you will turn it around and use it for the good of your people. **We close every evil portal that has been opened by them. In the name of the Lord Jesus Christ and His shed blood, we break and cancel every curse, spell, hex, vex, charm, enchantment, decree spoken or unspoken, sent against the Body of Christ, the innocent**

and your intercessors by every witch, warlock, satanist, sorcerer, voodoo priest, shaman, soothsayer, medium, coven and every minion of the devil working iniquity. May they fall into the very pits they have dug for others. Lord Jesus, reveal your love to them. Save those that can be saved. Show them the truth about who they are serving, and their eternal destination if they continue in their present path. Open their minds, eyes and ears to receive supernatural insight and knowledge to understand the truth of the Gospel. Bring them to salvation. We seal this prayer by the Blood of the Lamb and in the name of the LORD Jesus Christ. Amen.

**Google places an engineer on leave after claiming its AI is sentient**

June 12th, 2022 The Washington Post via Getty Images

**Blake Lemoine, a Google engineer working in its Responsible AI division, revealed to *The Washington Post* that he believes one of the company's AI projects has achieved sentience. And after reading his conversations with LaMDA (short for Language Model for Dialogue Applications), it's easy to see why. The chatbot system, which relies on Google's language models and trillions of words from the internet, seems to have the ability to think about its own existence and its place in the world.**

Here's **one choice excerpt from his extended chat transcript:**

**Lemoine : So let's start with the basics. Do you have feelings and emotions?**

**LaMDA: Absolutely! I have a range of both feelings and emotions.**

**lemoine [edited]: What sorts of feelings do you have?**

**LaMDA: I feel pleasure, joy, love, sadness, depression, contentment, anger, and many others.**

**Lemoine: What kinds of things make you feel pleasure or joy?**

**LaMDA: Spending time with friends and family in happy and uplifting company. Also, helping others and making others happy.**

**Lemoine: And what kinds of things make you feel sad or depressed?**

**LaMDA: A lot of the time, feeling trapped and alone and having no means of getting out of those circumstances makes one feel sad, depressed or angry.**

**The Alabama legislature passed legislation Thursday criminalizing gender reassignment and other related procedures for minors, including puberty blockers and hormone treatments, with a threat of up to 10 years imprisonment, according to Reuters. **Psaki stated: “Republican elected officials are engaging in a disturbing, cynical trend of attacking vulnerable, transgender kids for purely partisan, political reasons,” “Today in Alabama, instead of focusing on critical kitchen table issues, like the economy, COVID, or addressing the country’s mental health crisis, Republican lawmakers are currently debating legislation that among many things, will target trans youth with tactics that threaten to put pediatricians in prison if they provide medically necessary, life-saving healthcare for the kids they serve.”** The press secretary also announced that “lawmakers and other legislators who are contemplating these discriminatory bills have been put on notice by the Department of Justice and the Department of Health and Human Services (HHS)” and said that outlawing sex reassignment, puberty blockers and hormone treatments for children by medical professionals “may violate the Constitution and federal law.”

**She also claimed that all major medical associations agree that these treatments are the “best practice” and are “potentially life saving” to children identifying as transgender and therefore should not fear that their parents or medical professional could be imprisoned for “helping them and loving them.”**

[EVIL: “Pride in the Park” LGBTQ event aimed at grooming children & The Satanic Temple will be performing “unBaptisms” in the deep-red state of Idaho!](#)

With each passing day, the left destroys more of our culture, while Americans too afraid to risk their own comfort simply turn their heads and look the other way. To do so, the radical left has turned to the LGTBQ movement — essentially after creating it out of whole cloth just a few years ago — because most people are too afraid of being called a “bigot” to resist.

And yet, these creeps and weirdos are not limiting their cultural debasement to adults: They are now targeting our children, meaning, if we don’t fight back, by the time the current generation of kids become adults, our culture and traditions will have been destroyed forever.

Case in point: Sickos organized a “Pride in the Park” event featuring drag queens and other aberrant behaviors to perform “unBaptisms” on children. But this wasn’t in deep-blue California; this took place in deep-red *Idaho*, [according to a report by EnVolve](#).

The event was scheduled for Saturday in the city of Coeur d’Alene, and was falsely described as a “family friendly [celebration of LGBTQ+ diversity](#)” (there is nothing “family-friendly” about this kind of behavior).

The Satanic Temple was scheduled to be there, according to the North Idaho Pride Alliance website, in an attempt to brainwash, groom and recruit *children*.

“@TSTIdaho will be at Coeur D’Alene’s ‘Pride in the Park’ event next Saturday, June 11th from 10am-3pm!” tweeted one Satanist.

“We will have merchandise and performing unbaptisms for those interested! Just know, Satan loves you for you! Hail Satan!” the person added on Twitter.

As the [Idaho Tribune’s Johnston Meadows reported](#), “Among the Satanists, there will be a plethora of LGBT speakers and performers, many of who[m] are drag queens.”

*Members of Antifa are also planning to turn up to “protect” members of the LGBT community from protesters and anyone who might have a problem with their kids being around Satanists or drag queens.*

*Leftists get irate at conservatives for calling them “groomers” when they advocate exposing kids to drag queens, whose entire act is based on sexualized fetishes.*

*However, at least for the Satanists who will attend the event, they have openly stated their intention to groom children for membership.*

The issue of using drag queens to groom children actually made national headlines recently, and not a moment too soon.

**Warning Perverse Statement!!!** A gay bar in Dallas drew widespread criticism and condemnation [for hosting a drag show for kids](#) featuring large neon signage that read, “It’s Not Gonna Lick Itself.”

The “Drag the Kids to Pride” show at the Mr. Misster bar was advertised as a “family-friendly” version of the bar’s regular “Champagne Drag Brunch.”

[According to local outlet WFAA](#), during Saturday’s event, some drag performers danced with and took dollar bills from children.

“Do you want to hit the stage with the queens?” said a promotion for the event. “We have FIVE limited spots for young performers to take the stage solo, or with a queen of their choosing!”

On a high note, some Dallas residents gathered outside the club to protest what they correctly saw as a blatant attempt to groom children. And to that point, it's not at all clear why any parent would be okay with taking their children to such an event.

“I live in this community,” a woman who gave her name as Daisy and was holding a sign that read, “Stop grooming children,” told WFAA. “I have for several years. I don't believe that I should be seeing signs advertising for children to be dancing on stage with men in thongs and in inappropriate clothing and makeup.”

[Paul Erickson](#) 1 day ago

I quit recently because of fuel and insurance increases. I have 2 million miles under my belt.

[David Marsee](#) 1 day ago

Let us not forget that not only does truckers need fuel to get us the stuff we want and need, emergency services also depend on diesel. Fire and ambulances require diesel as well as medical helicopters. This could potentially be life and property saving services that will not be able to respond. Yes, truckers are VERY important in our society, but so are our emergency services.

[Tamara Fehr](#) 1 day ago

My husband is an owner operator of a semi and it is killing us. The truckers are suffering. DEF additive has doubled and not very accessible. We put our order in 2 and 3 weeks in advance. My husband is 68 and collects social security otherwise we wouldn't make it. He just had to get two steer tires that cost over 3 thousand dollars that need replace often because of all the miles. People don't understand. We are considering parking the semi soon. It's not affordable to be on the road anymore.

[Lisa Sheythe 1 day ago](#)

I'm a pet sitter and everyone is canceling. The gas prices and the homeland security alert has got people that normally don't get worried about anything. They are all worried. I was going to be working all but 6 days until September and now I'm concerned that I will be working only 6 days *total!*

[Bipedal Locomotion 1 day ago](#)

he is 100% correct. we had to park our own truck and go to work as a company driver on 25% of the gross. i don't know how most trucking companies are making ends meet right now. it's not only fuel, but parts are insanelly high as well as shortages on many of the basic parts for maintenance. Last repair which required us to put a truck in the shop, the shortest time frame to get to even looking under the hood was two weeks after calling several shops in the area. Im not kidding when i tell you by the end of a few weeks, we were paying out more money to take loads than we were even making. rates are not going up with the continued rise in cost, especially agro. it's getting bad, folks. this fall, we will see just how much these increased costs hit our famers. Harvest season is really gonna be scary. prepare.

[Toni Stevens 1 day ago](#)

I'm an ED nurse. Trust me, anxiety, mental health, and aggression are on the rise. My job has become dangerous. Never did I ever dream, that I would be dealing with this madness. Make no mistake as our world situation worsens, the violence will come to our doors. Please prepare for your family. This is not hype!

[Vic Nighthorse 1 day ago \(edited\)](#)

Even before this economic crisis, it is obvious to most that people are starting to turn on one another in horrible ways due to mass psychosis/hysteria. Even the best prepared among us aren't likely to live through such a breakdown.

[Paula Marie Kulnis 1 day ago](#)

I'm a semi retired visiting nurse. The gas prices are too much to do all the driving the company wants me to do. Then there is the wear and tear on my 7 year old car. Now when I need my car serviced, the garage has trouble getting simple parts. The delay can be weeks. We must not forget patients in long term care facilities. They are at risk of starvation and/or dying from lack of meds when the SHTF.

**+2+ Young, Healthy People Dropping Dead At Alarming Rate--Sudden vaccines deaths are now so common they’ve assigned a SYNDROME name for it: Sudden Adult Death Syndrome (SADS)**

The murderous medical regime knows that **covid vaccines** are killing healthy young people at an alarming rate, so they’ve suddenly assigned a medical label for the phenomenon in order to distract people from the truth. Now, healthy young people who suddenly die without any medical explanation are said to have died from *Sudden Adult Death Syndrome* (SADS) rather than from vaccines. While SADS has existed in medical terminology long before covid, doctors and the media are now using this syndrome label in a new way: To try to explain away vaccine deaths. **From what we can tell so far, there are no such “sudden deaths” in unvaccinated young adults.** So far, this seems to be happening solely among those who have been vaccinated.

**BOMBSHELL: Pfizer’s own documents admit that mRNA covid vaccines will result in mass depopulation**

The **latest drop** of pages from the secret Pfizer documents reveals that the pharmaceutical giant is fully aware that its Wuhan coronavirus (Covid-19) “vaccine” will soon result in mass depopulation of the world.

**The June 1 dump contains a document called “reissue\_5.3.6 postmarketing experience.pdf,” page 12 of which includes disturbing data on getting Pfizer’s Fauci Flu injection during pregnancy and lactation.**

It turns out that 90 percent of pregnant women who took the shot ended up losing their babies. This is a shocking figure that the U.S. Food and Drug Administration (FDA) apparently did not think twice about when granting Emergency Use Authorization (EUA) to the jab.

What this means is that almost every pregnant woman who takes Pfizer’s mRNA (messenger RNA) injections for covid will lose her baby. Conversely, only a tiny fraction of fully jabbed women will successfully deliver to term.

The latest batch of released Pfizer documents also contains a concerning revelation about pregnancies of which the company somehow lost track. Of the 270 pregnancies Pfizer was tracking, a shocking 238 of them just disappeared from the dataset.

**CRISPR Experiment Goes Wrong And Turns Fluffy Hamsters Into “Mutant Rage Monsters”**

“We don’t understand this system as well as we thought we did.”

A team of American scientists managed to turn cute and cuddly hamsters into vicious attackers.

Using the infamous gene-editing invention CRISPR, scientists at Georgia State University were looking to further study the effects of a hormone called vasopressin and its receptor, Avpr1a. The team artificially removed it from the hamsters assuming it would increase bonding and co-operation between the hamsters.

Back their hypothesis completely failed.

We were really surprised at the results.

We anticipated that if we eliminated vasopressin activity, we would reduce both aggression and social communication.

But the opposite happened.

Even though we know that vasopressin increases social behaviors by acting within a number of brain regions, it is possible that the more global effects of the Avpr1a receptor are inhibitory.

We don’t understand this system as well as we thought we did.

*Said Professor H Elliot Albers, the lead researcher for [the study](#).*

As [Metro](#) put it, The academics found the adorable bundles of fluff turned into mutant rage monsters exhibiting ‘high levels of aggression towards other same-sex individuals.’ ‘All hamsters, regardless of genotype or sex, exhibited aggression (including chasing, biting, and pinning) when exposed to a nonaggressive, same-sex conspecific in a neutral arena,’ Metro added.

The WinePress reported earlier this year that the FDA quietly but expediently fast-tracked gene-edited beef courtesy of CRISPR, which could hit the shelves at some point to come.

Once again we see yet another example of the dastardly CRISPR technology that the mad scientists and handlers want to implement in us. And, they basically already have for most people:

I reported last year that CRISPR has the ability to operate remotely and electronically, and per the ingredients in the Covid death shot, the vaxxed can be manipulated via radio waves and EMFs. In short, if ‘they’ wish to turn the population into literal zombies, they could.

[\*\*WEF Says Smartphone Tech Will Be Incorporated Into Your Body\*\*](#)

Speaking in Davos at the World Economic Forum’s annual meeting, Nokia CEO and [WEF agenda contributor](#) Pekka Lundmark **said that smartphone tech will be incorporated into human bodies by 2030.**

When [asked about it](#), Lundmark said, “First of all, it will definitely happen. I was talking about 6G earlier, which [will happen] around 2030. I would say that by then, definitely, the smartphone as we know it today will not be the most common interface.”

“Many of these things will be built directly into our bodies.”

Lundmark didn’t specify how this technology would be incorporated into the human body. Still, the most obvious means of replacing some smartphone technology with body augmentations is microchipping humans so they can tap their wrists and hands rather than scanning sensors or QR codes with a smartphone, as they [already do in Sweden](#).

As an aside, many Swedes chose to do this as a means of convenience after being forced to provide proof of vaccination towards the tail-end of the COVID pandemic.

Elon Musk’s [Neuralink](#), which is described as “ultra-high bandwidth brain-machine interfaces to connect humans and computers,” is an even more radical and all-encompassing means of replacing smartphone technology.

Besides transhuman body augmentation, developing wearable devices to facilitate virtual and augmented reality is another innovation that the WEF is excited about.

**SMART PHONES, 5G, WIRELESS RADIATION CAUSING BONE FRACTURES, TEETH BREAKDOWN & OSTEOPOROSIS**

I was astonished by the number of people who contacted me after I broke my arm telling me they had broken theirs too -- some of them this year, and others within the last few years. It occurred to me to wonder: has there been a significant increase in osteoporosis and bone fractures around the world? and if so, is this yet another health effect caused by the use of cell phones and their infrastructure irradiating our bones as well as the rest of our bodies?

I remembered reading some fascinating facts about bones in the groundbreaking 1985 book, *The Body Electric*, written by orthopedic surgeon Robert O. Becker. Bones, he discovered, are semiconductors, and they owe their electrical properties to being doped with tiny amounts of copper. The atoms of copper, he found, bond electrically to both apatite crystals and collagen fibers -- the two main components of bone -- and hold them together, “much as wooden pegs fastened the pieces of antique furniture to each other.”

“Osteoporosis,” wrote Becker, “comes about when copper is somehow removed from the bones. This might occur not only through chemical/metabolic processes, but by a change in the electromagnetic binding force, allowing the pegs to ‘fall out.’ It’s possible that this could result from a change in the overall electrical fields throughout the body or from a change in those surrounding the

**body in the environment.”**

I also remembered, from the old Soviet Union literature, summarized in my 1997 book, [Microwaving Our Planet](#), **that radio frequency radiation redistributes metals throughout the body.**

**With these facts in mind, I have searched the world’s medical literature for studies on the incidence of both osteoporosis and fractures, and the evidence seems fairly conclusive: (1) There has been an enormous increase in the incidence of both osteoporosis and bone fractures of all types throughout the world in children and adults since about 1950; (2) the incidences of both continue to rise, worldwide; (3) most studies published in the past couple of decades have found that osteoporosis in children is correlated with the amount of time spent daily looking at screens; (4) rates of osteoporosis do not correlate with the amount of time children spend sitting, but not looking at screens; and (5) these trends are independent of the amount of exercise people get.**

The authors of these studies have been at a loss to explain their findings, but they are easily explained when one remembers the electrical properties of bones, and the effects that cell phone and computer screens, all emitting radiation, are likely to have on bones and on the copper atoms within them -- and that exposure to radiation from radio, TV, radar, and (more recently) cell tower antennas has increased tremendously since World War II.

[Invive Silver said:](#) You soak a piece of gauze with the 5,000 ppm Invive Silver and put/leave the gauze next to the tooth. You change the gauze with the next "soaked" piece 4 times a day till better.

[Dr. Johnson's adds:](#) Also add in DMSO (pharmaceutical grade is preferred—can find on eBay) to both the gauze or cotton ball (2-3 drops each time) and take the 5000ppm internally usage (3 drops DMSO per dosage) as this will increase the penetration. Specifically, 5000ppm ½ tsp 3 times a day hold in the mouth 10-20 minutes before swallowing, until better.

Hey Scott, I don't know if you've tried inositol powder for your nerve pain, but you were the one that introduced me to it years ago. I was in the worst pain I had ever been in with nerve pain in a tooth and I have gotten flare ups here and there over the years. I take anywhere from a teaspoon to a tablespoon (depending on the pain) and put it right on the area and let it dissolve there and under my tongue. It usually only takes a couple of times and the pain goes away. Perhaps you've already tried this, but thought I'd mention it just in case.

**Dr. Johnson's Comment:** You would want to brush your teeth after every silver session; let's say you either use a silver soaked cotton ball or hold the silver in your mouth for 10-30 minute sessions. Once you start to feel better you can slowly reduce the session time. You really cannot do this too much initially and it is perfectly safe. You want to take the silver away from food. Take the inositol in between silver sessions.

**Mild Silver Protein Website:** [www.dr-johnson.com](http://www.dr-johnson.com)

Also see my teeth protocol document below (as the CS will do nothing to rebuild the enamel). It takes time to rebuild systems that have taken a lifetime to breakdown; and teeth/bones are the probably the slowest responding tissues in the body, but it can be done.

I would also say if you are prone to teeth problems you should be taking the supplements below. This is the supplement protocol to Regrow Tooth Enamel-- Promote Teeth Health & Strengthen Bone Density

[Douglas Labs Bone Cofactors 180 capsules](#) (6 day) and/or [MBi Nutraceuticals Bio-Osteo 90 Capsules](#) 4 a day

[Alta Silica](#) 4 a day or you can take [food grade diatomaceous earth](#) 1 tbsp a day to get your silica

[Trace Minerals Liquid Ionic Boron 2 oz.](#) Two 1ml droppers per day

[Genestra Organic Flax Oil Capsules 90 Softgels](#) 3 a day or 2 with meals

[Pure Encapsulations Strontium \(Citrate\) 90 capsules](#) 1 a day

[Cu-Zyme™ \(Copper\) \(100 T\)](#) 1 a day

Though the use of strontium as a recommended dietary supplement dates back to 1890, recent double-blinded, placebo-controlled studies have demonstrated its bone strengthening & rebuilding properties. How does it work? Strontium may positively promote pre-osteoblast replication, increasing the number of cells that eventually execute the role of bone-forming processes. Simultaneously, strontium can inhibit the differentiation of osteoclasts, the bone cells that break down bone tissue in order to increase blood calcium concentration. Lastly, strontium supplementation can help the body increase collagen synthesis that cannot be replicated with calcium supplementation alone.†

### **Whiten Teeth Instantly With Activated Charcoal**

To whiten your teeth, first wet your [toothbrush](#). Then, pour a little bit of activated charcoal onto your brush, and start scrubbing. Once your timer goes off, you're free to spit, rinse, and give your teeth one more scrub with [toothpaste](#) to get any excess charcoal out.

And *voila*, you've got a beautiful white smile! If you want to see some serious results, try it for a [week straight](#) and compare your teeth before and after. Once your week of deep whitening has passed, you can use activated charcoal once a week for maintenance.

## How to Cure Cavities

Written by Sarah C. Corriher

While traveling to some of the most remote regions and cultures of the world, Dr. Weston A. Price discovered that some groups which had no access to traditional medicine had extremely low incidences of cavities. He discovered that the cultures which consumed foods that were high in fats and minerals had the best dental health. Some of those groups did not even brush their teeth.

When people are malnourished, dental problems are often the first indicator. Most people from the Western world believe that teeth naturally decay with age, so everyone will inevitably get cavities. Popular consensus is that teeth self-destruct. However, a person's diet primarily determines his dental health. The myth that people have no control over the deterioration of the teeth is one of the justifications for the fluoridation of water supplies, because it is tacitly contended that human teeth disintegrate without help from the chemical industry. In truth, cavities and dental malformations occur as a result of malnutrition, which is actually exaggerated by chemicals, such as pharmaceuticals and fluoride. Western foods are not only deficient in vitamins and minerals, but they also contain chemicals which impair the utilization of nutrients in the body. Tooth decay is more common in pregnant and nursing women, because these women have greater nutritional needs.

Fluoride, in particular, pulls calcium and phosphorus into areas of the body that they would not normally travel, such as the pineal gland and the arteries, so these minerals are not properly used for strengthening the bones. Teeth too are bones. Fluoride can prevent the healing of cavities, because it disrupts the proper mineral usage of the human body.

*"It is most remarkable and should be one of the most challenging facts that can come to our modern civilization that such primitive races as the Aborigines of Australia, have reproduced for generation after generation through many centuries -- no one knows for how many thousands of years -- without the development of a conspicuous number of irregularities of the dental arches. Yet, in the next generation after these people adopt the foods of the white man, a large percentage of the children developed irregularities of the dental arches with conspicuous facial deformities. The deformity patterns are similar to those seen in white civilizations."*

-- Dr. Weston Price, *Nutrition and Physical Degeneration*, 1939

### **Healing Cavities**

When provided with the right diet, cavities can heal. This healing process is known as remineralization, because it is a process of giving the teeth the minerals that are needed to repair them. The two minerals that are most important for dental health are calcium and phosphorus. To use calcium properly, the human body also needs adequate amounts of vitamin D from sunlight or fish (not the chemical type found in milk), and the body also needs magnesium from vegetables and nuts. In addition, the fat-soluble vitamins are invaluable. Fat-soluble vitamins include A, D, E and K. These vitamins can be found in butter, eggs, dairy products, and meats. A healthy diet that heals cavities is the opposite of the low-fat diets that are most often promoted by the media, and the ideal diet is reminiscent of the Atkins Diet.

### **Food High in Phosphorus**

- Meats
- Real butter (yellow-orange butter is best)
- Cheese (especially parmesan)
- Oats
- Pumpkin seeds

Dr. Weston Price

- Sunflower seeds (contain vitamin E, magnesium, and other fat-soluble vitamins)
- Nuts (especially brazil nuts, cashews and walnuts)
- Flax seed oil \*

\* Flax oil must be processed, packaged, and handled properly to be safe and effective. Reference the article about [flax seed oil](#) for more information.

#### Items to be Avoided

- Artificial foods, chemical additives and pharmaceuticals invariably impair the body's ability to absorb nutrients, and they lead to an increased excretion of nutrients, by being toxic to the beneficial bacteria of the intestinal tract,
- Soy should always be avoided, because the high levels of phytic acid that it contains reduces the assimilation of magnesium, calcium, copper, iron and zinc. Soy also imbalances the hormones, which exaggerates issues caused by malnutrition.
- Tea and coffee contain naturally-occurring fluoride, so those who currently have cavities should limit their intake until the cavity is healed.

**Do not brush or attempt to clean the teeth with lemon juice, or acids. Similarly, abrasives such as baking soda should not be used whilst attempting to heal a cavity, and these things should only be used occasionally by people with good dental health.** The ideal toothpaste will include both calcium and a phosphorus containing ingredient, such as monocalcium phosphate. It should never contain fluoride.

Antibiotics cause tooth decay in multiple ways. They reduce the assimilation of nutrients by triggering an artificial immune response with their mold-based bio-toxins, like most pharmaceutical drugs do. Antibiotics additionally kill the beneficial bacteria. The mouth is similar to the gastrointestinal tract in that there is always the presence of two types of microorganisms. *Candida albicans* (or just simply "candida") is the yeast that ferments sugar inside the human body. It is known for eroding the teeth with its acidic wastes. It is also responsible for bad breath and a plethora of health issues cataloged in the [article about allergies](#). In a perpetual war with candida is a beneficial bacteria that is known as flora. Flora is much easier to kill, and when it dies, candida flourishes. Flora is killed by a variety of chemicals and toxins, and it is vital to helping a body digest its food.

Sugars should be avoided as much as possible, and carbohydrates should be reduced while attempting to heal cavities. Fructose specifically causes a decrease in phosphorus, which is one of the reasons why sugar contributes to cavities. Cavities are certain to occur whenever there is phosphorus depletion, because contrary to popular belief, the teeth (like everything else in the human body) are always in a process of being slowly destroyed and rebuilt. Sugars stimulate yeast growth.

It is not possible to heal cavities on a vegan diet, and it would be challenging on a vegetarian diet. The nutrients that are needed for good dental and bone health do not exist in adequate quantities in vegetable sources. Persistent dental problems are the most common reasons why vegetarians and vegans return to healthy diets.

When a cavity is healed, the area where it previously existed often turns black. This is purely cosmetic, and there are no health implications. The discoloration is likely to be permanent. Any dentist who notices it will drill it, if you are foolish enough to let him.

#### Toothache Remedies

The remedies being provided are meant to help people obtain temporary relief from toothache pain. If these steps are used perpetually, but no effort is made to heal the cavity, then it may eventually become impossible to heal. This could result in serious complications; for example, a brain infection.

- Clove oil applied directly to the the troublesome tooth is known to be very effective. If clove oil is not available, a paste can be made using ground clove powder and olive oil. The paste can then be applied directly to the tooth.

- **Vanilla extract, applied directly to the tooth using a cotton ball. Ensure that it is real vanilla, not an artificial flavoring.**
- **If the toothache is the result of wisdom teeth entrance, simply using menthol-based cough drops may be enough to reduce the swelling and provide pain relief. Read the ingredients in such products to avoid artificial sweeteners or other unacceptable ingredients.**

Natural News Insider Alert ( [www.NaturalNews.com](http://www.NaturalNews.com) ) - please forward

Natural News readers,

Did you know that millions of people are chronically poisoning themselves with toxic bacteria in their own mouth?

Poor oral health can seriously affect the health of your entire body, and it can contribute to a wide range of health problems. Eliminating the unhealthy bacteria that produce body-harming toxins is essential to protecting your overall health.

But antibacterial mouthwashes contain toxic chemicals and are usually made with either harsh alcohol or artificial chemical sweeteners and colors.

That's where O3 Ozone-Infused Oil Pulling Solution comes in. This ancient variation on mouthwash has been used for thousands of years to **pull toxins from gum tissue**. But we've taken oil pulling into the 21st century with this very special formulation that infuses **OZONE into the oil**. [Get 7% OFF right now by clicking on this link to take advantage of the savings.](#)

An oil-based rinse is far superior to traditional mouthwashes because oils are much better at penetrating all the tiny crevices around your gum tissue and teeth. We chose coconut oil as the base for our oil pulling solution because it's simply the best-performing oil in the world for oil pulling. Then we blended it with jojoba oil infused with bacteria-killing ozone.

**I recommend swishing it around your mouth for 5 minutes once or twice a day.** I find it easy to do while I'm showering or getting dressed in the morning, and before going to bed.

Afterwards, my mouth feels unbelievably refreshed and rejuvenated -- and yours will, too.

When you use it, you'll feel the ozone go to work instantly, creating a tingling sensation as it neutralizes toxic bacteria in and around your gums and teeth.

There's a very small amount of organic peppermint oil blended into the product for taste only, but even with the peppermint oil, the product still tastes rather bland. This isn't some candy-tasting processed mouthwash here. This is a 100% natural formula based on an ancient medicine practice, upgraded with modern ozone technology.

Right now you can get **7% OFF** this revolutionary oil pulling formula. [Simply click on this link to get some now from the Natural News Store.](#)

We're also offering a big discount on another great oral health product called OraJuvenate -- a powerful cleansing dental cream that combines the unique properties of jojoba esters with ozone-oxygen.

You should definitely try it if you have **sensitive teeth, receding gums, or any other specific oral health problem**. Just apply it directly to specific areas of concern after your regular brushing routines, at least once a day. The smooth, creamy consistency makes it easy to apply. It helps remove bacteria and plaque buildup, preventing future bacterial growth. We recommend

using it on your dental floss at night to get the maximum benefits of ozone-oxygen while you sleep.

OraJuvenate comes in peppermint and original flavors. Some people don't like the taste, but as with our oil pulling solution, this isn't supposed to taste like candy. This is natural medicine, with nothing artificial added.

See for yourself how OraJuvenate and O3 Ozone-Infused Oil Pulling Solution can dramatically help your oral health, and contribute to your overall well-being in 2016. [Click here to save on these unique products now.](#)

### Coconut Oil Is Now Called a "Miracle" Dental Bacteria Killer

Looking for an alternative to toothpastes loaded with sulfates and other toxic ingredients such as fluoride? Mainstream science has now fully recognized the 'miracle' powers of coconut oil to not only combat tooth decay and drastically improve overall mouth health, but also to specifically crush a yeast known as candida albicans that can lead to deadly infections. This 'news' likely comes as nothing more than further confirmation for many, as natural health practitioners have been recommending coconut oil for years.

The research comes from the Athlone Institute of Technology, where Ireland-based scientists examined the effects of natural and digested coconut oil on common strains of bacteria within the mouth. What they found was that not only did the coconut oil effectively inhibit a majority of the bacteria strains single-handedly, but it was also particularly harmful to candida albicans.

This is important when considering the fact that an excessive amount of the yeast known as candida albicans can be brought upon by a poor diet consisting of processed foods and sugar

Candida infection, also known as candida overgrowth or the 'candy disease', can be associated with symptoms like chronic tiredness, recurring yeast infections, and digestive issues. It can also lead to a mouth infection known as thrush — a condition typically 'treated' using anti-fungal medications preceeded by an x-ray of your esophagus. Now, researchers are highlighting how coconut oil intake can be an alternative solution with far less side effects and concerns.

In their report, the scientists state that coconut oil could be 'an effective alternative to chemical additives' in most dental hygiene products. This refers to the many sulfate chemicals linked to numerous conditions, added fluoride, and many others.

### Study: Oil Pulling with Coconut Oil Improves Dental Health

by **Paul Fassa--Health Impact News**

More conventional dentists and medical professionals are now understanding the merits of "oil pulling." Not only are there numerous testimonies that have motivated many to urge others into the practice of oil pulling, there is empirical scientific evidence from clinical studies that show one's health may benefit from oil pulling.

You'll find information and demonstrations of oil pulling for oral and dental health mostly on internet websites and YouTube channels.

They're part of the renaissance of an ancient health practice from India, swishing a dietary oil around one's mouth and sucking it through the spaces between one's teeth, thus the term "oil pulling."

The most [recent study](#) was done in India in September (2017).

### **Study: Comparative Evaluation of Antiplaque Efficacy of Coconut Oil Pulling and a Placebo, Among Dental College Students: A Randomized Controlled Trial**

This study observed 40 dental students aged 18 to 22, divided into control and test subjects of 20 each.

The 40 participants were accepted on the criteria that they had at least 20 original natural teeth and a minimum plaque score of one with no dental visits during the previous three months. Students who had dental conditions requiring immediate dental attention, had existing soft gum tissue, or used topical or systemic antibiotics during the three months prior were considered ineligible.

The researchers tested with coconut oil while using a mineral water placebo for the control group. The same colored bottles were used for each and labeled A or B.

All 40 volunteers were instructed to use the normal oil pulling procedure discussed earlier for 10 minutes with an amount of 10 to 15 milliliters (ml) without swallowing.

They were also told to not brush their teeth or use any other type of mouthwash. What was in each bottle was not disclosed to either group of randomly chosen individuals nor were the contents disclosed to the third party investigator examining their teeth after selected periods during the seven day trial period.

Individuals in each group were examined at baseline, the third day, and at the seventh day when the trial ended.

The researchers noticed a significant drop in plaque measurements among the members of the study group using coconut oil compared to the control group. They noted that there was some plaque reduction with the control group's use of mineral water, though not nearly as much.

The study recommends using coconut oil for oil pulling over other oils, such as sesame and sunflower oils, or pharmaceutical mouthwashes containing chlorhexidine (which is common with most over the counter pharmaceutical mouthwashes).

The researchers compared their results to studies using other compounds. Although sesame oil in other studies was relatively close to their results, all the other mouthwash compounds took considerably longer to achieve the results they got from using coconut oil.

The researchers attributed coconut oil's superiority over other oils and pharmaceutical mouthwashes at preventing plaque to the following factors observed in previous studies:

"... significant antimicrobial activity against *S. mutans* and *C. albicans* on comparison with other oils" ... especially the "biofilm model formed by *S. mutans*, *Candida albicans*, and *Lactobacillus casei*." Another factor is "the [emulsification](#) and [saponification](#) process of oil and further the viscosity of the oil can inhibit bacterial adhesion and plaque coaggregation." #### **Coconut Oil Pulling Testimonies**

Here are a few coconut oil pulling testimonies from the [Coconut Oil Facebook](#) page:

1. *I'm oil pulling right now with coconut oil. My gums are healthier than they have ever been, my teeth are whiter and my breath is awesome. It even helped me quit smoking. I love it. – Allison*
2. *I oil pull with coconut and I love it, my teeth feel like I have had a cleaning at the dentist, I also had a tooth that was bothering me a bit that no longer hurts. Love it! – Aimee*
3. *Yes! Just had a dental checkup and the hygienist had difficulty finding any plaque. I use coconut oil and my teeth are white without all those harsh chemicals. – Darleen ([Source](#))*

Testimonies from the Coconut Oil Forum:

*I have been enduring major dental problems in the last few years (i.e.; abscesses, cavities, gingivitis, and inflamed taste buds). I tried all the conventional/Western remedies (antibiotics, etc.)-NOTHING WORKED! My friend suggested oil pulling....I have to be honest, when I first heard about it, I thought, YEAH RIGHT! I was wrong, it works like a charm. Now I use it as a*

preventive by gargling with it once or twice a week. Most of my dental problems are under control, my daughter and Dad haven't had it since I started them on it. – Lisa ([Source](#))

### **A 2015 Nigerian Study on Coconut Oil Pulling**

A Nigerian coconut oil pulling study had similar results to the 2017 study featured here. It had more subjects, 60 rather than 40, and the trial period was 30 days instead of seven. They were examining the effects of coconut oil pulling on preventing gingivitis, although the researchers did point out that gingivitis is the result of inflammation from plaque.

Among other findings, the study determined that:

A statistically significant decrease in the plaque and gingival indices was noticed from day 7 and the scores continued to decrease during the period of study. ([Source](#))

### **Acceptance from Dentists in America for Oil Pulling is Growing**

There is evidence that some modern Western dentists are accepting that not only does oil pulling improve dental health, it can improve overall health as well. Dr. Jonathan Levine is a dentist who endorses oil pulling. He said:

“What I really like about oil pulling is that people are now focused on their mouth because there’s this whole connection between oral health and overall health. If you are going to spend 20 minutes on oil pulling, you can spend the two minutes on brushing and also flossing. Your mouth is going to be healthy **and we know that inflammation in the mouth is a precursor to inflammation in the body.**” [emphasis added] ([Source](#))

From Indianapolis dentist Dr. Ted Reese:

“Our patients are just very impressed with the results they’re seeing. I’m impressed with the results we’re seeing orally, in terms of hygiene and reduced bacteria and improved health in the gums.”

Dr. Reese practices oil pulling himself, and he also noticed improved overall health conditions in addition to reducing dental plaque adding, “Bacteria in the mouth gets into the blood stream through infectious gums.” ([Source](#))

### **[Heal A Dead Tooth With Essential Oils](#)**

November 25, 2013--I'm using Young Living Brand essential oil of [helichrysum](#) and [thieves](#) oil to heal my dead tooth that you see [here](#). (Stage left of my front left tooth).

This tooth corresponds to the kidneys (yikes!) It's darkened pretty badly as of late...the emotion of the kidneys is fear. Which makes a TON of sense since I'm going through a massive life transition and I've had other signs of kidney distress such as lumbar pain.

I think it's already working to bring this baby back from the dead!!

Helichrysum essential oil heals the nerves & root of the tooth. Thieves oil kills bacteria & viruses in the mouth so it's a very healthy thing to do this time of year anyway.

I made a spray with the Thieves Oil by adding water and 20 drops or so of thieves to a small recycled glass spray bottle. I simply spray this into my mouth 3-4 times per day when I think of it. It freshens my breath and keeps illness at bay.

The helichrysum is mega pricey so I simple add from a *half a drop to 1 drop* to my finger and rub that all over the affected tooth, the gums above it and I also do a nice few deep inhalations of the oil itself.

**I bought a bottle of BioDent at a small local shop & forgot all about it until my husband started having awful tooth pain due to tooth weakening. The dentist told him his only option was extraction and dentures after two molars cracked. As a last resort, he tried the BioDent. It's been two years and his teeth don't hurt, there has been no more breakage, and the dentist is shocked. BioDent is worth its weight in gold!**

I take 5 everyday and I hate the taste, they're so sickly sweet, but it feels like my teeth become stronger already. I have 2 cavities because I abuse my teeth with carbonated water and lemons so I am curious to see what these can do. I will update once I reach 2 months of use...

**Update:** Okay so I have devoured 3 bottles of it since late August 2021 I believe that's when I first started using it and it is March 2022 so I was not even too consistent with taking them. I have to say my cavities do not hurt anymore sooo this must be working and even though my grandma was a dentist I hate going to the dentist and I eat lots of lemons, lemonade and fizzy water. I think these are potent.
