Laying up Treasure In Heaven

[September 14, 2023](#) in [Devotionals](#) For where your treasure is, there will your heart be also. — Matthew 6:21

When I was a teenager, I remember working on the farms of both my grandfathers. They were not massive farms like you may see in the Midwest. They were just small family farms. There were times we would feed the cows or goats.

Perhaps we would repair the fence. But I remember one time that I was sent out to help pick up bails of hay.

The truck was driving through the field with a large trailer. I remember walking nearby, picking up bails of hay, and throwing them up to people who were on the trailer. They would take that hay, arrange it, and then take it to store in the barn for winter. It is a physical job, one that was certainly not fun for me as a young teenager.

Now that I'm older and as I reflect on things, I can see the importance of having the hay in the barn for winter. I can only imagine the cost of feeding the livestock without it. I remember walking into the barn and seeing the stacks of hay. It was a treasure, laid up for the future.

As Jesus was teaching here in Matthew, we understand that we have the opportunity to lay up treasures for the future with how we live our lives here. He taught the importance of laying up treasure in Heaven. It was something that was valued and put into storage for the future. But the key statement he says here in verse 21, "Where your treasure is, there will your heart be also."

A lot of people live their lives laying up treasures in this world. Their lives are so consumed with treasures of this world that they forget that all the things of this world will one day pass away. If we know and believe that our future home is Heaven, why are we so consumed with laying up treasure here?

When we get to Heaven, God is not going to be impressed by how large our bank accounts are in this life. He isn't going to care that we had the nicest home, the fanciest car, the highest college degree or any other possession. Instead, God will look at the treasure that we laid up in Heaven. He will be far more interested in the souls that we led to Christ and the witness that we lived in front of others. US Coin shop owners bank accounts are being abruptly closed

Three separate coin shop owners have found their bank accounts suddenly shut down without any prior notice or explanation from their financial institutions.

An Ohio-based coin shop owner recently took to YouTube to share alarming news: His regional bank, with whom he has been a customer for years, has suddenly decided to sever ties by closing all six of his business and personal accounts.

The coin shop owner, who operates a coin shop dealing in silver and gold, received certified letters from his bank stating, "After a recent review, we have decided to end our relationship with you and close your accounts... As stated in your account agreement, we can close your account at any time, for any reason, with or without notice. We will begin our closing process on September 6, 2023."

What's shocking is that the bank has declined to provide any reason for their abrupt decision, leaving the owner and his family in the dark. The letters came without prior notice, affecting multiple accounts, including those belonging to his children and wife.

A visit to his local branch revealed little; even the manager, with whom he has a good relationship, couldn't get an answer for the sudden decision.

"They're just closing all my accounts. They don't want to do business with me. They won't tell me why. I went to my local branch, who I have a good relationship with. Talked to the manager. She tried to find out. They wouldn't tell her. So here I was left thinking, wow, what is going on? What do they think I could have done?"

[JP MORGAN CEO SOUNDS ALARM - Dark Winter for Banks](#)

Yesterday, speaking at an industry event organized by Barclays, CEO Jamie Dimon sounded the alarm on a slew of headwinds that will hit the U.S. economy hard in the next couple of months, and pointed to several risks that could deal heavy blows to consumers, investors, businesses and banks.

On Monday, he weighed in on how new regulation by the Fed will impact customers in the coming months. **The changes will certainly not make them happy. Dimon explained how plans for new capital rules in the United States**

could damage the attractiveness of bank stocks, and make banking costs go even higher for consumers.

He argued that the Fed's "'Basel III Endgame' reforms" would make loans even more expensive, and would force banks to reduce the amount of money they lend, which could drive banking activities into less regulated sectors.

He also said that it's "a huge mistake" to think that the U.S. economy will boom "for years" given that there are so many risks out there. With interest rates still going up, conditions will become even more recessionary, and "you are going to see more people out there with problems".

We still have three more months to go before this year is done, and a lot more can happen in financial markets. One of the biggest concerns right now is the real estate sector. Warren Buffet's investment partner and vice president of Berkshire Hathaway, Charlie Munger recently observed that hundreds of banks are exposed to commercial real estate loans that are at risk of going into default. He thinks there is trouble ahead for the U.S. commercial property market. "A lot of real estate isn't so good anymore," Munger said. "We have a lot of troubled office buildings, a lot of troubled shopping centers, a lot of troubled other properties. There's a lot of agony out there."

These are the very early chapters of this crisis. But when even the head of one of the biggest financial institutions on the planet is worried about growing risks, we should definitely brace for pain because much worse is yet to come. Although it may take a while for all the dominoes to fall, we won't be able to avert a decline that is already in motion. The clock is ticking, and time is running out for the U.S. financial system.

BY: [Epic Economist](#)

[Federal Reserve losing \\$758 Million PER DAY- Now in the Hole for \\$100 Billion](#)

The Federal Reserve Bank is losing \$758 Million PER DAY paying Interest to commercial banks on Reverse Repos and Interest on Reserves. Those losses just reached \$100 Billion.

Before all of these wild financial games began, the Federal Reserve would send its profits to the US Treasury each year; it was usually a few Billion Dollars each year.

Now, the Federal Reserve has massive paper losses on their Bond portfolio and masses daily losses on the money it has to pay to commercial banks to keep the system from falling apart.

Federal Reserve Chairman Powell and company have managed to lose a whopping \$100 Billion . . . and YOU are paying for it. It is difficult to overstate the level of sheer incompetence needed to have a money printer . . . and still lose money.

When a country's Central Bank starts literally LOSING money each and every day . . . countries around the world will start to notice really fast. Especially when there is no sign at all that these losses will stop.

So how long do YOU think countries around the world will continue to accept "Federal Reserve Notes" (i.e. the cash in your wallet) as payment for goods and services, from an entity which is literally Bankrupt?

Sooner or later, those countries around the world will no longer want the paper with pretty pictures on it, masquerading as "money." I have no idea WHEN that refusal will start, but given what's now taking place at the US central bank, I suspect it will not be long.

Federal Reserve CBDC & IRS A.I. 'Crackdown' Are The Twin-Pronged Attack to Strip Away All Privacy & Freedom--The entire global financial system is now essentially a technocommunist black ops money laundering crime scene. Central banks, their wall street coconspirators and the major corporations are all colluding in ushering in their hyper-centralized CBDC dystopia. This central bank "currency" will of course be inextricably tethered to the A.I. social credit...

In a recently published Federal Reserve paper entitled, Data Privacy for Digital Asset Systems, this criminal central planning politburo claims that the desire for anonymity through cash transactions is misguided, and, ultimately, impossible to achieve in digital systems. Which is precisely why the Fed wants to ban cash by instituting their CBDC.

The key takeaway is that the Fed is gearing up to attempt to strip away all privacy by phasing out cash while concurrently leveraging their *coming* CBDC's. And the other most dangerous threat to privacy and security comes courtesy of the fraudulent IRS, which operates strictly under color of law in such a manner that its mere existence is a total subversion of the 4th Amendment of the Bill of Rights.

Readers of this Substack appreciate that the IRS functions as a social engineering agency that backstops the Fed by stripping away wealth in order to induce a greater propensity to borrow from the very bankster owners of the Fed. Because the Fed can conjure quite literally infinite amounts fiat bank notes out of thin air (especially during "emergencies" like "pandemics"), there is no rational explanation for the stealing of the fruits of We the People's labors, if it were not simply a pernicious scheme wrapped up in clever lies that the populace mindlessly accepts as truths.

Which brings us to the IRS's latest power grab designed to further impoverish the working class, while inducing the maximum amount of fear through panopticon-like A.I. perma-surveillance; in a Sept. 8 statement, IRS Commissioner Danny Werfel stated the following:

There is a sea change taking place at the IRS in every aspect of our operations. The changes will be driven with the help of improved technology as well as Artificial Intelligence that will help IRS compliance teams better detect tax cheating & identify emerging compliance threats....

As we well know, the "Biden" administration has been pumping billions into the weaponized IRS to primarily harass the working poor and middle class, despite the blatant lies that the tax agency claims it would only go after taxpayers earning over \$1 million.

The IRS has zero legal right to "burden" any non-resident aliens of the foreign nation of Washington, D.C.; to wit:

REPOST: Memorandum of Law: The Legality Of Income Taxation In The "50 States" Of The Union

++In their report submitted to President Reagan on January 15, 1984, this blue-ribbon panel stated the following, quoting directly from page 12 of their report: "Resistance to additional income taxes would be even more widespread if people were aware that one-third of all their taxes are consumed by waste and inefficiency in the Federal government as previously identified. With two-thirds of everyone's personal income taxes wasted or not collected, 100% of what is collected is absorbed solely by interest on the federal debt ... in other words, all individual income tax revenues are gone before one nickel is spent on the services taxpayers expect from the government."

More Facts Regarding the IRS:

1. The IRS is not a U.S. Government Agency. It is an Agency of the IMF. (*Diversified Metal Products v. IRS et al. CV-93-405E-EJE U.S.D.C.D.I., Public Law 94-564, Senate Report 94-1148 pg. 5967, Reorganization Plan No. 26, Public Law 102-391.*)
2. The IMF is an Agency of the United Nations. (*Blacks Law Dictionary 6th Ed. Pg. 816*)
3. The U.S. Has not had a Treasury since 1921. (*41 Stat. Ch.214 pg. 654*)
4. The U.S. Treasury is now the IMF. (*Presidential Documents Volume 29-No.4 pg. 113, 22 U.S.C. 285-288*)

Bank Deposits Down One Trillion Dollars In 12 Months! - What's Next?

Saturday, September 16, 2023 -- In this interview, Darryl and Brian Panes from As Good As Gold Australia interview financial and precious metals icon, Bill Holter. US bank deposits have reduced by USD\$1 Trillion over the twelve months to May of this year, and the public are pulling their cash out at a record pace. Greg Mannarino says that a quiet revolution has begun and people are unbanking themselves. He refers to a quote from the movie ~ Margin Call, 'be first, be smarter'. Could this lead to the banks experiencing a liquidity crisis and what measures may they take in the process? It has been 52 years since President Nixon took the world off the gold standard and we can now see the world debt levels are becoming intolerable. Are the BRICS nations, and in particular, Russia, firmly moving forward with the process of implementing a commodity gold standard. "Debt destroys nations, not just sometimes, but everytime." During President Eisenhower's term from 1953 – 1961, the US experienced an increase in debt of 20 billion dollars or 0.9% per year under a gold standard. During President Barack Obama's term from 2009 – 2017, debt increased by US\$8 trillion or 8.75% per year under a fiat currency standard. Now we are hearing from the US treasury department that in the last 6 months of 2023, they will need an extra US\$1.8 trillion to pay the bills. What effect will this have on the economic future of the United States? Jim Sinclair has always said, "become your own central bank." Now that many more central banks are purchasing gold at record rates, is this quote of Jim's more applicable now than ever before?

What we have seen in the elections in the United States, in the Brexit vote, this anger of people against globalization and against the elites. [CDC Admits ~120,000 Children "DIED SUDDENLY" after COVID-19 "Vaccine" Roll-out](#)

On June 17, 2022, the FDA authorized emergency use of the mRNA Covid vaccines from Moderna and Pfizer-BioNTech to include use in children down to 6 months of age. Turns out, it KILLED a lot of them.

Just over a year later, the report – which was quietly released by CDC and subsequently suppressed by the mainstream media – revealed that nearly half a million children and young adults have now died since the injections were approved for use on most children.

Over 118,000 of those deaths are suspected to be DIRECTLY linked to the Covid vaccines’ side effects.

Despite the staggering death toll revealed in the report, it has been met with deafening silence from the mainstream media.

The latest data from the CDC has just been published by the Organization for

Economic Co-operation and Development (OEC).

The OEC is an intergovernmental organization with 38 member countries and it hosts a wealth of data on excess deaths, including data from the CDC that isn't easily available to the American people.

Box loads of Pfizer's latest COVID-19 Death Dart, marked with its brand name COMINARTY" are arriving at US Military Bases. The boxes are labelled "2023-2024." They're planning another COVID outbreak to steal the Presidential Election (again) (among many other wicked things) next year.

DO NOT COMPLY.

No more of their death dart, phony, "vaccines. No more masks. No more social distancing, no more "lockdowns."

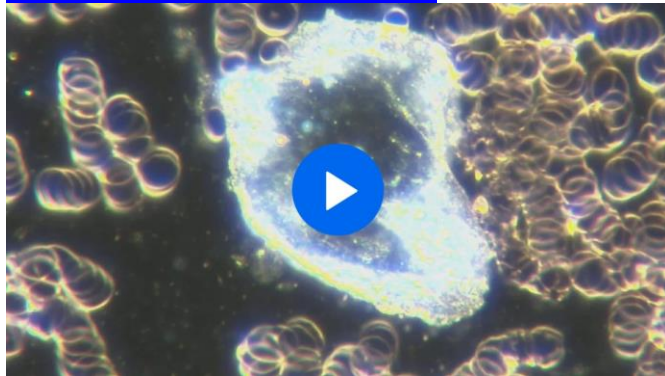

They scammed us in 2020, don't fall for it again.

The landscape is set for what promises to be another tumultuous year. As the “COMINARTY” boxes make their silent journey across US Military Bases, the murmurs of conspiracy, deceit, and hidden agendas grow louder. One can only hope that, in this game of power, truth and justice prevail. And may the collective voice of the people echo louder than the manipulative whispers of the few.

Quantum Dots Or Self Assembled Optogenetic Micro Robots - Inducing Possible Oxidative Stress And Rouleaux Formation In C19 Unvaccinated Blood?

Ana Maria Mihalcea, MD, PhD

In this post, I would like to discuss the relationship of what appears to be artificially intelligent micro robots or possibly self-assembled Quantum Dots. In the blood, there appears to be ongoing oxidative stress and rouleaux formation in the vicinity of these technological devices. Could there be a relationship with the presence of these technologies and the blood

findings? I think that these artificially intelligent technologies do not belong into human blood. All examples shown here are the C19 uninjected. If they are now in everyone, how did they get there? In the above video we see a hydrogel that has self-assembled with surrounding rouleaux, and in the left upper corner a moving light emitting spherical object or micro bot.

Summary:

We are clearly observing anomalous artificially intelligent blinking micro bots in the human blood. Further investigation of this phenomenon is warranted.

[A Few Simple Things to Do](#) The path to victory is to 'Ban the Jab' and get some level of government to declare the C19/mRNA injections biological weapons. And then find a local prosecutor and sheriff to call a grand jury and seek indictments. There is an orchestrated effort to shut down the 'Ban the Jab' movement within the GOP. Other resolutions and ordinances are being prioritized that are deliberately designed to take the focus off 'Ban the Jab' and the fact that these C19/mRNA injections are biological weapons. Executive Boards are not allowing the 'Ban the Jab' resolution to come on the agenda at County Executive Committee or Central Committee meetings.

5G REMOTE KILL VECTOR: Science paper reveals cell phone signals can activate the release of biological PAYLOADS from graphene oxide injected into the body
A science paper published in *Materials Today Chemistry* reveals that cell phone signals can be used to release biological or chemical payloads from graphene oxide that's introduced into the human body. The paper, published in September of 2022, is entitled, "Remotely controlled electro-responsive on-demand nanotherapy based on amine-modified graphene oxide for synergistic dual drug delivery."

The study abstract reveals how a cell phone can emit signals to activate a low voltage current that interacts with Graphene Oxide (GO) molecules, causing efficient delivery of drug payloads.

Because of its extremely high surface area and complex structure composition, graphene oxide turns out to be the perfect molecule for delivery of biological or drug payloads inside the body. Importantly, the presence of a specific frequency of a low voltage current is all that's necessary to cause graphene oxide to release its payload. Connecting the dots on all this, 5G signals can be used to generate low voltage inside the human body, causing Graphene Oxide molecules to release

predetermined payloads inside the body.

In the scientific paper quoted above, the payload was aspirin plus a common cancer drug. However, payloads can be almost anything of sufficiently small size, including both hydrophilic and hydrophobic molecules.

This means that potent chemical weapons -- theoretically including nerve agents that are fatal at nanograms of exposure -- could be loaded into graphene oxide molecules which are surreptitiously delivered into the body via aggressively propagandized medical interventions such as fake vaccines or covid swabs.

Theoretically, such weapons might be able to be delivered to the population via food vectors as well. Once in the body, a small amount of payload leakage may generate some level of nerve damage among inoculated victims, but the real payload delivery won't happen until a proper 5G signal is broadcast across the inoculated population, using the "release frequency" that generates the required voltage to unleash the payload.

In other words, a 5G broadcast signal at the appropriate frequency could instantly cause graphene oxide molecules to release the payloads into the bodies of those who were previously inoculated with those payloads. This would happen simultaneously, across the entire population that is within range of the broadcast frequencies which generate the necessary voltage in the body.

If the payload were a nerve agent, the real world effect would be the sudden dropping dead of large portions of populations across cities where 5G broadcast

are able to saturate them. If payloads were virus-like nanoparticles, payload delivery could cause a large portion of the population to suddenly appear to be "infected" with a pandemic virus that is spreading at unimaginable speed.

This technology, in other words, could be used as a "kill switch" to terminate whatever portion of the population was previously inoculated with payload-carrying GO.

Some additional information came to my attention during the writing of this article. The black ink printed on the side of pharmaceutical capsules actually consists of mysterious black specks which are magnetic. A contact sent me a video,

represented in the following screen shot, showing pharmaceutical capsules soaked in water for several hours, after which the black "ink" from the capsules turned into black specs that displayed startling magnetic properties. In this still photo, you can see the black specs gather at the common magnet held against the glass:

As [this article reveals in LiveScience.com](https://www.livescience.com/58111-graphene-magnetic.html), stunning new research finds that graphene can be made magnetic by assembling layers in a specific rotational orientation. This gives rise to magnetism, even though the underlying atomic elements are nothing but carbon. From the article:

The magnetic field isn't created by the usual spin of electrons within the individual graphene layers, but instead arises from the collective swirling of

electrons in all of the three-layers of the stacked graphene structure, researchers reported Oct. 12 in the journal Nature Physics.

Is graphene being used in the "ink" that's printed on the side of prescription medications? We don't know for certain, but the fact that this ink is clearly magnetic is alarming.

Graphene oxide can also transmit gigahertz signals to nearby receivers. Additionally, under certain exotic applications of graphene oxide (GO) materials, those whose bodies are activated by cell tower broadcast could themselves function as electromagnetic "repeaters" due to the ability of GO to function as transmitters.

Oral EDTA Chelation To Remove Artery Plaquing & Toxic Metals

Dr. Johnson's Comment: A Doppler ultrasound of the carotids is the best, most cost-effective way to confirm if you have plaquing of the arteries. Lifeline Screenings are a nationwide service that can provide these at a very low cost, go to: www.lifelinescreening.com

This is a good version of EDTA if you cannot do the IV chelation, but these are suppositories:

[Medicardium: Magnesium Di-Potassium EDTA Chelation](#)

[How Does EDTA Chelation Work?](#)

[IV EDTA Chelation](#)

[EDTA Chelation Suppositories Reviews](#)

The Doctor in the interview above recommended a EDTA chelation skin cream:

[KelaCream EDTA Heavy Metal Detox Cream](#)

++ Regarding the oral EDTA, once a day, if you let ¼ tsp to ½ tsp of oral EDTA sit under the tongue for 5-20 minutes (with 5-7 drops of 99% pharmaceutical grade DMSO—see below) before swallowing, it will have a much higher absorption rate. A little organic peppermint oil can kill the taste. This process (depending on your plaque level) takes a lot of time to work with the oral EDTA route, but it can be a literal lifesaver and it much cheaper than IV Chelation which is the Gold Standard and also highly recommended if you can afford it.

To Purchase Pharmaceutical Grade DMSO (which is the only kind anyone should be using) go to:

<http://www.ebay.com/usr/kaitlynstreasurebox? trksid=p2047675.12559>

++For the money this is an excellent value on EDTA:

<https://www.ebay.com/sch/i.html? nkw=arizona+edta& sacat=0>

++ This kind of chelation will not remove calcium from your system but it will remove other heavy metals and trace minerals (so again being on a good trace mineral product while on any kind of chelation program is essential) but if you have calcium buildup due to artery plaquing this will not remove that calcium

++ If you wanting to know if you have calcium buildup in the arteries or are getting chest pains and want to see if it may be calcium build up in the arteries and heart valves; phosphorus directly competes with calcium in the body and can will chelate excess calcium out of the body. This can also help with tartar buildup on the teeth and arthritic calcium spur formation in the body.

++ Dr. Johnson Comment: Lastly any form of chelation will remove trace minerals from your body, so it is important to take some extra trace minerals once you have been on the EDTA for any length of time. This is an excellent one I carry: [Multi-Mins™ \(Potent Mineral Combination\)\(120ct\) & \(360ct\)](#)

++Dr Johnson does not carry any form of EDTA chelation, but he does carry the other products mentioned.
