- Quotes From A Satanist
- Muhammad had a 9-year-old Wife
- YouTube - The Path of a Martyr

**Ephesians 5:11, 13-16:** "And have no fellowship with the unfruitful works of darkness, but rather reprove them. But all things that are reprov'd are made manifest by the light: for whatsoever doth make manifest is light. Wherefore he saith, Awake thou that sleepest, and arise from the dead, and Christ shall give

thee light. **See then that ye walk circumspectly**, not as fools, but as wise, Redeeming the time, because the days are evil."

The **1828 Noah Webster Dictionary** defines:

**Reprove**: To blame, to convince of a fault, or to make it manifest, to excite a sense of guilt.

**Circumspectly**: Cautiously; with watchfulness every way; with attention to guard against surprise or danger.

**Matthew 24:24**: "...if it were possible, they shall deceive **the very elect**."

**II Corinthians 2:11**: "Lest Satan should get an advantage of us: for we **are not ignorant** of his devices."

**II Chronicles 7:14**: "If **my people**, which are called by my name, shall humble themselves, and pray, and seek my face, and turn from their wicked ways; then will I hear from heaven, and will forgive their sin, and will heal their land."

**I John 4:18**: "There is **no fear** in love; but **perfect love** casteth out fear: because fear hath torment. He that feareth is not made perfect in love."

**Heb 13:6**: "So that we may boldly say, The Lord *is* my helper, and I **will not fear** what man shall do unto me."

**II Timothy 1:7**: "For God **hath not** given us the spirit of fear; but of power, and of love, and of a sound mind."

**Regarding the Endtimes Jesus Warned:**

**Matthew 24:24**: "For there shall arise false Christs, and false prophets, **and shall shew great signs and wonders**; **insomuch that, if it were possible, they shall deceive the very elect**."

**Mark 13:22**: "For false Christs and false prophets shall rise, **and shall shew signs and wonders, to seduce, if it were possible, even the elect**."

**I Chronicles 12:32**: "And of the children of Issachar, **which were men that had understanding of the times, to know what Israel ought to do**; the heads of them were two hundred; and all their brethren were at their commandment."

**Acts 20:31**: "Therefore **watch, and remember, that by the space of three years I ceased not to warn every one night and day with tears**."

**I Corinthians 16:13**: "**Watch ye, stand fast in the faith**, quit you like men, be strong."

**I Thessalonians 5:6**: "**Therefore let us not sleep**, as do others; **but let us watch and be sober**."

**II Timothy 4:5**: "But **watch thou in all things**, endure afflictions, do the work of an evangelist, make full proof of thy ministry."

---

**Suddenly, North Korea is talking war!**

The Illuminati Plan for World War III includes a very serious, very frightening,

nuclear confrontation on the Korean Peninsula. Listen to the exact language:

**"THE SCRIPT HAS NOW BEEN WRITTEN"**

**"A hair-raising confrontation in Korea may, towards the end of the period, threaten man's very survival." [Peter Lemesurier, *"The Armageddon Script"*, p. 223]**

North Korea has made this threat many times before, but never after her naval forces have just sunk an enemy warship!

NEWS BRIEF: "[North Korea warns of 'all-out war'](#)", Press TV, 20 May 2010

"North Korea, which is accused of sinking a South Korean ship, has warned that it would launch an 'all-out war', should an act of retaliation come about. 'If [South Korea] tries to deal any retaliation or punishment or if they try sanctions or a strike on us...we will answer to this with all-out war', North Korean naval spokesman Col. Pak In Ho was quoted by the Associated Press as saying on Thursday."

Even though North Korea is noted for its extreme hyperbole, this statement that they will go to all-out war is striking. Historically, in the immediate build-up of major confrontation, leaders of both sides begin to ratchet upward the public rhetoric. Notice the threat here that North Korea is threatening to launch war even if sanctions were applied.

This, too, is an increase in the rhetoric.

An international inspection team has determined that it was a North Korean torpedo which hit and destroyed the South Korean war vessel.

"An inquiry, conducted by an international team of civilians and military, conceded earlier on Thursday that a torpedo fired by a North Korean submarine had sunken the Cheonan on March 26, killing 46 South Korean sailors."

In a normal scenario leading up to all-out war, one or more of the belligerents sever diplomatic ties.

NEWS BRIEF: "[N Korea to sever all ties with South](#)", Press TV, 25 May 2010

[N Korea](#) says it will cut off all ties with Seoul as the crisis over the sinking of a South Korean warship near a disputed sea border escalates. The Korean Central News Agency (KCNA) said on Tuesday that [N Korea](#) was to ban all South Korean ships and planes from its territorial waters and airspace."

Therefore, this crisis has two new elements not seen in past crises:

- 1) North Korea's sinking of a South Korean war vessel
- 2) North Korea has severed diplomatic ties with South Korea.

Therefore, this crisis has all the earmarks of escalating upward to the point when someone pulls the trigger, engulfing the entire region in the flames of war.

### DVD Set

### President Obama ordered the American military to prepare for a war on the Korean Peninsula.

NEWS BRIEF: "[Obama tells military](#): Prepare for North Korea aggression", Reuter's News, May 24, 2010

"President Barack Obama has directed the U.S. military to coordinate with South Korea to "ensure readiness" and deter future aggression from North Korea, the White House said on Monday. The United States gave strong backing to plans by South Korean President Lee Myung-bak to punish North Korea for sinking one of its naval ships ... The United States still has about 28,000 troops in South Korea to provide military support."

"The two Koreas, still technically at war, have more than 1 million troops near their border."

When the President of the United States issues such an order, tensions rise still further. We note, as we read the wording of the Illuminati Plan, above, that this scripted nuclear confrontation on the Korean Peninsula, will take place "toward the end of the period".

What "end of the period" does this quote have in mind? The "end of the period" just prior to the appearance of the Antichrist. Cutting Edge also believes that the world is getting very close to the final global war which shall stage Antichrist on the world scene. "<http://www.cuttingedge.org/newsletters/>

---

### US military alert level raised in Seoul, 24 stealth fighters jets ready

May 29, 2010--by NotForSale2NWO--International news, Korea--The US military has raised its alert level for its South Korean troops and has placed 24 stealth fighter jets within easy reach of the Korean Peninsula, according to US military sources.

The sources deny that such actions were taken as a reaction to North Korea's threat of confrontation and an all-out-war, but confirm that the stealth fighter jets may participate in an upcoming joint anti-submarine exercise between US and South Korean military personnel. <http://theintelhub.com/2010/05/29/us-military-alert-level-raised-in-seoul-24->

[Watch the Interview about this book](#)

**Prime Time TV is now getting into the act of preparing the public for a future declaration that the REAL danger to our freedoms is a domestic, naturally-born American citizen!**

NEWS BRIEF: "[CBS Propaganda Ploy](#): Conspiracy Theorists Are Anti-American, Domestic Terrorists ", by Steve Wilson, Prison Planet, May 24th, 2010

"A primetime CBS show that aired last week featured a notable example of so called "propaganda placement", where a talking point is inserted into the plot in order to shape public perception, often at the behest of the government. CSI NY's episode entitled 'Point of View' featured a character who researches 'conspiracy theories', such the deliberate dispersal of potentially dangerous chemtrails into the atmosphere."

"First the character, a professor, is labeled "odd", then "anti-American", before finally he is revealed to be a 'domestic terrorist' hell bent on releasing a biological weapon in New York.

Do you remember when the term, "Domestic Terrorist" was coined, and by whom? Attorney General Janet Reno and President Bill Clinton invented this term in 1999, making it quite clear to me that, as the planned terrorism unfolded, the ultimate target was NOT the Islamic follower, but American citizens!

We have tried to make this fact quite plain since the attacks of 9/11. So far, few people have listened. But, more and more people are beginning to pay attention, which means that a concerted campaign to vilify and then isolate and then imprison, all dissidents as "domestic terrorist".

Please read full details of this Clinton/Reno "anti-terrorist program":

1) [NEWS1580](#) -- "DOMESTIC TERRORIST' REPORTED IN CLINTON-ERA F.B.I. FLYER HAS NOW BEEN CODIFIED INTO LAW! PATRIOT ACT WILL BE OUR UNDOING "

2) [NEWS1579](#) - "ASHCROFT'S FBI TIGHTENING NOOSE AROUND "DOMESTIC TERRORISTS"

The time is quickly approaching when you and I and all Christians and Patriots will be arrested on the charge of "Domestic Terrorism" and sent to [Camp FEMA!](#)

## How the White House is destroying the Gulf

By William Hunt--May 25, 2010--Rahm Emmanuel said it himself: "You never want a serious crisis to go to waste."

But why continue a crisis or allow a matter to become a crisis through inaction?

One must conclude that the White House wanted the oil spill to continue and wreak havoc on the Gulf coasts of Louisiana and Florida. Nothing substantive was done to stop the spread. A great deal of talking, but nothing more.

No serious effort was made by the U.S. government to stop the flow of oil, whatsoever, despite it being in its power to do so. Few entities have the ability to do anything at 5,000 feet in depth, and the U.S. government is one of the few that can. Despite this, it was more than a week before any NOAA ships sailed.

No submersibles capable of dumping rock or concrete onto the spill and covering it over were dispatched to stop the flood of oil. If one piles enough rock and/or concrete upon such a well, the weight of the overburden will stop the flow—inelegant, but it would work. No submarines fired wire-guided ADCAP torpedoes into the seabed surrounding the well to break up the concrete and the surrounding rock. Also inelegant, but if the pipe and surrounding rock were broken up badly enough—remember the pressure involved—it would also stop the flow of oil.

Absolutely nothing of substance has been done by the U.S. government to stop the gusher.

All the government has done is to talk about the disaster. To complain. To point fingers. To pontificate. It doesn't accomplish much.

The spill was not even a priority. Department of the Interior chief of staff Tom Strickland elected to go on vacation in the Grand Canyon, which effectively showed how much the administration cared about the matter. Imagine if one of President Bush's top federal employees had done the same thing. We'd still be hearing about it a year from now from CNN, CBS, NBC, ABC, MSNBC and other networks, using such phrases as "dereliction of duty."

However, because those media support this administration, the White House is given a pass.

Even preventing the oil from reaching shore has been a matter of talk and no action. Talk was made of starting the oil on fire and various measures suggested, but little was done.

Louisiana Gov. Bobby Jindal asked the government to have the Corps of Engineers push sand into the interstices between the barrier islands as a temporary barrier to oil. It

would have been relatively inexpensive and would have prevented the oil from reaching the Louisiana coastline. It was ignored.

Now the oil is on the coastline. Birds, plants, frogs, fish and other creatures are dying. Fisheries will be ruined for at least two to three years after the oil is finally stopped.

So, to recap: We have a federal government that didn't and hasn't acted decisively to stop the flow of oil, didn't act to prevent that oil from reaching the coastline, and now we have an ecological disaster. While the initial responsibility is on the oil companies (assuming the initial explosion and failure of safety equipment was not sabotage), the final responsibility is on President Obama as he had the power all along to stop the disaster from happening at several points and adamantly refused to act. That is on his shoulders.

"You never want a serious crisis to go to waste."

### **GOLDMAN SACHS takes "big short" position on the Gulf**

NEW YORK (The Borowitz Report) - In what is looming as another public relations predicament for Goldman Sachs, the banking giant admitted today that it made "a substantial financial bet against the Gulf of Mexico" **one day before the sinking of an oil rig in that body of water.**

The new revelations came to light after government investigators turned up new emails from Goldman employee Fabrice "Fabulous Fab" Tourre in which **he bragged to a girlfriend that the firm was taking a "big short" position on the Gulf. "One oil rig goes down and we're going to be rolling in dough," Mr. Tourre wrote in one email.**

[http://www.huffingtonpost.com/andy-borowitz/goldman-sachs-reveals-it\\_b\\_558774.html](http://www.huffingtonpost.com/andy-borowitz/goldman-sachs-reveals-it_b_558774.html)

### **Prominent Oil Industry Insider: "There's Another Leak, Much Bigger, 5 to 6 Miles Away"**

Dylan Ratigan--Matt Simmons is an adviser to the Oil Depletion Analysis Centre, and is a member of the National Petroleum Council. Simmon is chairman and CEO of Simmons & Company International, an investment bank catering to oil companies.

Simmons told Dylan Ratigan that "there's another leak, much bigger, 5 to 6 miles away" from the leaking riser and blowout preventer shown on the underwater cameras:

<http://www.zerohedge.com/article/prominent-oil-industry-insider-theres-another-leak-much-bigger-5-6-miles-away>

The government should immediately either debunk or admit his claim. If accurate, the

bigger leak could have been caused by the destruction of the well casing when the oil rig exploded. That is Simmons' theory.

There is another possibility. It is well-known that there were previous accidents at the Deepwater Horizon rig. For example, as AP notes: From 2000 to 2010, the Coast Guard issued six enforcement warnings and handed down one civil penalty and a notice of violation to Deepwater Horizon, agency records show. On 18 different occasions during that period the Coast Guard cited the vessel for an "acknowledged pollution source."

And as 60 Minutes reports: [Mike Williams, the chief electronics technician on the Deepwater Horizon, and one of the last workers to leave the doomed rig] said they were told it would take 21 days to drill the oil well; according to him, it actually took six weeks.

With the schedule slipping, Williams says a BP manager ordered a faster pace. "And he requested to the driller, 'Hey, let's bump it up. Let's bump it up.' And what he was talking about there is he's bumping up the rate of penetration. How fast the drill bit is going down," Williams said.

**Williams says going faster caused the bottom of the well to split open**, swallowing tools and that drilling fluid called "mud." "We actually got stuck. And we got stuck so bad we had to send tools down into the drill pipe and sever the pipe," Williams explained.

That well was abandoned and Deepwater Horizon had to drill a new route to the oil. It cost BP more than two weeks and millions of dollars.

<http://www.zerohedge.com/article/prominent-oil-industry-insider-theres-another-leak-much-bigger-5-6-miles-away>

---

### **Media ignores Goldman Sachs' ties to Corexit dispersant**

In a recent New York Times' article "[Less Toxic Dispersants Lose Out in BP Oil Spill Cleanup](#)", journalist Paula Quinlan questions why BP is using the 100 % toxic, 54 percent effective dispersant Corexit to clean up the oil when twelve other dispersants proved more effective in EPA testing.

BP spokesman Jon Pack defended the use of Corexit, which he said was decided in consultation with EPA. He called Corexit "pretty effective" and said the product had been "rigorously tested."

BP is not considering or testing other dispersants because the company's attention is focused on plugging the leak and otherwise containing the spill, Pack said. "That has to be our primary focus right now," he said.

**Nalco (The makers of Corexit:** <http://www.nalco.com/applications/corexit-technology.htm> ) spokesman Charlie Pajor said the decision on what to use was out of his company's hands. He also declined to comment on EPA comparison tests, saying only that lab conditions cannot necessarily replicate those in the field. "The decision about what's used is made by others -- not by us," he said.

Quinlan only looks at part of the picture. She associates BP's investment in Nalco and oil industry representation on the board as the main reasons that Corexit was used instead of Dispersit, which EPA testing shows to be twice as effective and a third less

toxic. Yes, BP is hedging its losses with the profit it will make with its investment in Nalco, but who else benefits?

Follow the money...and the money goes to Goldman Sachs and friends.

If for no other reason that Goldman Sachs is newsworthy, I think that their \$4.3 billion purchase of Nalco in 2003 would be worth mentioning, especially in light of their short trade on TransOcean. The shorts are another missing item in the business section of The Times, as is any information on Goldman's role in the 9-11 put options on American and United for that matter.

### Scientists: Newly discovered Gulf oil plume is 22-miles long, six-miles wide

By The Associated Press--Thursday, May 27th--2010 Marine scientists have discovered a massive new plume of what they believe to be oil deep beneath the Gulf of Mexico, stretching 22 miles (35 kilometers) from the leaking wellhead northeast toward Mobile Bay, Alabama.

The discovery by researchers on the University of South Florida College of Marine Science's Weatherbird II vessel is the second significant undersea plume recorded since the Deepwater Horizon exploded on April 20.

The thick plume was detected just beneath the surface down to about 3,300 feet (1,000 meters), and is more than 6 miles (9.6 kilometers) wide, said David Hollander, associate professor of chemical oceanography at the school.

The first such plume detected by scientists stretched from the well southwest toward the open sea, but this new undersea oil cloud is headed miles inland into shallower waters where many fish and other species reproduce.

The researchers say they are worried these undersea plumes may be the result of the unprecedented use of chemical dispersants to break up the oil a mile undersea at the site of the leak.

Hollander said the oil they detected has dissolved into the water, and is no longer visible, leading to fears from researchers that the toxicity from the oil and dispersants could pose a big danger to fish larvae and creatures that filter the waters for food.

"There are two elements to it," Hollander said. "The plume reaching waters on the continental shelf could have a toxic effect on fish larvae, and we also may see a long term response as it cascades up the food web."

Dispersants contain surfactants, which are similar to dishwashing soap.

A Louisiana State University researcher who has studied their effects on marine life

said that by breaking oil into small particles, **surfactants make it easier for fish and other animals to soak up the oil's toxic chemicals. That can impair the animals' immune systems and cause reproductive problems.**

<http://rawstory.com/rs/2010/0527/scientists-newly-discovered-gulf-oil-plume-22miles-long-sixmiles-wide/>

---

#### **IG report: Meth, porn use by drilling agency staff**

25 May 2010 Staff members at an agency that oversees offshore drilling accepted tickets to sports events, lunches and other gifts from oil and gas companies and used government computers to view pornography, according to an Interior Department report alleging a culture of cronyism between 'regulators' and the industry. In at least one case, an inspector for the Minerals Management Service admitted using crystal methamphetamine and said he might have been under the influence of the drug the next day at work, according to the report by the acting inspector general of the Interior Department.

<http://www.comcast.net/articles/news-politics/20100524/US.Gulf.Oil.Spill.Washington/>

---

#### **Inspector General's Inquiry Faults Regulators**

24 May 2010 Federal 'regulators' responsible for oversight of drilling in the Gulf of Mexico allowed industry officials several-years-ago under the Bush Administration to fill in **their own inspection reports in pencil -- and then turned them over to the regulators, who traced over them in pen before submitting the reports to the agency**, according to an inspector general's report to be released this week. The report, which describes inappropriate behavior by the staff at the Minerals Management Service from 2005 to 2007, also found that inspectors had accepted meals, tickets to sporting events and gifts from at least one oil company while they were overseeing the industry. <http://www.comcast.net/articles/news-politics/20100524/US.Gulf.Oil.Spill.Washington/>

---

#### **U.S. agency overseeing oil drilling ignored warnings of risks**

24 May 2010 The federal agency responsible for regulating offshore oil drilling repeatedly ignored warnings from government scientists about environmental risks in its push to approve energy exploration activities quickly, according to numerous documents and interviews. Minerals Management Service officials, who receive cash bonuses for meeting federal deadlines on leasing offshore oil and gas exploration, **frequently altered their own documents and bypassed legal requirements aimed at ensuring drilling does not imperil the marine environment, the documents show.** This has dramatically weakened the scientific checks on offshore drilling that were established under landmark laws such as the Marine Mammal Protection Act and the National Environmental Policy Act, according to those who have worked with MMS, which is part of the Interior Department.

## **Oil spill brings 'death in the ocean from top to bottom'**

By Frank Pope 24 May 2010 It has been an hour since our sport-fishing boat started streaking through the freshly oil-soaked marshes of Pass a Loutre, but we're still only halfway through the slick. Eighteen miles out and the stink of oil is everywhere. Rashes of red-brown sludge are smeared across vast swaths, between them a swell rendered faintly psychedelic with rainbow-coloured swirls. Cutting the engines, we slide to a stop near Rig 313. We're not supposed to be in the restricted zone, but other than the dispersant-spraying aircraft passing overhead there's no one to see us. **Despite the thick oil, we've seen only two clean-up boats out of the 1,150 that the response claims to have on site: one was broken down, the other was towing it.**

<http://www.timesonline.co.uk/tol/news/environment/article7134581.ece>

### **Update – Hawk, Greg Evensen & Steve Quayle – Must listen**

May 27, 2010 by Alex *According to this broadcast, troops, including foreign are stationed every 500 miles? In case of an evacuation of the Gulf?*

#### *Excerpt from show*

“Reports are that the protocols that are being developed, what they are doing is bringing together primary battle groups. People that can actually be engaged in combat. Reinforced by foreign troops at 500 mile intervals. Every 500 miles you have a concentration of battle groups. so that the flow of people when it becomes beyond anything we have ever seen, they will have these communication hubs. Overall command is US. Including UN APPOINTED OFFICERS. Including RUSSIAN. 40 million people potentially to be evacuated. That does not include the people on the east coast. If this happens you could see potentially another ten million.P

This is from a former New Mexican State Police officer, he said to me that their are reports that there had been previously unseen ground units emerging from otherwise inactive areas in the DESERT SOUTHWEST. Possibly foreign or coming from underground areas. They were headed toward the east...

**June 15 to 20th** is the potential for a saturation point where human habitation would be in jeopardy. The elderly, the sick, and the young could die first. Again I don't want people going crazy here, these are the best estimates at the time for the worst cause scenario. Phase one would be deep down in the cost with a time frame from **July 1st to July 10th as a potential when levels would reach the need to evacuate.** The potential to affect 50 million.

Worst cause scenario, again these numbers were given to me by the folks who are working on this plan. This could be up to 200,000 state, county, and local police personal and upwards to 300,000 volunteers and regular staff that would be effected. This is not counting the military. Border enforcement will collapse as

all available law enforcement are taken up. All civilian assets would be basically abandoned. These folks are charged with planning for every case including the worst case and this of course reflects the worst case”

**WE HAVE BEEN WARNED THAT THERE WILL BE A DISINFORMATION CAMPAIGN AGAINST THIS INFORMATION.**

***Editors Note:** Could this be why we have had reports of **UN troops in San Diego and Florida**? This is really starting to get intense. In no way are we posting this to cause fear. Our job is to get info to the people and let them decide. Personally I don't even know what to believe at this point. Just reporting on Hawks update. It seems this report may somewhat coincidence with the Intel we have been receiving. The thing that struck me the most about parts of this radio broadcast is when Hawk talked about the disinformation campaign that will be launched to deny these facts. The Intel hub has had many real patriots agree and disagree with our UN troops story but there has also been a fair amount of what i would call, “trolls”.*

**"Knowing" movie and the Oil Rig Explosion in the Gulf of Mexico 2010**

[robjayshar](#) — May 09, 2010 — The Internet is abuzz regarding the 2008 moving "Knowing" that includes a [scene](#) in which actor Nicolas Cage is watching the news on television. The clock shows 11:59 when the anchor announces a devastating fire burning out of control in the gulf. Then the clock flips to 12:00, and the anchor says "that story leads our headlines at the top of the hour."

Midnight has long been associated with end times. With the "[doomsday clock](#)", the closer the clock is to midnight, the closer the world is estimated to be to global disaster.

One of the interesting things about the New World Order elitists is that for some reason they believe they must announce what they're going to do before they do it to you. Often, this predictive programming is done through the medium of Hollywood.

But if you look at this from the perspective of those who seek to reduce human population down to [half a billion](#) – a much more manageable size for control – then the possible motivations begin coming more clearly into focus.

That this particular forecast tucked away in the movie Knowing was associated with the midnight hour is something that shouldn't be taken lightly, especially considering the far-reaching impact that this unfolding disaster could yet have on civilization. That midnight and the black of oil would be paired up serves no small paradox.

Watch: <http://www.youtube.com/watch?v=hmgeA3dr2uY>

Dr. Johnson's Presentation: [Avian Flu: Proof Globalists Telegraph Their Plans-Part 4](#)

#### DVD

In 1995, Steve Jackson of Jackson Games included an oil derrick blowing oil all over the world in his Illuminati Card Game!

Remember the premise of these cards in this role-playing game: each card represents an action which the Illuminati is going to take in order to overthrow this present civilization so the New World Order can be established!

Current news stories indicate that the oil spill cannot be stopped and the oil is spreading throughout the Gulf of Mexico and into the Atlantic Ocean!

In fact, our featured story reports that President Obama is even considering using nuclear warheads to stop the oil leak!

NEWS BRIEF: "[Nuking the oil spill: nuclear option being considered?](#)", Oil-Price.net, 2010/05/24

"The oil spill in the Gulf of Mexico continues to spill black venom into the sea. The world has got to see stirring images of oil gushing with decipherable great force, enough even to turn a staunch critic towards environmental protection. Initially scoffed and sniffed at, a radical solution in the form of a nuclear explosion is now trotting as a viable option to stop the oil spill. Why? Because no effort should be spared and so far, the stratagems used by BP have been futile. "

Adding radioactivity to the oceans in order to try to stop this oil leak seems a very risky solution to consider. It seems that it is kind of like trying to swat a flea with a hammer.

But, that is not the point here, is it? The point is that, in 1995, occult leader Steve Jackson knew that, one day, the Illuminati would use an underwater oil derrick to spread crude oil throughout the world.

To see other Illuminati Cards, including the Pentagon on Fire and the World Trade Center Towers Under Attack, [click here](#).

One matter is very clear: in 1995, the Illuminati planned to use an oil derrick blowing up to spread crude oil over a very large portion of the Earth. Reality is stranger than fiction. <http://www.cuttingedge.org/newsletters/>

## **Predictions For The Rest Of 2010**

5-25-10

Bob Chapman

First 6 months of 2010, Americans will continue to live in the 'unreality'; the period between July and October is when the financial fireworks will begin. The Fed will act unilaterally for its own survival irrespective of any political implications (source is from insider at FED meetings). In the last quarter of the year we could even see Martial law, which is more likely for the first 6 months of 2011. The FDIC will collapse in September 2010. Commercial real estate is set to implode in 2010. Wall Street believes there is a 100% chance of crash in bond market, especially municipals sometime during 2010. The dollar will be devalued by the end of 2010.

Gerald Celente

Terrorist attacks and the "Crash of 2010". 40% devaluation at first = the greatest depression, worse than the Great Depression.

George Ure

Markets up until mid-to-late-summer. Then "all h--- breaks lose" from then on through the rest of the year.

Igor Panarin

In the summer of 1998, based on classified data about the state of the U.S. economy and society supplied to him by fellow FAPSI analysts, Panarin forecast the probable

disintegration of the USA into six parts in 2010 (at the end of June to the start of July 2010).

Neithercorps

Have projected that the third and final stage of the economic collapse will begin sometime in 2010. Barring some kind of financial miracle, or the complete dissolution of the Federal Reserve, a snowballing implosion should become visible by the end of this year. The behavior of the Fed, along with that of the IMF seems to suggest that they are preparing for a focused collapse, peaking within weeks or months instead of years, and the most certain fall of the dollar.

Webbots

July and onward things get very strange. Revolution. Dollar dead by November 2010.  
LEAP 20/20

2010 Outlook from a group of 25 European Economists with a 90% accuracy rating- We anticipate a sudden intensification of the crisis in the second half of 2010, caused by a double effect of a catching up of events which were temporarily averted in the second half of 2009 and the impossibility of maintaining the palliative remedies of past years. There is a perfect (economic) storm coming within the global financial markets and inevitable pressure on interest rates in the U.S. The injection of zero-cost money into the Western banking system has failed to restart the economy. It is slowly rolling over into the next big down wave, which in Elliott Wave terminology will be Super Cycle Wave Three, or in common language, "THE BIG ONE, WHERE WE ALL GO OVER THE FALLS TOGETHER." ### **New Federal Biometric ID card Warning**

**National Association for Gun Rights**--After years of watching our illegal immigration problem grow steadily worse -- and watching our elected officials refuse to lift a finger in response -- the politicians' "fix" is finally in.

It's a new Federal Biometric ID card.

That's right. Instead of controlling our borders, the politicians want to control you and me. **They want to give amnesty to illegal immigrants and make us prove we're not criminals!**

And President Barack Obama, Lindsey Graham (R-SC) and Chuck Schumer (D-NY) are all working hand in glove to ram this new scheme into law as part of their new "comprehensive immigration reform" package.

That's why it's vital you sign the petition to your Congressman and Senators IMMEDIATELY.

Go to: <http://www.nagr.org/BIDpetition1.aspx?pid=1>

**If passed, the Federal Biometric ID card included in the new amnesty bill will:**

- Include a "unique biometric identifier" -- like fingerprints, retinal scans or even a scan of the veins on the back of your hand; and,
- Allow bureaucrats to watch your every move, as the Federal Biometric ID card will almost certainly be produced with RFID tracking technology; and,
- Include virtually unlimited amounts of personal information about you -- like what guns you own, for instance.

And this new Federal Biometric ID would be required for any person wishing to hold a job legally in the United States.

So I guess the welfare recipients don't have to get one.

I don't know about you, but I'm outraged.

It seems that whenever politicians are using terrorism, crime, illegal immigration or something else as their excuse, it's really you and me in their crosshairs.

Just remember those Department of Homeland Security memos listing pro-gun, pro-constitution activists as "domestic extremists." Go

### Quotes From A Satanist

**By Frater 616--1/17/10--** "The Alpha Lodge has taken steps to try to ensure that after the next war the Tradition is maintained in the intervening centuries, before civilization, as we know it, begins again. **At that time, Satanism will be in the only religion and science.** We have secured the texts, books, relics and magickal weapons necessary for Our Dark Lord and I see the storm clouds gathering. Ritual activity is increasing. Social structures are almost totally eroded. The Sheeple gather for their slaughter. The average Homo normalis is beyond caring. Provided their bellies are full, their minds empty and their time consumed with frivolous entertainment, Satanists are free to triumph."

It took less than sixty years to turn the Western world from war heroes to wimps; from bold, adventurers to crybabies; from devoted couples to divorcees.

"Satanists of the highest order are behind **a number of wealthy Conservative, New Right Christian Churches and organizations in America. These are some of contemporary Satanism's best cash-flow enterprises (mostly indirectly) and allow mass indoctrination and networking.**"

"The strength of International Satanism continued to increase as its oldest families continued to wither. Their most enduring legacies will be the power structures they created and the relationships facilitated. **Their funding of diverse groups dedicated to the destruction of Christianity is a story never to be told!**"

"Viable, truly spiritual Satanism is becoming more overt. This is because of those who went before. And as the schedule works itself, the Alpha Satanic Lodges are growing ever more public. I will not mention names, front-organizations or interests. **The time is**

when these will announce themselves - just like Disneyland! We infiltrated then built the modern media, created porno-film empires, turned 'Snuff' into art and liberated young people. Ours is the obsession of the mystery of darkness! This is our age: The Age of Satanas!"

### **Muhammad had a 9-year-old Wife**

Issue Date: May/June 2010--While many Muslim practices grate the nerves of Westerners, the committing of pre-teen girls to older men as brides seems especially revolting. More "advanced" Muslim countries claim to discourage the practice. Yet it is common even in Saudi Arabia.

News agencies recently told of a Saudi 12-year-old who managed to obtain a divorce from her 80-year-old husband. The case sparked a campaign to raise the marriageable age to 16, but Muslim leaders point out that Muhammad consummated a "marriage" to a 9-year-old while married to several other women.

In Yemen, another 12-year-old recently bled to death after 3 days in labor trying to deliver a stillborn. She had been forced by her family to marry a 24-year-old who paid a large dowry to her parents.

Muhammad limited his followers to four wives, but obtained approval from Allah for at least 20 for himself. In addition, he was known to pick and choose among captured slave women. One of his favorite wives was Aisha, whom he chose in marriage at age six and bedded when she was nine.

Islam's view and treatment of women today reflects the 7th century tribal customs where Islam was born. Like most pagan-based religions, Islam is highly sexualized. Women are "owned" by a husband or other dominant males in the family and allowed only limited liberties. Severe punishment is exacted for even casual contact with other men.

Yet the Muslim male has almost total freedom, sexually. Besides allowing up to four wives, some sects allow temporary contractual marriages call Mutah. The "contract" can be for as little as a few hours and provides for a "dowry" given to the woman by the man. After the contract expires, both are free to go on their way, no ceremony or divorce proceedings needed. Sounds like prostitution to me.

Certain moral standards are prescribed for relations with Muslim women, but no such restrictions apply to infidels. Even today, sexual conquest is part of the spoils of war wherever Muslims are fighting for control of a country or region. Unbelievers are to be killed or converted and attackers are free to rape the women at will before they are killed or enslaved.

Muhammad's world consisted primarily of robbery and sex. All women were slaves at one level or another. Wives were the highest level with captured women serving as direct sex slaves and/or household servants. Since Muhammad's life style forms the

example for all Muslims, men obsessed with sex and conquest are the ideal disciples. And what does the man get, who achieves "martyrdom" by sacrificing his life to destroy infidels? Immediate entry into paradise where his sexual strength is unlimited and a minimum of 72 perpetual virgins are at his continual disposal.

Ghazoli's book, and **Who is this Allah?** by G.J.O. Moshay, describe in detail the lifestyle of Muhammad and his teachings in the Qur'an. They will be a great help to the soul winner who wishes to be well informed on the beliefs of the Muslims he is witnessing to.

The new tract, **Is Allah Like You?** shows clearly the Muslim treatment of women, the contrast between the Bible and the Qur'an, and the difference between Jehovah and Allah. The tract is built around a gripping story that will hold the reader until it delivers these messages along with the gospel.
