USNORTHCOM Gears Up For Potential Attack On U.S. Soil in the Gulf Region

Oil Spill in the Gulf – The Waters are Poison: Over the past several weeks, America has been visited by an event that will be one of the most destructive ecological catastrophies in modern history. It is going to shatter records! Unfortunately, most Americans are not grasping its magnitude. This oil eruption is going to have very grave consequences for millions of people. It is going to affect the livelihoods and employment for many people. It is going to contribute to the health failure of many people. And here is the very grievous part of the story; it is going to end the lives of many people. [more](#) + [True Salvation and The True Gospel Good News](#)

BP is using highly toxic chemicals in the Gulf; Food Crops Threatened

BREAKING: Newly released aerial photos reveal oil 'streamers' in Florida Keys

"Unfortunately, [the photos] don't give what we saw justice," said Chris Kauffman, referencing the photos he snapped while flying over the Florida Keys on May 22.

"We saw a lot of oil in the water," he said. The oil streamers stretched north to south for at least 10 miles "North-northwest of Marathon," on the Gulf side. "The water appeared to be heading easterly" ...[\[link to www.floridaoilspilllaw.com\]](http://www.floridaoilspilllaw.com)

EXTREME ALERT — Gulf Coast Evacuation Contingency Plans Soon to Go

Operational: The operational name for the Gulf Coast Evacuation is "Swift Fox". Yesterday morning at around 8:30 Mountain time, I received information that specific towns, in Tennessee, Kentucky, Alabama, Mississippi, Texas and Georgia were having hotel rooms rented in mass by different named "Societies" using Federal government credit cards. The block hotel room rentals are for half the available rooms in hotels with a minimum of 120 rooms. Specific conversations were "overheard" that would indicate that the planned Gulf Coast evacuation is soon to be implemented. The only scenario I hear that may force the government to evacuate the coast is a multiple plume situation. Apparently, the unmitigated oil spilling has caused a pressure flux which, ironically, has caused a spider web network of Gulf seabed fissures, which has caused at least one other confirmed oil plume. NOAA is searching for two more suspected ones". This quote is from an insider who is really concerned as he should be. Here's additional info he provided. His comments in the following quote: "I know FEMA has already scoped out FEMA camp locations, i.e. vacant lots and swaths of land that can be leased temporarily in Texas and Georgia".

The inside guy said it is up to the President to give the go-signal. There is an evacuation plan drafted and in place, ready for execution only *if* the administration deems it necessary. That can happen two ways. FEMA makes an emergency declaration with recommendation to POTUS (President of the US) for an evacuation or 2/3 of the Gulf States request federal help for an evac. States can individually declare an evacuation of their Gulf residents, but that would be a state action only, not FEMA/Federal".

The National Guard is being called up to patrol areas where the crude oil spill is supposedly coming ashore.

We postulated that the Guard might be called up in our June 7 News Alert. That possibility is now confirmed by the official homepage for the U.S. Army.

NEWS BRIEF: "[Guard readies as Gulf Coast braces for oil spill](#)", By Air Force Master Sgt. Mike R. Smith, www.armymil.com, April 30, 2010

"At least three states along the Gulf of Mexico are preparing for a potential call for thousands of National Guard members as the nation ramps up its response to the Deepwater Horizon Oil Spill ... Louisiana Gov. Bobby Jindal sent letters to federal officials asking them to approve funding to activate up to 6,000 Guardmembers to assist in the response to the oil spill. In two letters addressed to Secretary of Defense Robert M. Gates and Janet Napolitano, the secretary of the Department of Homeland Security, Jindal said the Guard 'will provide security, medical capabilities, engineers and communication support in response to this threat'."

How big is this "threat" supposed to be? Remember, the Illuminati always wants to publicly maximize the threat their actions have created so that the public will be more thoroughly conditioned and more completely terrified.

"Currently, our Soldiers and Airmen are staging for and are engaged in the planning of the effort to evacuate and provide security and clean up for the coastal communities expected to be impacted by the oil spill', Jindal wrote. 'They are engaged in the protection of vital infrastructure to include medical facilities, fuel distribution, interstate highways, water-ice distribution and power facilities, which are all vital to the recovery of coastal Louisiana ... these National Guard operations are necessary and appropriate to protect this region of our nation from a significant national event with potential catastrophic loss of natural resources'."

Now we know how dangerous this oil spill is going to be: "catastrophic".

My Merriam-webster dictionary provides these synonyms for "catastrophic":

Fatal, calamitous, cataclysmic, disastrous, fateful, and ruinous.

The government is laying it on thick and heavy in order to scare us to death. Then, and only then, will we be scared enough to allow any condition close to Martial Law in these cities and towns and beaches along the Gulf Coast. Mass Media stories are cooperating with this effort to frighten by running news stories which are telling a most calamitous story. These news stories are saying that the oil spill is far worse than BP is admitting.

However, more and more people are beginning to question whether the oil spill is that much of a problem and whether the Mass Media and the government are simply whipping a molehilltruth into a mountain of propaganda.

NEWS BRIEF: "[Massive Media Blackout in Gulf Oil Spill](#) ", Infowars.com, June 9, 2010

"According to documentary film maker, James Fox, reporting from Louisiana, there is a massive media black out being perpetrated in the Gulf of Mexico BP Oil spill. While that much may have seemed obvious to many, James says that people with cameras are being threatened with arrest, and locals are seriously afraid to talk. The place is swarming with both government officials and corporate officials, and by the sounds of this interview it's a pretty scary situation. James Fox is a filmmaker that specializes in UFO documentaries. One of his films aired last fall on the History Channel."

Why impose a media blackout if the reality is as bad as the public rhetoric? The answer is plain and clear: there would be no reason to impose a media blackout; but, if the rhetoric has been blown way out of proportion, then the government would have every reason to impose a media blackout.

We believe that this entire National Guard operation is a conditioning tool by which people all over America will come closer to the belief that any disaster of any magnitude is sufficient to bring in the Guard. Such conditioning is absolutely necessary for the time when Martial Law will be imposed all across this country, and rapidly.
