Ephesians 5:11, 13-16: "And have no fellowship with the unfruitful works of darkness, but rather reprove them. But all things that are reprovved are made manifest by the light: for whatsoever doth make manifest is light. Wherefore he saith, Awake thou that sleepest, and arise from the dead, and Christ shall give thee light. See then that ye walk circumspectly, not as fools, but as wise, Redeeming the time, because the days are

evil."

The **1828 Noah Webster Dictionary** defines:

Reprove: To blame, to convince of a fault, or to make it manifest, to excite a sense of guilt.

Circumspectly: Cautiously; with watchfulness every way; with attention to guard against surprise or danger.

Matthew 24:24: "...if it were possible, they shall deceive **the very elect.**"

II Corinthians 2:11: "Lest Satan should get an advantage of us: for we **are not** ignorant of his devices."

II Chronicles 7:14: "If **my people**, which are called by my name, shall humble themselves, and pray, and seek my face, and turn from their wicked ways; then will I hear from heaven, and will forgive their sin, and will heal their land."

Fukushima Is Continually Blasting All Of Us With High Levels Of Cesium, Strontium And Plutonium And Will Slowly Kill Millions For Years To Come **End Of The American Dream**

August 31, 2011

Fukushima is now far and away the worst nuclear disaster in all of human history. Chernobyl was a Sunday picnic compared to Fukushima and the amount of cesium-137 released at Fukushima this year so far is equivalent to 168 Hiroshima bombs.

The crisis at Fukushima is far, far worse than you have been told. We are talking about multiple self-sustaining nuclear meltdowns that will not be fully contained for years.

In an attempt to keep people calm, authorities in Japan (and around the rest of the world as well) have lied and lied and lied. Over the months that have passed since the disaster began, small bits of the truth have slowly started to come out.

Authorities are finally admitting that the area immediately surrounding Fukushima will be uninhabitable indefinitely, and they are finally admitting that the amount of radioactive material that has been released is far higher than initially reported. It is going to take the Japanese years to fully contain this problem.

Meanwhile, Fukushima will continue to blast all of us with high levels of cesium, strontium and plutonium and will slowly kill millions of people around the globe for years to come.

These days, the mainstream media does not talk about Fukushima much. The reality is that there have been [a whole lot of other disasters](#) for them to talk about.

But just because Fukushima is a nightmare that is playing out in very slow motion does not mean that it does not deserve our full attention.

To get an idea of just how nightmarish Fukushima has turned out to be, just consider the words of nuclear expert [Steven C. Jones](#)....

By way of comparison, the Chernobyl nuclear disaster that occurred in 1986 in the Ukraine, Russia- heretofore the worst nuclear disaster on record- burned for 10 days and

cumulatively killed an estimated 1 million people worldwide. The Fukushima, Japan nuclear disaster has 5 nuclear reactors burning, 2 in partial meltdown and 3 in full meltdown- and they've ALL been uncontrollably burning since March 11th. Its been over 3 months and this nuclear disaster remains completely out of control. In fact, some industry estimates cite the possibility that these meltdowns will be contained (optimistically) in 1-3 years, at the very earliest.

The amount and intensity of the radioactive fallout from this particular nuclear disaster will assuredly kill hundreds of millions of people worldwide over time. Japan itself is, of course, the epicenter of this radioactive contamination that has spread out from these reactors. Keep in mind that radioactivity from the Chernobyl disaster deeply contaminated [77,000 square miles](#).

So if Fukushima is many times worse, what does that mean for us?

Just recently, **authorities in Japan confessed** that the amount of cesium-137 released by Fukushima is equivalent to 168 of the nuclear bombs that were dropped on Hiroshima. **Source: [the Telegraph](#)....**

[Pure Effect Water Filters – Safeguard Your Drinking Water From Fluoride And Radiation!](#)

++Also I highly recommend “Black Mica” for radiation & pollution in the water in the water. Can de-pollute tap water quickly. See Black Mica webinar, you can watch it here:

<http://www.EnjoyMyWebinar.com/webinars/replay/346>

Black Mica Sources:

<http://www.KacperPostawski.com/adyawebinarspecial.html>

<http://www.longevitywarehouse.com/SearchResults.asp?Search=black+mica>

Well, it turns out that authorities in Japan have finally reached the same conclusion. According to [the New York Times](#), the Japanese government is acknowledging that large areas around the Fukushima nuclear facility may be uninhabitable for decades....

Broad areas around the stricken Fukushima Daiichi nuclear plant could soon be declared uninhabitable, perhaps for decades, after a government survey found radioactive contamination that far exceeded safe levels, several major media outlets said Monday.

Unfortunately, most people do not have any concept of just how dangerous nuclear contamination can be.

At this point, the vast majority of people living in the northern hemisphere have been exposed to radioactive material from Fukushima.

We can't see them, but radioactive particles can do an insane amount of damage. We can breathe them in, we can eat them in our food and we can even absorb them through our skin. Once trapped inside our bodies, these particles can slowly “bake” us for years and years. The following is from an opinion piece by Helen Caldicott [in the Guardian](#)....

Internal radiation, on the other hand, emanates from radioactive elements which enter the body by inhalation, ingestion, or skin absorption. Hazardous radionuclides such as iodine-131, caesium 137, and other isotopes currently being released in the sea and air around Fukushima bio-concentrate at each step of various food chains (for example into algae, crustaceans, small fish, bigger fish, then humans; or soil, grass, cow's meat and milk, then humans). [2] **After they enter the body, these elements – called internal emitters – migrate to specific organs such as the thyroid, liver, bone, and brain, where they continuously irradiate small volumes of cells with high doses of alpha, beta and/or gamma radiation, and over many years, can induce uncontrolled cell replication – that is, cancer.** Further, many of the nuclides remain radioactive in the environment for generations, and ultimately will cause increased incidences of cancer and genetic diseases over time.

One of the most dangerous radioactive elements being released at Fukushima is strontium. Strontium accumulates in the bones and in the teeth. It is also known to cause cancer in humans.

It has been estimated that approximately 80 percent of the strontium that was released during the Chernobyl nuclear disaster entered the food cycle.

Considering the vast amount of strontium that has been released at Fukushima, that is a very frightening statistic.

Just consider what Dr. Russell Blaylock [recently told Newsmax](#)....

When we look at Chernobyl, most of West Germany was heavily contaminated. Norway, Sweden. Hungary was terribly contaminated. The radiation was taken up into the plants. The food was radioactive. They took the milk and turned it into cheese. The cheese was radioactive. That's the big danger, the crops in this country being contaminated, the milk in particular, with Strontium 90. That radiation is incorporated into the bones and stays for a lifetime.

So would you like to have radioactive material in your bones that affects your health for the rest of your life?

It may have already happened to you and you wouldn't even know it.

Other deadly radioactive elements that are being released at high levels at Fukushima include iodine, cesium, uranium and plutonium. Large amounts of these radioactive particles have already been absorbed in the soil and in the water in the United States.

Large amounts of these radioactive particles have also entered our food chain.

As the years go by, a whole lot of Americans are going to get sick and die and they will never even know that it was Fukushima that caused it.

Remember, just because you cannot see these radioactive particles does not mean that they aren't incredibly deadly. **Just check out what nuclear expert [Steven C. Jones](#) recently had to say about plutonium....**

To give one an example of how lethal radiation is, one pound of plutonium evenly distributed into everyone's lungs would kill every man, woman and child on Earth. There are literally "tons" of radioactive plutonium (among other radioactive elements) that have been released into the air and ocean environments since March 11th. Another critical fact to remember is that radioactive plutonium, for example, remains lethal (killing life) for thousands of years as it has a half-life of 24,000 years. Some other radioactive elements such as uranium have a half-life of 4.47 billion years.

That is the scary thing with many of these radioactive elements. Now that they have been released, many of them will be with us for as long as we live, for as long as our children live and for as long as our grandchildren live.

Yes, things are much worse than you have been told.

Up until now, the Japanese government has insisted that those living outside the 20 kilometer exclusion zone are safe.

What a lie!!

According to [Reuters](#), Greenpeace has found incredibly high levels of radiation at schools up to 60 km away.....

Greenpeace said on Monday that schools and surrounding areas located 60 km (38 miles) from Japan's tsunami-hit nuclear power plant were unsafe for children, **showing radiation readings as much as 70 times internationally accepted levels.**

Dr. Chris Busby recently traveled to Japan with some very sophisticated testing equipment and found **one sample in Tokyo that had levels of radioactivity that were higher than the exclusion zone surrounding Chernobyl during that nuclear disaster.**

But things are much worse for those living much closer to Fukushima. High levels of cesium have been detected in the urine and in the breast milk of those living in the region surrounding

the facility. All over the area there are reports of people coming down with the symptoms of radiation sickness.

The truth is that the "evacuation area" should be far, far larger than it is now. Just consider what [Mike Adams of Natural News](#) recently had to say about what recent tests have shown....

One soil sample taking 25 kilometers away from Fukushima showed Cesium-137 exceeding 5 million becquerels per square meter. This level, of course, makes it uninhabitable by humans, yet both the Japanese and U.S. governments continue to downplay the whole event, assuring everyone that there's nothing to worry about..

A lot of people in Japan are going to die, and frustrations are rising. According to an article in [The Independent](#), a lot of Japanese feel totally abandoned by their government at this point....

It is the fate of people outside the evacuation zones, however, that causes the most bitter controversy. Parents in Fukushima City, 63km from the plant, have banded together to demand that the government do more **to protect about 100,000 children. Schools have banned soccer and other outdoor sports. Windows are kept closed.** "We've just been left to fend for ourselves," says Machiko Sato, a grandmother who lives in the city. "It makes me so angry."

But just because you don't live in Japan does not mean that you are not in danger. The Fukushima nuclear facility sits right on the Pacific Ocean. When nuclear material gets released into the air at Fukushima, the first time much of it will encounter land is when it reaches the United States.

Also, thousands upon thousands upon thousands of tons of highly radioactive water has been released into the Pacific Ocean at Fukushima.

What this is going to do to our oceans nobody knows for sure. **But according to the [Los Angeles Times](#), the seawater near Fukushima has been found to be incredibly radioactive....**

Tokyo Electric Power Co. had said Tuesday that it had found iodine-131 at 7.5 million times the legal limit in a seawater sample taken near the facility, and government officials instituted a health limit for radioactivity in fish. Other samples were found to contain radioactive cesium at 1.1 million times the legal limit.

All of this radioactive water is going to circulate all over the globe.

Just because the mainstream media is not talking much about all of this radiation does not mean that it is not affecting the United States....

***Radiation from Fukushima has been detected [in seaweed](#) in Puget Sound.**

***Radiation from Fukushima has been detected [in the drinking water](#) in numerous states.**

***Radiation from Fukushima has been discovered [in milk](#) in numerous states.**

***Very high levels of radiation continue to be detected [in rainwater](#) in the northwest United States.**

This is a slow motion nightmare that is going to play out for years and years.

Some nuclear experts claim that it could be up to 50 or 100 years before any of the nuclear material at the Fukushima complex will cool down enough to be removed from the facility.

Right now there is no viable solution to what is going on at Fukushima, so it will continue to blast all of us with high levels of radiation and will slowly kill millions of people around the globe for years to come.

Please share this information with as many people as you can.

[E-mail from a Steve Quayle Listener 'in the know' regarding Fukushima](#)

Last week during our meeting concerning Fukushima, The Speaker was discussing how his company was contracted to build and send several of these UAV's to Japan to do surveillance and measurements at Fukushima. He warned the company that they should not attempt to

deploy these UAV themselves, **but "train" the Japanese officials to do it themselves, due to**

the high levels of radiation. The bottom line is, the radiation levels were measured at 20,000 times above the levels being reported....20,000 times!!! He further said that the US aircraft carrier that was sitting 600 miles off the coast of Japan was exposed to extremely high levels of radiation and that they had to take action to start "scrubbing" operations to attempt to mitigate their exposure. He also said that radiation levels in Tokyo are so high that eventually, Tokyo will become a ghost town.

Steve, I just wanted to share this with you as a confirmation of what you and Hawk have been sharing with everyone that THINGS are much worse than what MSNBC continues to pump out...they are liars. They will not provide the truth and are puppets for disinformation.

http://www.stevequayle.com/News.alert/11_Global/110829.alert.Fukushima.html

Simulation Map of Cesium-137 Deposition Across the Pacific by CEREAs Shows Contamination in US Greater Than That of Western Japan: France's CEREAs has the simulation map of ground deposition of cesium-137 from the Fukushima I Nuclear Power Plant accident on its "Fukushima" page. It not only shows Japan but also the entire northern Pacific Rim, from Russian Siberia to Alaska to the West Coast of the US to the entire US. **According to the map, the US, particularly the West Coast and particularly California, may be more contaminated with radioactive cesium than the western half of Japan or Hokkaido. It looks more contaminated than South Korea or China. Canada doesn't look too well either, particularly along the border with US on the western half.**

The page also has the animated simulation of cesium-137 dispersion from March 11 to April 6, 2011.

Radioactive materials spewed out of Fukushima I Nuke Plant went up and away on the jet stream, reaching the other side of the Pacific.

When the fallout from explosions (March 14, 15) reached the US West Coast, it came with an unusually heavy rainfall in California.

Japanese Insider Spills The Beans!--It's Over For Japan!

I just heard on public TV that "Japan is through!" If that does not send shock waves, I don't know what will! This gentleman in perfectly clear English pointed to these factors. 1/ Japan will never recover 2/ Leading corporations are getting out of the country with their lives 3/ The Fukushima Power system failure affected the entire industrial base of Japan, putting up more cost to the consumer and manufacturer 4/ Radiation issue is a ominous political event that could close down Tokyo in the near future.

Dr. Scott Johnson's Online Presentations on the Avian Flu:

[Avian Flu, Population Control, H5N1, Biological Warfare: 1-5](#)

Population Control, Pandemics, H5N1, Biological Warfare & Colloidal Silver What to Expect and How to Prepare. **5 videos** | Created Aug 15, 2008 |

[Avian Flu/Pandemics: What to Expect & How to Prepare \(1-16\)](#)

In recent years, the specter of the Avian Bird Flu has been hanging over mankind like a sharp sword. 'Experts' have repeatedly stepped to a news microphone to warn that human deaths could reach into the hundreds of millions worldwide - a death carried by birds in their global migratory patterns. A TV show entitled "Fatal Contact" even aired, depicting so many fatalities that their bodies were carried away in dump trucks. When this show aired back in May of 2006, I was actually on a 14 city tour of America entitled: 'Avian Flu: Killer of Millions?'. This teaching is an updated version of that presentation. This teaching covers so much more than Avian Flu and can be used as an 'icebreaking' education tool for both saved and unsaved who may not understand these issues. I endeavored to present the big picture with this presentation & point people to our only hope for any calamity: Jesus Christ. Topics will include: Proof the Illuminati telegraphs their punches prior to cataclysmic events, Why Avian Flu is the perfect vehicle for world depopulation, What the globalist elite are planning for Americans, Why the Avian Flu could be a repeat of the Spanish Flu of 1918 that killed millions!, Vaccinations and injectable microchips regarding the Avian Flu, potential kill rates, food shortages, forced vaccinations, project Bioshield, and quarantines. I will also extensively cover proactive steps you can take to protect your families and yourself.

[Recent Testimonials regarding the POWER of INVIVE MILD SILVER PROTEIN](#)

From: susan s.

Sent: Wednesday, August 31, 2011 3:42 PM

To: Scott Johnson

Subject:

Dear Scott,

The purpose of telling you all of the above is to tell you that after that came swine flu..... I was researching and came across a Glenn from ihsite.com and purchased the super silver he sold, he gave me your name and told me to watch your teachings on youtube. I did that and

then discovered the Invive silver, The super silver works but does not work like **Invive..**
<http://www.dr-johnson.com/> ..this product is wonderful. I have a small daycare and the children are always sick then my son would get sick from them, it was very frustrating I tried kiddie boost and other natural remedies before I came across the Invive silver, they seemed to work for a time than stopped. Swine flu came through my house & one child a week was sick with it, **I found out that the mother of two of the girls took them for a nasal flu vaccination spray prior to coming down with the Swine Flu and thought I was crazy when I was telling her how bad those shots are and told her how the spray will get others sick.** My son and I also got very, very sick & the cough was horrible....I went to the doctor just to see exactly what we were dealing with. I had a serious sinus infection, ear infection, bronchitis. The doctor did give me antibiotics but I did not take them. My son and I both took the super silver that I already had in stock and about 7-10 days he was okay and for me about two weeks. **A few months later we were sick with similar symptoms and we took Invive silver and have been using the Invive 2000 ppm faithfully and it works extremely fast. My whole family has not been to a doctor for three years now and dropped our health care coverage down to the cheapest rate. I also was able to talk a parent of a child I watch to purchase Invive for her son. He was sick every other week with something. This product works for him within two days at 500 ppm and he does not get sick as often.** My husband was on cholesterol medication, after listening to a current event study containing health information about cholesterol levels and how dangerous the medications are my husband stopped taken the meds and now takes natural cholesterol product. We now purchase many supplements you have recommended over the years.

May the Lord Jesus Christ continue to Bless you and your daughter Taylor!

Susan

Subject: **Thank you thank you thank you!***

Dr. Scott,
I owe you a debt I can never repay ~ I could never have afforded the silver in time. My morgellons is 97% healed. My skin as beautiful as ever, my fast went great, and I'm going on another one.

In conjunction with the silver, and de-tox, I've been using oil like crazy. Olive oil, sandalwood, frankincense, lemongrass. The evil ones seem to HATE certain oils. This battle is ENTIRELY spiritual.....

I love you,

Cheryl 😊 😊 🌹
God bless you and your precious daughter!

Date: Tue Aug 23 22:37:26 -0400 2011
Comments/Special Delivery Instructions: Good morning to you.... I am a customer of yours and have purchased your silver products. I am writing to tell you my story..... My wife was ill last year with a chronic {so we were

told} UTI urinary tract infection. This went on for months and months. I can't tell you how many Dr. visits she had went to at the time. EVERY anti-biotic was administered to her, **the infection rejected ALL of them at the time, did not eradicate the infection.** There were only 3 anti-biotic's left to try on her. In January, she was hospitalized due to a spiking 103 fever and a massive infection....apparently. Even infectious disease was called in due to all of her problems, finding no results. She was hospitalized for a week and then sent home with a pic-line to have anti-biotic's administered for yet another week after she was home. "Supposedly" after all those anti-biotic's were intravenously administered she was cured of her infection. Well 6 months later, lo and behold after a AZO strip test, she had a rampant infection once again..... I sat down with her and explained that if she went back to the Dr's. they would re-test her, and poke and prod her to no end just like last time. She was poked and prodded relentlessly the last time and they could not cure her. I told her to trust me and TRY the silver product I purchased from you.....

I had her take the Invive 5000ppm regimen for Nephritis.... After 2 weeks she still had the infection according to the AZO test strip, so she continued the regimen, for another 2 weeks.... Today after testing, the strip is showing NO infection! This was the BIGGEST test of your product to show that it DOES work! I know you guys know on your end it works, but not the deluded public, skeptics & Dr's who didn't even know what it was, everyone denouncing it and saying go to a MD.....my wife is living proof that your product works. I was ALWAYS a believer, but to now have my wife a believer is priceless. Thank you for your awesome product, your product cured my wife of something not even an infectious disease specialist and a slew of Dr's. and other specialists could accomplish.

Thank you so much from a very happy customer. Sincerely, Gregg F.

Invive Silver Potency Facts Comparison to 20ppm Silver

A piddley 20 ppm

weak dishwasher silver made by lying competitors is "NOT" a "HIGH" concentration of Silver particles,

and will "NOT" protect you from the Swine Flu. Period.

1,000 ppm to 10,000 ppm "IS" a high concentration of microscopic silver particles. Period.

Click here for Scientific "PROOF"

re virulent pathogens

<http://www.xpressnet.com/bhealthy/bhealthy.html#viri>

And ask yourself:

Why do competitors "have to" sell theirs by the gallon size jugs

&

then they tell you to take "HUGE" amounts of their dishwasher weak ppm silver

to get any relief (not to be confused with cure) at all?

The Scientific answer that cannot be denied is Silver is an Allopathic substance meaning YOU CAN'T use weak "dilutions".

Therefore high ppm determines effectiveness and "NOT" particle surface area. They are outright Liars having to sell gallon jugs.

"Our" Medical Journal MSP (Mild Silver Protein) silver is the "same" silver formula used in:

The British Encyclopaedia of Medical Practice circa 1938 Sir Humphrey Rolleston, BT, G.C.V.O., K.C.B., M.D., D.Sc., D.C.L., LL.D., Emeritus Regius Professor, Cambridge, sometimes PRESIDENT of the Royal College of Physicians of London, England.

We also categorically state that:

Any silver Web Site that:

1.) "ONLY" HAS 1 STRENGTH OF SILVER

2.) OR says, OR infers, that Silver ppm (parts per million) strength does "not" determine effectiveness

is an outright lying OR MISLEADING Web Site.

BECAUSE:

Different strengths and indeed 5000 ppm strengths, have been used for the last 100+ years which has "proved" that

only higher strengths have worked more effectively since 1902 = for the last 100+ years.

And 5000 ppm strength is what was used in the British Encyclopaedia of Medical Practice and other Medical Journals.

The 6 litres (6,000 cc) of blood in everyone's body dilutes 1 teaspoon (5 cc) of any type of silver of any strength down by 1,200 times "less" strength. Weak silver solutions under 2,000 ppm are worthless in the body against disease. E.g. A 20 ppm is diluted down to less than 1/100 of 1 ppm by blood in the body, but promoters mislead the public by saying that 20 ppm kills bacteria in the petrie dish (in vitro) without telling you: It is "not" effective in vivo (in the body) because it is diluted down 1200 times to less than 1/100 of 1 ppm by your 6 litres of blood. Promoters will not put up the information that the 6 litres of blood in everyone's body dilutes 1 teaspoon of silver of any strength down by 1,200 times less strength. The correct solution is to have a 20 ppm solution in your bloodstream, and for that you need 4 teaspoons of 5000 ppm. This is a plain fact of Chemistry and cannot be denied. Click here to see [point 8](#) for a complete explanation that you must use a 5000 ppm for disease.

"All" bottles of INVIVE = "all" strengths are in 4 oz. fl. U.S. [118.291 ml.] bottles, because you want more STRENGTH (silver particles), not more water.

E.g.: ONE 4 oz. bottle of 5000 is equal to 1000 bottles of 5 ppm = You can make "1,000" bottles of 5 ppm from "ONE" bottle of 5,000

and **you can make 250 bottles of 20 ppm** (that our main competitor sells for \$49.87 for 16 oz.) **out of ONE 4 oz. bottle of our 5,000.**

That means you can make "SIXTY TWO" 16 ounce bottles of 20 ppm out of just "ONE" of our 5000 4 ounce bottles.

Our competitor would charge you \$820 for just 25 16 oz. bottles, **therefore you would pay \$2,033.60 for 62 bottles.**

Please Wake up!!

1 of our 5000 bottles makes "SIXTY TWO BOTTLES" of 20 ppm.

You will get silver "VALUE" = save over \$1,900 by just purchasing 1 of our 5000.

Please purchase "our" silver, **not our competitor's 16 ounces of weak diluted \$49.87 20 ppm silver water.**

[Gates Foundation Vaccinates 131 Children at Gunpoint in Malawi](#)

Posted on July 07, 2011

[TruthisTreason.net](#) – Kevin Hayden

Source: **[Activist Post](#)** by Lois Rain, Edited by Kevin Hayden

See also: **[Bill Gates Says Vaccines Can Help Reduce World Population](#)**

The Gates Foundation has long been in an aggressive effort to vaccinate the world and often targets poor Africans. The Gates' web site showcases **Melinda Gates applauding Malawi for enforcing vaccine programs with its helpful "health surveillance assistants."** She calls Malawi **one of the few countries "on track to reach the UN Millennium Development Goal."** And who are these Gates Foundation partners helping to meet that goal? **Hyper-vigilant medics with help from police.**

Bill Gates calls the vaccine-autism link "an absolute lie" and in a February CNN interview said, "the people who go and engage in those anti-vaccine efforts – you know, **they, they kill children.**" But as we can see from the recent actions from governments who partner with his foundation to forcefully implement vaccine programs, **it is actually the other way around.**

The local newspaper, the Malawi Voice recently reported that **about 131 children from Nsanje were vaccinated with anti-measles at gunpoint last week.** They had fled from previous vaccine mandates into nearby towns, but after officials learned they had returned, medics, along with **police escorts tracked down the children and forced them to be vaccinated.**

The children belonged to Zion and Atumwi Churches and **parents took them into Mozambique to hide from officials with vaccines.** It is unclear if those churches prohibit the use of vaccines, but a Malawi man with a Seventh Day Apostolic faith **found himself sentenced to two year's imprisonment for refusing to let his three children receive the measles vaccine.** He did not believe in going to doctors or receiving vaccinations. **Bill Gates and his organization (his bio-tech terrorist cells) have repeatedly emphasized their goal to vaccinate every child on earth and it is clear that children and parents have no say in the matter.** These families may have fled the vaccinations because of witnessing its harmful effects in others or religious beliefs.

Whatever the case, **they had no choice.** The Gates banner says **"Human Rights! We come generously bearing good gifts of health and peace."** Take the gifts or else...**get shot?**

It is also clear that the Gates applaud and support this type of force. Every month, 11,000(!) of these health surveillance assistants spend three weeks providing health care (vaccinations) and

information and one week in the rural health clinics. "And they also **make sure the vaccinations happen**: not just at the village level, **but all the way back through the system**," Melinda Gates said.

That they do, with guns and needles locked and loaded.

Mexico to give HPV vaccine to all girls from 2012

AFP Wednesday, August 31, 2011

MEXICO CITY

Beginning in 2012, the HPV vaccine will be part of the **normal course of shots given to all girls at the age of nine**, Health Minister Jose Angel Cordova said.

Cervical cancer kills about 4,200 women in Mexico each year.

The minister said while deaths from cervical cancer **had fallen 47 percent in the country over the past two decades**, there was still **13.4 cases for every 100,000 women last year**.

[Full story here.](#)

Rick Perry's Slimy Connections to Merck & the HPV Vaccine

Texas Tribune's Jay Root notices that presidential candidate Rick Perry (R-TX) is [backing away from his controversial executive order mandating young girls to receive the HPV immunization](#). Merck Pharmaceuticals capitalized on this fraud by making obscene profits from a crony deal with Governor Rick Perry, while children are put at risk.

According to the [Associated Press](#), Perry has close ties to Merck, having received money from them for his re-election campaign .

"He also has ties to Women in Government, a Merck-funded advocacy group made up of female state legislators around the country. His current chief of staff's mother-in-law, Texas Republican state Rep. Dianne White Delisi, is a **state director for the group**," reports the AP.

Perry's former chief of staff Mike Toomey **is on the Merck payroll as a lobbyist**.

Almost immediately following Perry's announcement, newspapers and TV stations began to report that it was **"the law"** that parents had to have their child vaccinated. This reflects a national and international hoax that is repeatedly being perpetrated shortly before school terms begin each year.

There is no law in America, aside from those applying to medical workers, that says you or your child has to take any vaccine whatsoever, no matter what any executive order, requirement, mandate or policy dictates...

What is actually in the vaccine? A live genetically engineered cancer virus. As the vaccine spreads in use, reports of horrible side effects are already starting to proliferate.

"Negative side effects of Gardasil, a new Merck vaccine to prevent the sexually transmitted virus that causes cervical cancer, are being reported in the District of Columbia and 20 states,

including Virginia. The reactions range from loss of consciousness to seizures," reports the [Washington Times](#).

"Young girls are experiencing severe headaches, dizziness, temporary loss of vision and some girls have lost consciousness during what appear to be seizures," said Vicky Debold, health policy analyst for the National Vaccine Information Center, a nonprofit watchdog organization that was created in the early 1980s to prevent vaccine injuries."

The report quotes physicians who debunk the claim that the HPV vaccine even prevents cervical cancer, as is claimed by Merck and the FDA.

"There is no proof Gardasil will stop cervical cancer," said Clayton Young, an obstetrician/gynecologist in Texas, "

The EO, issued by Perry in February 2007, sparked a backlash within Perry's own party and eventually led the state legislature to override the order. Perry succumbed to the lawmakers' wishes, but continued to defend his plan until he began campaigning to win the GOP nomination for president.

I found this on some comment board and thought you might find it interesting:

"Don't worry...The UN population fund says the Rick Perry HPV Vaccine is OK! The make special prayers in the meditation room chapel!

They check with every single god known to man to come up with their good ideas!

William Jasper, author of "A New World Religion"

describes the religion of the UN: "...a weird and diabolical convergence of New Age mysticism, pantheism, aboriginal animism atheism, communism, socialism, Luciferian occultism, apostate Christianity, Islam, Taoism, Buddhism, and Hinduism"

<http://juchre.org/nor/meditati...>

With all those gods having consensus there's no way they can mess up!

**Another HPV Success Story--The HPV Vaccine: Lifesaver or Russian Roulette?
Is a new vaccine sending users to GardaHell?**

By Tara Murtha | Posted Jun. 2, 2009

Jodi Speakman believes her daughter Victoria (pictured) was poisoned by Gardasil, the “HPV vaccine” manufactured by Merck & Co., Inc. just 40 miles away in West Point, Pa.

Photo by [Faye Murman](#)

Sitting at the living room table in her Northeast Philadelphia house—adorned with a curbside American flag and red-barn mailbox—Speakman’s eyes tear up when she talks about the seizures that have shaken her 18-year-old’s body to the ground for the last two years. Speakman’s anxious and Victoria’s exhausted: **It’s 6 p.m. and the teenager just got out of bed.**

Victoria says that since she got her second dose of Gardasil (the vaccine is administered in three doses spaced out over six months) in February of 2008, she has suffered non-epileptic seizures, migraines, fainting spells, tremors, twitches, numbness, intermittent leg and facial paralysis, tingling, twisting eye pain, joint aches, neck and back pain, memory loss, brain fog, regression, mood swings and fatigue on a near-daily basis. The second shot was like pulling the trigger of a gun.

Soon, Victoria was so sick that she was forced to stop going to high school. The violence and frequency of her seizures make it so she can barely leave the house, and she is rarely left unattended.

Subject: [How To Find The Poisons In Vaccines In 5 Seconds Or Less](#)

Dear Informed Parents,

Would a mother think twice about feeding monkey kidneys, mouse brain, Tween 80, or aluminum compounds to their baby?

Consider the difference between ingesting a substance versus it being injected. Are they eliminated from the body in the same manner?

If you know someone who hasn't questioned vaccines yet, pass on the video below. It

shows a parent how they can find the poisons in the vaccines in under 5 seconds!

Watch out for DRACO - MIT Scientist Develops Vaccine To "Cure All Viral Diseases"

2011 08 13--From: ll.mit.edu

DRACO - Vaccines - Nanotech - MIT - DARPA

MIT Lincoln Laboratory researchers develop a technique to cure a broad range of viruses

Viral pathogens pose serious health threats worldwide. For clinical viruses such as HIV or hepatitis, emerging viruses such as avian or swine influenza, and highly lethal viruses such as Ebola or smallpox (that might be used in bioterrorist attacks) relatively few drugs exist. Most drugs that do exist are highly specific for one virus, are ineffective against virus strains that become resistant to them, or have adverse effects on patients.

As part of the PANACEA (for Pharmacological Augmentation of Nonspecific Anti-pathogen Cellular Enzymes and Activities) project, **researchers from MIT Lincoln Laboratory have developed and demonstrated a novel broad-spectrum antiviral approach, called DRACO (for Double-stranded RNA [dsRNA] Activated Caspase Oligomerizer)**. DRACO selectively induces apoptosis, or cell suicide, in cells containing any viral dsRNA, rapidly killing infected cells without harming uninfected cells. **As a result, DRACO should be effective against virtually all viruses, rapidly terminating a viral infection while minimizing the impact on the patient.**

Draco is the Latin word for dragon.

Rev 12:9 And the great dragon was cast out, that old serpent, called the Devil, and Satan, which deceiveth the whole world: he was cast out into the earth, and his angels were cast out with him.

Comment: Man this sounds similar to the Movie “I am Legend”:

I Am Legend is a 2007 [post-apocalyptic science fiction film](#) directed by [Francis Lawrence](#) and starring [Will Smith](#). Smith plays [virologist](#) Robert Neville, who is immune to a **vicious man-made vaccine virus originally created to cure cancer**. The genetically-engineered variant of the measles virus meant as a cancer cure, mutates into a lethal strain and spreads throughout the world, killing 5.4 billion people (90% of humanity) while turning the rest into to Zombies known as Darkseekers.

Related: CDC Warns Americans to Prepare for Zombie Apocalypse

In work reported in the journal PLoS ONE, DRACO was shown to be effective against all 15 viruses that the team has so far tested in cells, including cold viruses (rhinoviruses), H1N1 influenza strains, adenoviruses, a stomach virus (reovirus), a polio virus, dengue fever virus, and several members of hemorrhagic fever arenavirus and bunyavirus families. DRACO was also demonstrated to be nontoxic in 11 different cell types representing various species (e.g., humans, monkeys, mice) and organ types (e.g., heart, lung, liver, kidney). In addition, experiments demonstrated that DRACO not only is nontoxic to mice but also can save mice infected with a lethal dose of H1N1 influenza. Currently, the team is testing additional viruses in mice and beginning to get promising results with those as well.

Todd Rider invented the PANACEA and DRACO antiviral therapeutics, and previously invented the CANARY (Cellular Analysis and Notification of Antigen Risks and Yields) sensor for rapid pathogen detection and identification.

The microscope images above show that DRACO successfully treats viral infections. In the left set of four photos, rhinovirus (the common cold virus) kills untreated human cells (lower left), whereas DRACO has no toxicity in uninfected cells (upper right) and cures an infected cell population (lower right). Similarly, in the right set of four photos, dengue hemorrhagic fever virus kills untreated monkey cells (lower left), whereas DRACO has no toxicity in uninfected cells (upper right) and cures an infected cell population (lower right).

Dr. Rider says that although more extensive testing is needed, "DRACO has the potential to revolutionize the treatment and prevention of virtually all viral diseases, including everything from the common cold to Ebola." He adds, "Because the antiviral activity of DRACO is so broad spectrum, we hope that **it may even be useful against outbreaks of new or mutated viruses**, such as the 2003 SARS [severe acute respiratory syndrome] outbreak."

This work is funded by a grant from the National Institute of Allergy and Infectious Diseases and the **New England Regional Center of Excellence for Biodefense** and Emerging Infectious Diseases, with previous funding from the **Defense Advanced Research Projects Agency**, **Defense Threat Reduction Agency**, and **Director of Defense Research & Engineering (now the Assistant Secretary of Defense for Research and Engineering)**.

[Radiation Remedies](#)
[Iodine Treatments for Radiation Exposure](#)

From: KOKO
here is the link <http://www.health-matrix.net/2011/03/19/detoxify-or-die-natural-radiation-protection-therapies-for-coping-with-the-fallout-of-the-fukushima-nuclear-meltdown/#more-412>

Proven Effective Radiation Detox Protocols

The therapies described here are widely available as over-the-counter supplements in most countries.

Green stuff and other sea food

In Chernobyl, 5 grams of **spirulina** for 45 days was used successfully against radiation poisoning. **Chlorella** algae also has shown radio-protective effects. A [study](#) showed that spirulina reduced urine radioactivity levels by 50% after only 20 days and so the Institute of Radiation Safety in Belarus developed a special program to treat 100 children every 20 days with spirulina. Furthermore, the healing occurred during the continuous presence of radiation as well as the presence of radiation contaminated food and water sources. In particular, spirulina given to children with accumulated high doses of radionuclides reduced radioactive cesium. No side effects were registered. **Only buy spirulina or chlorella from a certified heavy-metal free source.**

Studies on sea vegetables with **sodium alginate** have shown that they selectively bound with radioactive strontium and eliminated it from the body. Sodium alginate is found in many **seaweeds**, especially **kelp**. Sodium alginate binds tightly to such substances as strontium, calcium, barium, cadmium and radium. Some seaweeds are contaminated with lead or arsenic so you only want to consume seaweed that is deep ocean harvested or has been tested to be free of metal toxicity (such as kelp from the west coast of South Africa).

Black and green tea have shown radioprotective effects when taken either before or after exposure to radiation. This anti-radiation effect was observed in several Japanese studies, and studies from China also suggest that the ingredients in tea are radioactive antagonists. Tea catechins are associated with antioxidant properties and can have radio-protective effects when taken both before and after irradiation.

Kelp also has organic iodine which will saturate the thyroid so radioactive iodine will not be absorbed. You can take 1 or 2 tsp or 5 to 10 tablets.

Pectin is one of the most effective means of protecting against radiation when consumption of contaminated food becomes unavoidable. Pectin preparations, along with vitamins and minerals, have demonstrated a high efficiency in eliminating incorporated radionuclides. The recommended dose is 5 grams once or twice a day for one month, 4 times a year.

“In 1999 BELRAD together with “Hermes” Hmbh (Munich, Germany) developed a composition of apple pectin additives known as Vitapect® powder, made up of pectin (concentration 18 – 20%) supplemented with vitamins B1, B2, B6, B12, C, E, beta-carotene, folic acid; the trace elements K, Zn, Fe, and Ca; and flavoring. BELRAD has been producing this food additive, which has been approved by the Belarussian Ministry of Health, since 2000.

“The pectin additive Vitapect with clean nutrition appears to be 50% more effective in decreasing the levels of Cs-137 than clean nutrition alone (Nesterenko et al., 2004).

“A clinical study of 94 children, 7 to 17 years of age, divided into two groups according to their initial level of Cs-137 contamination determined by whole body counting (WBC) and given Vitapect orally for 16 days (5 g twice a day) revealed both a significant decrease in incorporated Cs-137 and marked improvement in their electrocardiograms.

“From 1996 to 2007 a total of more than 160,000 Belarussian children received pectin food additives during 18 to 25 days of treatment (5g twice a day). As a result, levels of Cs-137 in children’s organs decreased after each course of pectin additives by an average of 30 to 40%.

“Based on long-term experience, the BELRAD Institute recommends that all children living in radioactive contaminated territories receive a quadruple course of oral pectin food additives annually along with their conventional food ration. Eleven years of BELRAD’s activities in controlling levels of incorporated Cs-137 in more than 327,000 children has not caused alarm in the population or radiophobia and has led to the spread of knowledge concerning radiation protection and an increased sense of personal responsibility for one’s health.”

[Nesterenko, A. V., Nesterenko, V. B. and Yablokov, *Chernobyl: Consequences of the Catastrophe for People and the Environment.*]

Antioxidants and Sulfur Compounds

DMSO is available in various formats.

Sulfur has a long history of use as an antidote for acute exposure to radioactive material. Antioxidants have the capacity to reduce toxic effects of radiation in our bodies. Early research identified sulfur-containing antioxidants as among those with the most beneficial therapeutic effects.

Dimethylsulfoxide (DMSO) is the classical sulfur compound and a powerful anti-oxidant, exactly what we need for detoxification and protection from radiation. A [Japanese study](#) showed that even low concentrations of DMSO had radio-protective effects through the facilitation of DNA double-strand break repair, providing protection against radiation damage at all cellular levels in the whole body. **The information and experience on DMSO is so fascinating that it can be described only as miraculous.** Due to its importance, we have dedicated an entire article to it. See [DMSO: The Antidote for Radiation Poisoning](#).

The use of anti-oxidants such as alpha lipoic acid, Vitamin E, Vitamin C (ascorbic acid), vitamin B, selenium, N-acetylcysteine and other sulfur compounds becomes crucial. It is important to use several of them, as they work best as a team. In addition to that, individual anti-oxidants can act as pro-oxidants when they themselves are oxidized, therefore individual anti-oxidants could enhance the progression of post-irradiation damage to tissues and organs. Several studies have shown the importance of anti-oxidant supplementation to be an effective therapy against radiation hazards.

Alpha Lipoic Acid (ALA) is a crucial supplement. It is water and fat soluble and it is also capable of crossing the blood-brain barrier. This means that it is capable of reaching and preventing damage in our fatty tissues, our brains, and every single organ for that matter. ALA also repairs DNA. It is a good heavy metal chelator, it protects the heart and brain from cell death, stimulates the regeneration of liver tissue and is rapidly absorbed high up into the digestive tract. ALA recycles other antioxidants such as vitamin C, vitamin E, and glutathione which is an indispensable antioxidant for detoxification and is synthesized within the mitochondrion. Glutathione may not reliably be augmented by oral supplementation because it cannot always pass over the mitochondrial membrane, therefore it must be synthesized within the mitochondrion. ALA and its metabolite DHLA provoke the cell to produce significantly higher levels of glutathione (even by 70%). So if the glutathione levels in a cell are kept up to a satisfactory level by ALA, even if the cell is poisoned, the cell will have a better chance of

recovering instead of dying. It is of critical importance in order to reduce or reverse radiation-induced oxidative damage after radiotherapy. The recommended dose of ALA is 100mg twice a day with meals, although others have used higher doses of between 300mg and 600mg. [A study](#) conducted on some of those who worked on the Chernobyl clean-up operation 10 years after the accident showed that 600 mg of lipoic acid for two months was able to normalize many, but not all, of their lab abnormalities.

The anti-oxidant **N-acetyl cysteine (NAC)**, as a source of glutathione and sulfur, is an excellent supplement to take. Studies have suggested that it might prove efficient in saving individuals exposed to lethal and sub-lethal radiation doses with few or no side effects on individuals exposed to lower doses. It is also widely available. Around 500mg twice a day is a good dose, although some have used with great success around 5 grams of NAC (per day, in a hospital setting) in 7 day cycles in order to detoxify heavy metals.

Other important supplements include **magnesium** and **vitamin C**. For more information on the many forms of magnesium and dose recommendation, see [here](#). Calcium and magnesium both help your body to pass off Strontium 90, but make sure to take enough magnesium in order to properly metabolize the levels of calcium.

For vitamin C (ascorbic acid), 1-4 grams as a daily maintenance is a good dose, but during detox or acute exposure, more will probably be required. Vitamin C cannot only protect against radiation but also repair damage from previous exposure. It will also be very handy in case of infections. You can try taking 4 grams of vitamin C 3 times per day. If you have diarrhea or abdominal bloating, cut out one dose. If there are no signs of intestinal “gurgles”, you can increase your dose throughout the day.

Consider taking also a good **B complex** which help to normalize the red and white blood cell count, since the destruction of white blood cells by radiation can last for extended periods of time.

Vitamin E 800-1000 IU per day and **selenium** 200 mcg per day are also important since radiation studies support evidence for the synergistic effects of vitamin E and Selenium in protecting from oxidative damage.

Zinc has been successfully used to chelate americium-241 from a nuclear accident victim. Natural zinc will also help the body eliminate several toxic heavy metals including cadmium, aluminum and lead. The recommended dose is 50 mg per day. You might want to supplement yourself with a good mineral complex in order to avoid deficiencies or imbalances brought on by increasing your zinc intake.

If there is a deficiency in **potassium**, radionuclides like cesium-137, cesium-134, potassium-40 and potassium-42, are absorbed through selective uptake. Too much potassium supplementation can be dangerous, so make sure to follow label instructions.

Melatonin, other than being our “sleeping hormone”, also has powerful antioxidant properties. Animals subjected to whole-body irradiation and given melatonin exhibited increased survival and the protection against radiation-induced oxidative damage was apparent throughout the body. More importantly, melatonin administered orally results in higher circulating levels and more rapidly increasing tissue concentrations. As soon as an exposure occurs, depending on the wind direction after radiation explosion, people living at a distance could protect themselves by oral administration of melatonin, which can be ingested repeatedly as required.

Curcumin is a naturally occurring compound contained in the spice turmeric. Curcumin has been found to have antioxidant, anti-inflammatory and anti-tumor activity in a variety of animal models of human diseases including radiation-induced pulmonary diseases.

Diet

There are several simple cooking techniques that decrease radionuclides: boil foods several times and discard the water, wash food thoroughly, soak some foods and discard the water,

avoid the peels of fruits and vegetables, salt and pickle some foods but throw away the pickling juice! Avoid eating strong broths, use butter, etc.

Chronic ailments often involves an imbalanced immune/defense system in which food sensitivities are involved even if they are not the cause of the problem, leading in turn to chronic inflammation – which translates into disease. This is why it is important to undergo an [elimination diet](#) in order to balance the body's immune system. Some of our immune cells take 6 months to regenerate, so it can take that much time in order to see results if you are very sick. But often you can see positive results in the first two weeks on an appropriate diet, even when you can't afford any other detox therapies. You can find the diet and how to transition to it [here](#).

Everyone is different and it is only by testing foods that we can discern our individual problematic foods. Having said that, **no one should be eating cereals or dairy products or high processed foods because the human system is simply not constructed to digest them properly.** What we eat is crucial in recovering our health and **it is a great healing medicine when done correctly.**

Garlic and onions, being sulfur containing foods, help bind and deactivate both the radioactive isotopes and toxic metals such as cadmium, lead and mercury. The sulfur will help the kidneys and liver detoxify the body.

The most direct way of decreasing radionuclide intake is to avoid foods that are potentially heavily contaminated and to consume foodstuffs with lower levels. However, this is not easy to do because the average level of radionuclide bio-accumulation differs in each region owing to differences in soils, agricultural techniques, etc.

The Chernobyl experience tells us that soaking in water, boiling, salting and pickling foods such as vegetables can decrease the amount of radionuclides in some foods several-fold. **Milk always contains high levels of radiation; processed products that reduce contamination levels, such as butter and ghee butter, are safer.**

Radionuclide concentrations in the visceral organs of animals are usually significantly higher than in muscle tissue. Among visceral organs the order of decreasing levels of Cs-137 is: lung > kidney > liver > fat.

The Chernobyl experience showed that in contaminated territories the same species of fish taken from rivers and streams have significantly lower radionuclide levels than those from lakes and ponds. Plant feeding fish had three to four times lower radionuclide levels than predatory species (catfish, pike, etc.). Fishes at lower levels of the ocean (crucian, tench, etc.) had several times more contamination than fish which live in the top water layers (small fry, chub, etc.).

Living Clay for Radiation Contamination

Protection from Radiation Have you ever walked into your local Dairy Queen and ordered a radioactive banana split? Or, possibly more likely, have you ever booked an airline flight and asked for your personal 2 rems dose of radiation? Right now, everyone on earth is bathed in a soup of radioactive energy. There has never before been a time when it was more important to cleanse our bodies of ever present radiation. Alpha particles, beta particles, gamma rays, muons, neutrinos -- the list is long and puzzling, and most of it has nothing to do with human activities.

No matter what we do, no matter how health conscious we've become, no matter what precautions are taken, our bodies are radiated daily. It is crucially important to remove this radiation and the resultant damage from our bodies every day. There is nothing better for this purpose than using a quality living clay on a daily basis.

So, just what is it you need to protect yourself from?

The world is waiting now to see what happens to the nuclear plants in Japan that were damaged during the recent massive earthquake that devastated that country. Nuclear power plants are now a way of life, so in addition to the "ordinary" radiation we receive by virtue of living on the earth, there is the ever present danger of accidents happening in these plants, along with the constant possibility of nuclear war and the use of nuclear weaponry. In the past 30 years we have had 3 major radioactive incidents -- Chernobyl, Three Mile Island and continuing releases in the Marshall Islands.

The Marshall Islands in the Pacific Ocean have been repeatedly "dusted" with calcium Bentonite clay, but the level of radiation continually seeping from below ground has yet to be completely and permanently contained. Due to nuclear weapons testing in and near them from 1956 to 1948, the Marshall Islands received the equivalent of 80 atomic bombs the size of the one dropped on Hiroshima and is regarded as the most contaminated place in the world.

The "incident" at Three Mile Island Nuclear Generating Station in 1979 was a wake-up call for most adults in the US. Simply put, a nuclear reactor near Harrisburg, PA, overheated, causing a core reactor to literally melt down. Radioactive gasses and mist were released into the air, and, needless to say, panic ensued. At Three Mile Island, workers today coat their arms and hands with Bentonite clay before suiting up.

In 1986, at the Chernobyl Nuclear Power Plant in the Ukrainian SSR, now Ukraine, an accident occurred while crews were running tests on the equipment. It is considered the worst nuclear power plant accident in history and resulted in highly dangerous levels of radioactivity being released over a widespread area. Most of the clean-up at Chernobyl was accomplished with Bentonite clay.

So, it would seem that the powers-that-be would want everyone to have their own supply of calcium Bentonite clay since that's what they use for their own messes -- not so. Either they have not connected the dots or they are stockpiling the clay for their own mistakes.

Radiation 101

It's important to know the truth about radiation so that correct decisions can be made. It's equally important to know what beliefs are realistic and which are not.

Radiation is energy in the form of electromagnetic waves, sometimes referred to generically as radio waves. Some radiation is quite harmless and passes through our bodies on a 24 hour a day basis -- such as radio and TV wave frequencies. Higher spectrum, faster moving wave frequencies, such as x-rays or radioactive metals like plutonium or uranium, can cause harm at a cellular level.

Then there is Ionizing Radiation. Ionization is the ejection of one or more electrons from an atom or molecule to produce a fragment with a new positive charge (positive ion.) The classification of radiation as "ionizing" is essentially a statement that it has enough quantum energy to eject an electron. This is a crucial distinction, since "ionizing radiation" can produce a number of physiological effects, such as those associated with risk of mutation or cancer, which non-ionizing radiation cannot directly produce at any intensity.

The unit of measurement used to measure radiation dosage is the rem, which stands for roentgen equivalent in man. It represents the amount of radiation needed to produce a particular amount of damage to living tissue. The total dose of rems determines how much harm a person suffers. At Hiroshima and Nagasaki, people received a dose of rems at the instant of the explosions, then more from the surroundings and, in limited areas, from fallout. Fallout is composed of radioactive particles that are carried into the upper atmosphere by a nuclear explosion or meltdown and that eventually fall back to the earth's surface.

Although a dose of just 25 rems causes some detectable changes in blood, doses to near 100 rems usually have no immediate harmful effects. Doses above 100 rems cause the first signs of radiation sickness including:

- Nausea

- Vomiting
- Headache
- Some loss of white blood cells

Doses of 300 rems or more cause temporary hair loss, but also more significant internal harm, including damage to nerve cells and the cells that line the digestive tract. Severe loss of white blood cells, which are the body's main defense against infection, makes radiation victims highly vulnerable to disease. Radiation also reduces production of blood platelets, which aid blood clotting, so victims of radiation sickness are also vulnerable to hemorrhaging.

Half of all people exposed to 450 rems die, and doses of 800 rems or more are always fatal. Besides the symptoms mentioned above, these people also suffer from fever and diarrhea. As of yet, there is no effective treatment for radiation exposures over 800 rems and death occurs in 1-4 days.

Uranium 235 Isotope (commonly referred to as U235) is a highly charged, positive ion metal found naturally on our planet. Natural uranium mined from the ground is 0.7% pure radiation. Weapons grade U235 has been enriched to 90%+ pure positive ionic radiation. That's one purpose of nuclear reactors -- enrichment. Weapons grade U235 is used in nuclear warheads. A second type of U235 is known as "waste;" U235 is the garbage left over from the enrichment process. Nuclear waste is commonly 3-5% pure radiation. Some nuclear medical wastes fall into this category as well. A weapons grade U235 warhead containing 90%+ enriched radiation will deliver doses of 1,000+ rems of energy over a several mile radius -- this will kill all exposed living things.

In its report titled Department of Homeland Security Report on Radiological Dispersal Device (RDD) Preparedness: Medical Preparedness and First Responders Sub-Group, the US government states that once first responders reach the site it will take 2-24 hours to test for presence of all 6 sub-group types of typical radioactive materials. All you need to know is that a 10-minute delay is much too long.

There are 3 types of appropriate responses to such a blast. The first would be for persons in the fallout area. The second would be for those at, or very near, the blast site who have direct contamination. The third category would be those outside the potential fallout area and away from any contamination.

Steps to Take if You're in a Fallout Zone

For those in the first category (within the potential fallout area), as might be possible with the March, 2011, catastrophe in Japan, take the following steps:

1. If outdoors, come inside immediately.
2. When in your home or apartment, close all windows and doors quickly.
3. Turn off any outside air source. You may leave on air conditioning or heat if it can be set to utilize re-circulated air from inside the home.

(Note: The purpose of steps 1 - 3 is to effectively close your home to possible contamination from the air outside. It could be only seconds before the blast contamination is at your doorstep.)

4. Go to an area of your home that has been set aside for such an emergency and strip off all of your clothing. Secure your clothes and shoes in a plastic bag and put them outside until you can wash them with clay.

5. Get in the shower and dip your hands into prepared hydrated calcium Bentonite clay. Quickly apply the clay over every inch of your body (with the exception of in your eyes). Cover your hair and all nooks and crannies. Scrub your body thoroughly with the clay. Leave it on for 10 minutes. Next, wash off, while continuing to scrub.

6. After drying off, apply another thin film coating of clay and stand with your arms away from your sides and feet slightly apart. In 5-15 minutes the clay will dry on your body.

7. After the clay has dried, put on a disposable pull-on garment, a surgical-type face mask, and disposable shoe covers on your bare feet.

8. Using a prepared liquid calcium Bentonite clay and a jar of potassium iodine (KI) tablets, go into the kitchen and set them on the counter by the sink. Drink 4 ounces of the liquid calcium Bentonite clay and take 2 potassium iodide (KI) tablets or as directed on the label. Periodically every 2-3 hours drink another 2 ounces of the liquid clay.

9. If service is available, stay tuned to your TV or radio to stay informed.

Note: Get as comfortable as possible because this will be your repetitive treatment and mode of dress for several days to come. You will sleep well knowing you are being protected from radiation.

10. Take a clay bath daily using 1-2 cups of dry clay until danger has passed. You can also give your pets a clay bath.

11. Wash your clothes by adding ¼ cup liquid clay per load.

12. When it is safe to go outside, get a clean new garden sprayer and add ½ cup of liquid clay to a gallon of water and spray your lawns and gardens.

13. Rinse fresh vegetables in clay water.

For those fortunate enough to not have been in a fallout area, please remain out of the areas affected with radioactive fallout. Drink 2 ounces of clay twice daily, take 1 Potassium Iodide tablet every morning and take a weekly clay bath. These are precautionary maintenance doses that are healthy for all of us. Simply stay away from contaminated areas until the cleanup has been certified.

(Along with disposable garments, surgical masks, and shoe covers, it is suggested to keep calcium Bentonite clay and potassium iodide tablets on hand as a preparedness precaution for radiation emergencies.)

These are relatively easy steps that can be taken for less severe exposure and the materials necessary are relatively inexpensive. It is important to take these steps immediately.

The Magic of Calcium Bentonite Clay

As you learned earlier, radioactive material is of a positive-charged ion. Calcium Bentonite clay is a negative-charged ion. Simply put, calcium Bentonite clay adsorbs and absorbs positive-charged ions, and you wash them off or pass them through your body. Unlike other clays, only Smectites (Bentonites) can adsorb and adsorb. It is characterized by its expandable properties. Radiation is a real health problem. Calcium Bentonite clay is the real solution. Living Clay, Nature's Own Miracle Cure by Perry A~ is the definitive guide for using and understanding the multiple benefits of calcium Bentonite clay. This natural mineral will do more than any other substance (natural or pharmaceutical) to remove radioactive isotopes from our bodies and to assist in returning to a state of good health. However, all clays are not alike. It is important to know your clays and to find a pure clay.. Go to www.AboutClay.com to read the article Criteria for Selecting a Quality Healing Clay. Protect your family and yourself from inevitable exposure to radiation by learning about using calcium Bentonite clay.

The information for this article was researched and compiled from a variety of sources by Perry A~, author of Living Clay: Nature's Own Miracle. Perry is also our supplier of Living Clay. She has been an ongoing student in the study and research of Bentonite Clays since the early 1990s. It was then that she was first introduced to a green healing calcium Bentonite clay that captured her fascination because of the amazing healing potential of dirt. She has been an advocate for Bentonite clays ever since. She is available for radio interviews and for questions about clay. She can be reached at 1-866-262-5611.

Danger to the Great Outdoors from Radioactive Fallout

Animals and plants are just as susceptible as humans. They can both become carriers of radiation as noted with the situation after Chernobyl when the cows ate the contaminated grasses and feed that was exposed to the radioactive fallout and carried it through their milk to

children and years later all these children from that era and location started coming down with thyroid cancer.

Being Prepared

What can we do to protect our outdoors, pets, livestock, gardens, crops and lawns?

It is a known fact that calcium Bentonite clay, a living clay, does and will absorb and adsorb nuclear radiation as these clays carry a strong negative electromagnetic ionic charge and nuclear radiation has a positive ionic charge. Simply put, calcium Bentonite clay adsorbs and absorbs, capturing positive-charged ions, and you wash them off or pass them through your body. Unlike other clays, only Smectites (Bentonites) can absorb and adsorb and are characterized by its expandable properties.

If possible, put your livestock in a barn or under a shed. As soon as it is possible to be outside, gather your livestock and spray them by adding 1 cup of liquid clay to a gallon of water in a clean, chemical-free sprayer. Put clay in their water supply at the same ratio. Add hydrated clay to their feed. Stir a generous ½ cup into the feed for large animals and less for the smaller ones. Check with your vet to get potassium iodide in the correct amount for the size of your animal. Spray your pastures, lawns and gardens with ½ cup of liquid clay per gallon of water. Be sure to use a clean sprayer free of chemical residues. Take these actions until radioactive readings are in the safe levels.

If possible take small pets inside and bathe them in clay water. Add 1 tablespoon of hydrated clay to their food. Pour liquid clay into the water to make a cloudy solution. You will have to stock up on kitty litter until it is safe to turn them outside on a well-sprayed lawn.

For a long time to come rinse fresh vegetables and fruits in a pan of water with enough liquid clay to make a slightly cloudy solution. Rinse for five minutes and allow to dry. This should be a regular process. We don't always know where our vegetables come from and if they have been treated with pesticides.

Keep taking liquid clay internally. It is a safe daily preventative that will keep you healthy and out of the doctor's office. -Perry A~

Prussian blue

Facts About Prussian blue

Prussian blue can remove certain radioactive materials from people's bodies, but must be taken under the guidance of a doctor.

People may become internally [contaminated](#) (inside their bodies) with radioactive materials by accidentally ingesting (eating or drinking) or inhaling (breathing) them, or through direct contact (open wounds). The sooner these materials are removed from the body, the fewer and less severe the health effects of the contamination will be. Prussian blue is a substance that can help remove certain radioactive materials from people's bodies. However, small amounts of contamination may not require treatment. Doctors can prescribe Prussian blue if they determine that a person who is internally contaminated would benefit from treatment.

What Prussian blue is

Prussian blue was first produced as a blue dye in 1704 and has been used by artists and manufacturers ever since. It got its name from its use as a dye for Prussian military uniforms.

Prussian blue dye and paint are still available today from art supply stores.

People **SHOULD NOT** take Prussian blue artist's dye in an attempt to treat themselves. This type of Prussian blue is not designed to treat radioactive contamination and is not made for that purpose. People who are concerned about the possibility of being contaminated with radioactive materials should go to their doctors for advice and treatment.

Use of Prussian blue to treat radioactive contamination

Since the 1960s, Prussian blue has been used to treat people who have been internally contaminated with radioactive [cesium](#) (mainly Cs-137) and nonradioactive thallium (once an ingredient in rat poisons). Doctors can prescribe Prussian blue at any point after they have determined that a person who is internally contaminated would benefit from treatment. Prussian blue will help speed up the removal of cesium and thallium from the body.

How Prussian blue works

Prussian blue traps radioactive cesium and thallium (mainly Tl-201) in the intestines and keeps them from being re-absorbed by the body. The radioactive materials then move through the intestines and are excreted (passed) in bowel movements. Prussian blue reduces the [biological half-life](#)¹ of cesium from about 110 days to about 30 days. Prussian blue reduces the biological half-life of thallium from about 8 days to about 3 days. Because Prussian blue reduces the time that radioactive cesium and thallium stay in the body, it helps limit the amount of time the body is exposed to radiation.

Who can take Prussian blue

The drug is safe for most adults, including pregnant women, and children (2 –12 years). Dosing for infants (ages 0 –2 years) has not been determined yet. Women who are breast feeding their babies should stop breast feeding if they think they are contaminated with radioactive materials and consult with their doctors. People who have had constipation, blockages in the intestines, or certain stomach problems should be sure to tell their doctors before taking Prussian blue. Before taking Prussian blue, people also should be sure to tell their doctors about any other medicine they are taking.

How Prussian blue is given

Prussian blue is given in 500-milligram capsules that can be swallowed whole. People who cannot swallow pills can take Prussian blue by breaking the capsules and mixing the contents in food or liquid. Breaking open the capsules will cause people's mouths and teeth to be blue during the time of treatment.

The dose of Prussian blue depends on the person's age and the amount of contamination in the body. Prussian blue usually is given 3 times a day for a minimum of 30 days, depending on the extent of the contamination.

Side effects of Prussian blue

The most common side effects of Prussian blue are upset stomach and constipation. These side effects can easily be treated with other medications. People may have blue feces (stool) during the time that they are taking Prussian blue.

Where you can get Prussian blue

Prussian blue is available only by prescription. The CDC has included Prussian blue in the [Strategic National Stockpile \(SNS\)](#), a special collection of drugs and medical supplies that CDC keeps to treat people in an emergency.

Where you can get more information

More detailed information on Prussian blue can be found at the [U.S. Food and Drug Administration Web site](#).

You may also call the CDC Public Response line at 1-800-311-3435 or visit <http://www.cdc.gov/netinfo.htm> to request more information.

¹**Biological half-life** is the time that it takes a substance in the body to be reduced by ½. <http://www.bt.cdc.gov/radiation/prussianblue.asp>
