Subject: Microchip

Hi friends, **A warning to those who may go into hospital for minor procedures. One of my work mates recently went in to hospital to get a benign lump out of her breast. When she was discharged from hospital the doctor informed her that he put a chip in. My chin nearly hit the floor with shock. I suggested that she go back to the doctor and demand it to be taken out at their cost as it should never have been put in without her permission. So be careful**

when you go into hospital. You may have to tell them...no chip! Otherwise they may just put one in.

Blessings, Julie

Subject: [RFID chips implanted without knowledge](#)

You see this? What truth is there to this? More importantly, what can you do to stop them?

Published on Nov 9, 2012

A must see video/radio interview by ICAACT leaders Lars Drudgaard and Jesse Beltran, HD-version. Do not hesitate to share, like and distribute this video to everyone.

Implants do not only have tracking capabilities, but they also have the ability to affect, monitor and change the carrier's brain functions and biological functions, to a degree that it can only be compared to torture. The torture can lead to death or suicide.

Lars Drudgaard and Jesse Beltran are interviewed by a Dutch radio host in Brussels October 5. They talk about the work of ICAACT, which involves finding factual evidence of implants in the victims' bodies. An important part of this is to scan the victims for Radio Frequency emissions from their bodies. Another is to be of help to victims when they interact with doctors or authorities, who are prone to claim (without doing any investigation) that the victim suffers from a psychological disorder. ICAACT helps victims to prove these professionals wrong, & also to help them deal with this "new type" of problem in today's technologically advanced society. Traditional treatments and diagnosis might be obsolete in some cases.

Lars Drudgaard talks about the development of these chips and their use on prisoners, a little bit about old CIA experimentation documents.

Jesse Beltran talks about the very specific places on the human body where RF is emitted, suggesting that the implantation of many individuals isn't random.

Both Beltran and Drudgaard speak about how the implants work, using changing magnetic fields that power them up, and also a bit about the different types of implants that now exist and that are constantly becoming smaller and smaller, more difficult to find. Another subject is how these implants can be easily introduced in the human body and the fact that some people only emit a radio frequency from a specific spot on their bodies, where they either had an operation done or the flu vaccine.

[Andreessen: In 20 years, every physical item will have chip implanted...](#)

23 Dec 2015

The hype around the Internet of Things has been rising steadily over the past five years. The era of sensors has only just dawned, according to renowned technology investor and internet pioneer Marc Andreessen. In 10 years, he predicts mobile phones themselves could disappear.

<<Andreessen sits on the board of Facebook Photo: REUTERS

"The idea that we have a single piece of glowing display is too limiting. By then, every table, every wall, every surface will have a screen or can project," he told the Telegraph. "Hypothetically you walk up to a wall, sit at a table and [talk to] an earpiece or eyeglasses to make a call. The term is ambient or ubiquitous computing."

The end state is obvious - every light, every doorknob will be connected to the internet. Marc Andreessen

Trevor: Yes I just saw this at <http://www.dr-johnson.com/> it probably has something to do with this report a listener forwarded me today:

[The HTTP 451 Error Code for Censorship Is Now an Internet Standard](#)

December 21, 2015 // 09:40 AM EST

The 451 HTTP status code is now official in the eyes of the Internet Engineering Task Force (IETF), the independent organization responsible for many of the internet's operating standards. Now, when an internet user hits a web page that has been blocked for legal reasons (read: censorship), they may be presented with a 451 error instead of the more generic 403 "forbidden" error.

<http://motherboard.vice.com/read/the-http-451-error-code-for-censorship-is-now-an-internet-standard> censorship will become the norm from now on.

**From: Susan**

**Sent: Wednesday, December 09, 2015 11:11 AM**

**Subject: Cyruta plus**

**Dear Dr. Johnson: Had a question about cyruta plus, but first I wanted to thank you for your help over the year. My husband's surgery went very well and his recent check up shows no signs of any cancer. He did as you said and did not take the anti biotic but the 5000pmm silver in case of any infection. So far so good...praise God!**

**I purchased cyruta plus from you for gum issues a while ago and came across a presentation from Dr. Tent speaking on this product for heart issues. Wanted to check with you on that. I occasionally have chest pain and inflammation that I can't seem to get under control for a long period of time. I take natto-serra for the back, neck and joint pain. I rub magnesium oil on my chest whenever I get pain.**

I'm thinking the cyruta plus may get to the root of the problem. If so do you still sell it? or is there something better suited for my issues?  
I can't thank you enough for all your help. I have been able to help so many others because of you freely giving out your valuable knowledge. God Bless you!

-----

**Dr. Johnson's Reply:**

**Susan:** Well actually yes, I sell this product but are you sure he was not talking about "Cyruta®" and not "Cyruta® Plus"? As Cyruta is specifically listed for arteriosclerosis, high blood pressure and high cholesterol, whereas Cyruta Plus is geared for other conditions like receding or bleeding gums, strengthening the arteries and veins, migraines & fatigue. I normally don't carry the Cyruta (but it is an excellent product), as if plaquing/arteriosclerosis is the reasons for someone's chest pain, then I typically highly advise the oral chelation (EDTA) as it seems to work quicker than any other supplement out there if you take it like I advise (See the attachment). I can tell you in the last few years I occasionally get left sided chest pain and if I take just one dose of the EDTA under my tongue with 3-5 drops of DMSO and hold it under my tongue for 5-10 minutes the chest pain is gone within an hour or two. I also use organic peppermint oil with this to kill the taste of the EDTA & DMSO The natto-serra product you're taking is excellent to keep the blood thin but I have found the EDTA is the best to deplaque the arteries, but it sounds like the Cyruta does that as well with other benefits.

I sell everything but the EDTA, as I cannot touch the prices listed at the link in the attachment to this email.

God bless!

Dr. J.

Subject: [Contending for Truth: ] GM mosquitoes spreading birth defect in Brazil

Hello dr. Johnson, Maybe the mainstream media in the US is not talking about it, but the GM mosquitoes created by Bill Gates and released here in Brazil last year is proving to be a disgrace: before these GM mosquitoes were released, we never had a single case of Zika virus. A year later, now the country is facing a severe epidemic of microcephaly, a birth defect where the baby's brain does not develop. The OMS is even asking Brazilian women to not get pregnant as the risk is very high.

And guess what! Bill Gates company is planning to release the very same GM mosquito in other countries, including the US! The situation reminds me of that Scripture that says "Woe to pregnant women and nursing mothers in those days, for there will be great distress in the land."

<http://www.theguardian.com/global-development/2015/dec/04/brazil-zika-virus-pregnancy-microcephaly-mosquito-rare-birth-defect>

In the 1980's: Two studies (1987 & 1989) found 1 in 2500-3000 U.S. children had autism<sup>2,3</sup> **The CDC just announced: 1 in 45 Children Are Diagnosed With Autism in 2014** Thank you Vaccinations!!!!

---

**NATIONAL CANCER INSTITUTE RESEARCH SCIENTIST WHISTLE BLOWER ON THE CONTAMINATION OF VACCINES** Dr. Mikovits, biochemist and former research scientist for the National Cancer Institute spills the beans, gets fired, harassed yet hold all the files on the raw data to prove that the vaccines provided and still provide the vector technology **that has single handedly contaminated the population with retroviruses associated with the alteration of DNA in parents and children resulting in autism, neurological damage, MS, CFS, Cancer, Diabetes and on and on...**

---

**Vaccines: an ideal covert op to genetically re-engineer humans - Why is the government so maniacal about injecting vaccines?**

July 11, 2015 By [Jon Rappoport](#) I want to extend [the remarks I made about vaccines recently](#).

The reference is the *New York Times*, 3/15/15, "[Protection Without a Vaccine.](#)" It describes the frontier of research. **Here are key quotes that illustrate the use of synthetic genes to "protect against disease," while changing the genetic makeup of humans. This is not science fiction:**

**"By delivering synthetic genes into the muscles of the [experimental] monkeys, the scientists are essentially re-engineering the animals to resist disease."**

**"The sky's the limit," said Michael Farzan, an immunologist at Scripps and lead author of the new study."**

**"The first human trial based on this strategy — called immunoprophylaxis by gene transfer, or I.G.T. — is underway, and several new ones are planned."**

**"I.G.T. is altogether different from traditional vaccination. It is instead a form of gene therapy. Scientists isolate the genes that produce powerful antibodies against certain diseases and then synthesize artificial versions. The genes are placed into viruses**

**and injected into human tissue, usually muscle."**

Here is the punchline: **"The viruses invade human cells with their DNA payloads, and the synthetic gene is incorporated into the recipient's own DNA. If all goes well, the new genes instruct the cells to begin manufacturing powerful antibodies."**

Read that again: **"the synthetic gene is incorporated into the recipient's own DNA." Alteration of the human genetic makeup. Not just a "visit." "Permanent residence."**

The *Times* article taps Dr. David Baltimore for an opinion:

“Still, Dr. Baltimore says that he envisions that some people might be leery of a vaccination strategy that means altering their own DNA, even if it prevents a potentially fatal disease.”

Yes, some people might be leery; **if they have two or**

**three working brain cells.**

**Let's take this further.** Under the cover of preventing disease vaccines are **ideal carriers for all sorts of genes** that would be permanently incorporated into the human structure.

**The enormous tonnage of propaganda about vaccines, and the resultant mandatory laws that enforce vaccination (without fear of liability), create a powerful channel along which re-engineering is eminently possible.**

**Synthetic genes injected into billions of humans would form a grand experiment to create an altered species.**

Some of this is happening already, but the *Times* article presents a much fuller picture of what is approaching on the immediate horizon. This grand experiment will be compartmentalized. For example, secretly, genes 1-6 will be injected into Group A in geo-location I. Genes 7-12 will be injected into Group B in location II. And so on.

**Vaccine recipients will be subjected to ongoing surveillance to gauge the results.**

On various pretexts, members of these groups will be brought into clinics for exams and tests, to discover markers that purportedly reveal their bodies' responses to the genetic alterations.

Are these people stronger or weaker? Do they exhibit signs of illness? Do they report behavioral changes? **Through surveillance and testing,** all sorts of information can be compiled.

**Of course, there is no informed consent. The human guinea pigs have no knowledge of what is being done to them.**

And what would be the objectives of this lunatic research program? They would vary.

**On a simplified level, there would be two. Create weaker and more docile and more obedient and more dependent humans. On the other side, create stronger and healthier and more intelligent and more talented humans. Obviously, the results of the latter experiments would be applied to the “chosen few.” And clearly, some of this research will be carried on inside the military. Secrecy is easier to maintain, and the aim to produce “better soldiers” is a long-standing goal of the Pentagon and its research arm, DARPA.**

A global vaccine experiment of the type I'm describing here has another bonus for the planners: **those people who fall ill or die can be written off as having suffered from various diseases and disorders which supposedly “have nothing to do with vaccines.” This is already SOP for the medical cartel.**

The numbers of casualties, in this grand experiment, would be of no concern to the Brave New World shapers. **As I've documented extensively, the US medical system is already killing 2.25 million people per decade (a conservative estimate), as a result of FDA-approved drugs and mistreatment in hospitals. Major media and government leaders, aware of this fact, have done nothing about it.**

Here is a quote from Princeton molecular biologist, Lee Silver, the author of [Remaking Eden](#). It gives you a window into how important geneticists are thinking about an engineered future:

**“The GenRich—who account for ten percent of the American population—[will] all carry synthetic genes. All aspects of the economy, the media, the entertainment industry, and the knowledge industry are controlled by members of the GenRich class...**

**“Naturals [unaltered humans] work as low-paid service providers or as laborers. [Eventually] the GenRich class and the Natural class will become entirely separate species with no ability to crossbreed, and with as much romantic interest in each other as a current human would have for a chimpanzee.**

Here is another gem, from [Gregory Stock](#), former director of the program in Medicine, Technology, and Society at the UCLA School of Medicine:

**“Even if half the world’s species were lost [during genetic experiments], enormous diversity would still remain. When those in the distant future look back on this period of history, they will likely see it not as the era when the natural environment was impoverished, but as the age when a plethora of new forms—some biological, some technological, some a combination of the two—burst onto the scene.”**

**With vaccines that permanently alter human genetic makeup on the horizon, and given the corporate and government-agency penchant for secrecy, we are already inhabiting the Brave New World. It’s not a distant prospect.**

**Every genetic innovation is aimed at bringing us closer to a Satanically entrapped world, and further away from freedom. Which is why the defense of freedom becomes ever more vital.**

**That struggle comes down to who controls the philosophy that influences the science. Questions like: Is each human merely and only a system waiting to be re-engineered, or is he something far more, inhabiting a physical form?**

**We already know what the vast majority of brain researchers and geneticists believe, as well as the governments and corporations and universities and foundations that make important decisions.**

**That leaves us to take up the argument and the resistance.**

**<http://www.activistpost.com/2015/07/vaccines-ideal-covert-op-to-genetically.html>**
