Urgent lawsuit filed against FDA to halt swine flu vaccines; claims FDA violated federal law

October 09, 2009 by: Mike Adams--(NaturalNews) Health freedom attorney Jim Turner is filing a lawsuit in

Washington D.C. mid-day Friday in an urgent effort to halt the distribution of the swine flu vaccine in America. On behalf of plaintiffs Dr. Gary Null and other licensed health care workers of New York State, the lawsuit charges that the FDA violated the law in its hasty approval of four swine flu vaccines by failing to scientifically determine neither the safety nor efficacy of the vaccines.

"The suit will seek an injunction against the FDA from approving the vaccine," attorney Jim Turner told NaturalNews on Thursday evening's **Natural News Talk Hour** show. "And the core of the argument is that they have not done the proper safety and efficacy tests on the vaccine to allow it to be release at this time."

The suit seeks to not only nullify the FDA's unlawful "approval" of the four H1N1 influenza vaccines, but to also ask the court to issue an injunction that would halt any mandatory vaccination requirements.

"The FDA is required by law to establish that a vaccine is safe and effective before it can be given to the public," said Turner. "We are arguing that they did not establish that the vaccine was effective, and did not establish that it was safe. They are trying to get it on the market by a waiver." The vaccine / adjuvant combination being referred to as the "swine flu vaccine" **has apparently never been safety tested or approved by the FDA.** In fact, in many cases the vaccine is being sent to clinics, pharmacies and other health establishments separately from the adjuvant chemical, leaving it up to each local vaccine retailer to properly mix the vaccine with the adjuvant, according to information provided by Turner. With hundreds of millions of Americans potentially being targeted with this vaccine, **the potential for improper mixing, improper dosages, and human error is alarming.**

If the charges described in the lawsuit are true, it means the FDA has blatantly abandoned medical science and violated its own regulations in approving not only these four vaccines, but the potentially deadly adjuvant chemicals as well. To date, **the FDA has produced absolutely no scientific evidence documenting safety tests for any of these swine flu vaccines.** There are no published studies, no records of any clinical trials, and no publicly-available paper trail demonstrating that any safety testing was done whatsoever. There is no researcher who has publicly put their name on the record declaring the vaccines to be safe, and no FDA official has ever stated that scientifically-valid safety testing has ever been conducted on the vaccine / adjuvant combinations now being distributed across America.

Normally, when a pharmaceutical achieves "FDA approved" status, there is a considerable paper trail of scientific scrutiny, peer review, clinical trials and other supporting evidence. To our knowledge, **no such documents exist for the swine flu vaccines.** The FDA's approval of these vaccines appears to be based entirely on a whim. Why, then, did the FDA apparently violate the law and push these vaccines into full public distribution without securing the safety testing required by law? Turner suspects a profit motive may be involved for one: "They're charging \$24.95 to get a vaccine. Multiplied by 100 million people, that's a lot of money. If you do the whole society, you're talking about several billion dollars."

Airports to Screen Passengers For H1N1 Symptoms

New government air travel guidelines are on their way. This flu season, airport staff across the nation won't just be screening for security threats. They'll also be looking out for health threats – people who **look like** they may have the H1N1 virus. The government says that people traveling internationally may be screened for the H1N1 virus as they leave or enter the U.S. A warning from [Flu.gov](http://www.flu.gov) tells travelers:

"Due to the outbreak of H1N1 (Swine) flu occurring in the United States and many other countries, airport staff in some countries may check the health of arriving passengers. Travelers from the United States arriving in other countries may be checked for fever and other symptoms of H1N1 (Swine) flu, and their travel may be delayed."

The site says that when you travel internationally from the United States, officials in other countries may ask you to:

- Pass through a scanning device that checks your temperature. (The device may look like an airport metal detector, a camera, or a handheld device.)
- Have your temperature taken with an oral or ear thermometer
- Fill out a sheet of questions about your health
- Review information about the symptoms of H1N1 (Swine) flu
- Give your address, phone number, and other contact information
- Be quarantined for a period of time if a passenger on your flight is found to have symptoms of H1N1 (Swine) flu
- Contact health authorities in the country you are visiting to let them know if you become ill

In addition, the site says "If you have a fever or respiratory symptoms or are suspected to have H1N1 (Swine) flu based on screening, you may be asked to:

- Be isolated from other people until you are well
- Have a medical examination
- Take a rapid flu test (which consists of a nasal swab sample)
- Be hospitalized and given medical treatment, if you test positive for H1N1 (Swine) flu

<http://wcbstv.com/health/h1n1.airport.screening.2.1235962.html>

Recipients Of The Swine Flu Vaccine Are Being Given CDC “Vaccination Record” Tracking Cards

Swine flu vaccinations began Monday in Indiana, Illinois and Tennessee, and recipients of the H1N1 vaccination are being given CDC "vaccination record" tracking cards to help keep a record of who has received the swine flu vaccine. This news is causing concern among privacy advocates who are worried that the U.S. government could use these CDC swine flu vaccination cards to track down those who have not had the vaccine if the government decides to make the swine flu vaccine mandatory.

News about these swine flu vaccination cards was dropped [in the middle of an AP story](#) about the beginning of swine flu vaccinations in the United States. When this was discovered, many concerned citizens started asking questions about these swine flu vaccination cards.

Fortunately there is a little bit more information out there about them. The following is from [the CDC's official website](#):

Recipients of the 2009 H1N1 vaccine will be provided with a hand-held card to serve as a record of vaccination and a source of information should a report to the Vaccine Adverse Event Reporting System (VAERS) be needed. Vaccine recipients will be encouraged to bring the hand-held card at their next visit to their primary care provider so that vaccination information can be transcribed into the patient's permanent medical record.

So there it is. Health authorities are going to have a record of exactly who has received the swine flu vaccine.

But another disturbing aspect of the paragraph above is that it sounds like they are expecting adverse side effects. <http://thebirdflupandemic.com/archives/recipients-of-the-swine-flu-vaccine-are-being-given-cdc-vaccination-record-tracking-cards>

YouTube - OFFICIAL: H1N1 CREATED IN THE USA BY SCIENTISTS

Truth is coming out. Thousands will die unnecessarily. As swine flu continues to spread across the world, so do theories about its origin. US investigative journalist Wayne Madsen says he's gathering more and more evidence that the H1N1 virus started out in a lab.

Subject: SHOW INFO, ETC.

Dear List,

...As you know, the Centers for Disease Creation is going to be unleashing the H1N1 pandemic this week via millions of LIVE viruses which will be sprayed up people's noses in the witch's brew named "Flumist". Once millions are infected and very sick, the shot version will be unleashed, targeting pregnant women and young children. **One of my clients, whose husband owns a medical supply company, called me today to tell me that he received a call from a government agent informing him that it is ILLEGAL for him to sell any syringes or needles to be used for the H1N1 shot, as the government has chosen one company to supply them (obviously because the needle will be preloaded with the RFID chip).** It is for this reason, as well as the toxic adjuvants (especially squalene) which will be in the WHO FLU shot, that you need to JUST SAY NO when instructed to roll up your sleeve. **There is NO way I know of to neutralize the chip, nor to detox an adjuvant made of a substance found naturally in your body...**which will cause an epidemic of autoimmune disease. **Pharmageddon** can only occur if you roll up your sleeve! In NYS, health care workers held a huge protest last week when they were told they would lose their jobs if they did not take the bioweapon vaccine. We must all do the same!

It is very disturbing that Dr Tenpenny is telling people to use lemons, Dr Blaylock telling people to use cold packs on the injection site if you are forced to take the vaccine. In other words, submit to the genocidal masters, let your family be injected with a bioweapon. The antidote to slavery and genocide is UNITY, people...grow a backbone, stand up in large numbers and just say no...or die.

Dr. Rebecca Carley

Girl suffers permanent brain damage after HPV vaccine

(NaturalNews) As the cervical cancer vaccine continues to maim or kill even more teenage girls across the UK, 18-year-old Stacey Jones is the latest victim to suffer severe harm. Previously in a state of apparent health, Stacey began to suffer severe seizures and brain inflammation within days after receiving the Cervarix vaccine injection. The swelling of her brain was so severe that it cause **permanent brain damage**, and today Stacey Jones is an "empty shell" of a girl.

Her mother isn't fooled by [Big Pharma](#). "I really feel she has been used as a guinea pig," she said in a DailyMail news article (source below). "I don't think there is enough evidence that the [vaccination](#)

programme is safe - this all happened days after Stacey was given the vaccine, and we don't have any other explanation for what triggered her brain injury."

Just last week, 14-year-old Natalie Morton died within hours after receiving the same vaccine injection. Medical authorities insisted Natalie suddenly died of a previously undiagnosed tumor in her chest, but [NaturalNews](#) was the first to suggest fraud in the pathology report, pointing out that Natalie's real cause of death had to be covered up to protect the lucrative vaccine industry.

Vaccines = the new [holocaust](#)

As the deaths mount, [vaccines](#) are becoming the new chemical holocaust of our time. Children and teens are lined up to be injected with chemicals made by some of the very same companies that once conducted [medical experiments](#) on Jewish concentration camp prisoners during the Nazi era (<http://www.naturalnews.com/019189.html>).

Did you know, for example, that one of the chemotherapy drugs still used in [cancer](#) centers today was originally developed under the chemical [weapons](#) program of Nazi Germany? (http://www.naturalnews.com/News_000...) http://www.naturalnews.com/027188_NaturalNews_cancer_cervical_cancer.html

Drug Expert: Cervical Cancer Vaccine More Deadly Than Cancer it Supposedly Prevents

Speaking exclusively to the Sunday Express, Dr Diane Harper, who was involved in the clinical trials of the controversial drug Cervarix, said the jab was being "over-marketed" and parents should be properly warned about the potential side effects. Authorities in the UK should be on the alert because its sister vaccine, Gardasil, used in America, has already been associated with 32 deaths, she said. Her comments follow the death of 14-year-old Natalie Morton, who collapsed an hour after receiving the jab at school last week

<http://www.infowars.com/drug-expert-cervical-cancer-vaccine-more-deadly-than-cancer-it-supposedly-prevents/>

A new study has shown that giving Hepatitis B vaccine to newborn baby boys more than triples their risk of developing an autism spectrum disorder

The study's authors used U.S. probability samples obtained from National Health Interview Survey (NHIS) 1997–2002 datasets.

The conclusion states that: "Findings suggest that U.S. male neonates vaccinated with hepatitis B vaccine had a 3-fold greater risk of ASD."

The new study used a different database than their earlier study, and they found same results, suggesting a validation of their findings.

Sources:

[Age of Autism September 17, 2009](#)

[Annals of Epidemiology September 2009: 19\(9\): 659](#)

[Routine use of the hepatitis B vaccine for all newborns began in 1992](#), despite the fact that there was absolutely NO logical argument for it. It should never have been included in the immunization schedule, and here's why.

Do Newborns Really NEED the Hepatitis B Vaccine?

Hepatitis B is about as difficult to catch as AIDS. Namely, you nearly always need to have blood or sexual contact of some sort.

That is why the main risk factors are IV drug abusers and those who engage in sex with multiple partners.

The Vaccine Adverse Event Reporting System (VAERS) was developed by the government to report vaccine reactions. Many experts believe that only 10 percent of the adverse reactions are reported though, as reporting is not mandated by law. (Some surveys puts this number closer to **ONE percent**.)

Even with only 10 percent of the problems being reported, there were nearly **25,000 VAERS hepatitis B reports** from July 1990 to October 31, 1998 (prior to adding the Hep B vaccine to the immunization schedule), **showing 439 deaths and 9,673 serious reactions involving emergency room visits, hospitalization, disablement, or death.**

Activist Groups that Fund Pharma Try to Regulate Silver as a Pesticide

October 07, 2009 by: Tony Isaacs--(NaturalNews) It was revealed that a handful of the activist agencies which were behind the petition to the EPA to regulate nano-silver as a pesticide received funding from pharmaceutical giant Merck, which annually has hundreds of billions of dollars in profits from patented antibiotics which colloidal silver poses a risk to. Now, further investigation has discovered that the initial revelations may just be the tip of the iceberg when it comes to Merck and other pharmaceutical companies funding of the groups who support [the EPA](#) petition.

The actual source of the funding that was first revealed in emails and colloidal silver blogsites was the John [Merck](#) Fund, which was set up in 1970 by Serena Merck, the widow of Merck Pharmaceuticals CEO George W. Merck. The recipients of funding who are signees on the petition to the [EPA](#) were identified as:

Center for Food Safety
\$1,305,000.00 (1999 - 2005)

Institute for Agriculture and Trade Policy
\$490,000.00 (1992 - 2003)

International Center for Technology Assessment
\$247,500.00 (1999)

Consumers Union of the United States
\$90,000.00 (2000 - 2001)

Greenpeace
\$80,000.00 (2000 - 2002)

Friends of the Earth
\$45,000.00 (1992 - 2000)

Subsequently, it was discovered that a second Merck foundation, the Merck Family Fund, gave a \$200,000 grant for 2006-2007 to another petitioner, [Silicon Valley](#) Toxics Coalition.

The Center for Food Safety (CFS), which along with its sister organization the International Center for Technology Assessment (ICTA) initiated the EPA petition and enlisted the other groups which signed off on the petition, received the second largest amount of funding of any group from the John Merck Fund. The largest recipient by far of Merck funding was the Tides Center/Tides Foundation, whose total funding was almost \$2.7 Million.

Thus far, the EPA has taken no action on the petition, though it is widely expected to make a ruling by early fall, and many expect that silver will indeed be regulated as a pesticide. Such an action would have the effect of banning virtually all the colloidal [silver products](#) currently used by millions of people to combat infections and pathogens of all kinds. In many instances, mainstream [medicine](#) has no answer for some of the deadliest of pathogens, such as MRSA.

Colloidal silver represents a huge threat to the billions of dollars in profits Big Pharma annually rakes in from less effective, less safe and far more expensive patented [antibiotic](#) drugs. Such an agenda becomes obvious when one looks at the list of products singled out for banning that was part of the petitions and finds the three largest producers of colloidal silver specifically listed among the products. Many more colloidal silver products were later added as an addendum.

As an example of the subterfuge, one of the environmental groups which signed the petition, Friends of the Earth, sent emails this past spring to concerned members who used colloidal silver to assure them that they had no desire or intention to regulate colloidal silver. Then in June they published a position paper which stated, "We believe that all over-the-counter colloidal silver products should be immediately withdrawn from the market and their sale should be banned (unless approved as a drug by the appropriate regulatory agency)."

Similarly, in March of this year, just before the EPA closed the door to public comments on the campaign to regulate silver as a "pesticide," the [environmentalists](#) published an article claiming that a "major new clinical study" had proven that silver harms human cells.

What the environmentalists failed to report in their article is enlightening. First of all, it turned out that the study they cited was hardly "major." Indeed, it was a very small study conducted by a virtually unknown research group in China.

It also turned out that the group conducting the study was in cahoots with two major [pharmaceutical companies](#) who are major producers of prescription antibiotic [drugs](#). And finally, the study itself merely demonstrated the well-known fact that silver kills e. coli [bacteria](#) by damaging its cellular structure and preventing it from replicating.

In other words, the study was on bacterial cells, not human cells.

The justification for considering silver to be a pesticide in the first place is because it kills bacteria, viruses and other single celled pathogens, which the environmental groups have defined as "pests". Using the same definition would apparently also make common bleach, rubbing and drinking alcohol, aerosol disinfectants, and antibiotic and antiviral drugs "[pesticides](#)" as well - but only silver has been singled out.

One wonders why environmental groups are seemingly in bed with Big Pharma to begin with on the issue of silver, which is a natural element that has been in our waters, soils and plants since mankind first put down footsteps in the sands of time. Where is the concern over all of the drugs that are polluting our [drinking water](#)? According to a recent investigative report from the [Associated Press](#), "U.S. manufacturers, including major drugmakers, have released at least 271 million pounds of pharmaceutical drugs into waterways that often provide drinking [water](#) for millions of Americans - contamination the federal government has consistently overlooked..."

According to the Associated Press report, "...trace amounts of a wide range of [pharmaceuticals](#) - including antibiotics, anti-convulsants, mood stabilizers and sex hormones - have been found in American drinking water supplies...pharmaceuticals have now been detected in the drinking water of at least 51 million Americans."

The figures reported may be merely the tip of the iceberg since, as the report itself states, "Most cities and water providers still do not test." The report also notes, "Some scientists say that wherever researchers look, they will find pharma-tainted water."

The AP report also noted that "Pharmaceutical makers typically are excused from having to submit an environmental review for new products, and the FDA has never rejected a drug application based on potential environmental impact."

Furthermore, according to the AP report, the Big Pharma companies do not even need to submit environmental reviews for their drugs, which are now contaminating the drinking water of tens of millions of American men, women and children.

But colloidal silver, which has never been demonstrated to contribute to environmental pollution, is being singled out by the environmental groups (backed by their Big Pharma paymasters) for extreme and completely unwarranted environmental regulations that will literally drive most if not all colloidal silver manufacturers and vendors completely out of business. And it's all being pulled off in the name of "protecting [the environment](#)."

In short, Big Pharma produces hundreds of billions of dollars a year worth of [prescription drugs](#) and millions of pounds of these drugs annually end up polluting our environment, yet the environmental groups remain silent with nary a single call to regulate Big Pharma's drugs as environmental pollutants. In other words, Big Pharma is polluting the environment with drugs, but, rather than opposing Big Pharma, the environmentalist groups are taking money from them and ruthlessly attacking the most popular [natural health](#) alternative to the prescription antibiotic drugs produced by Big Pharma.

2009 'Swine Flu' Pandemic Vaccines Rendered Obsolete By NASA Technology

911 [Technology: Biotechnology](#) June 13, 2009

A man has stepped forward with a \$1 million reward in gold to challenge vaccine supporters, CDC and the government to justify promotion of vaccines over natural immunization by Bionaid™ & ZeoHeal™.

For Immediate Release:

[Uniform Picoscalar Concentrated Oligodynamic Silver Hydrosol \(UPCOSH\)](#) is a new category surpassing older OSH technology. The historic breakthrough resulted in a new drug-less, covalent-bonded, non-photosensitive trioxysilver category of OSH utilizing [NASA technology](#) used on the International Space Station (ISS). In the article, "[Promising Cure for URTI Pandemics, Including H5N1 and SARS: Has the Final Solution to the Coming Plagues Been Discovered?](#)" doctors reveal that vaccines are rendered obsolete, and that OSH's also kill Methicillin-Resistant Staphylococcus Aureus (MRSA). Dr. Eric J. Rentz (2003) [published](#) a convincing retrospective, peer-reviewed treatise on a highly advanced, virotoxic oligodynamic silver hydrosol, making the case that it is the agent of choice to combat SARS and pandemics.

<http://www.pubmedcentral.nih.gov/articlerender.fcgi?artid...>

Note that two specific elements must be present for the allowance of personal liberties to be set aside for the safety of the general public regarding vaccinations:

1- There must be a substantiated emergency need for the vaccines, and they must be approved, cleared and properly labeled in accord with health regulations. (There is no evidence of a pandemic, and the current position of the FDA states that vaccines do not have to be approved, cleared and properly labeled in accord with health regulations.)

2- There must be no other viable alternatives to deal with a pandemic. (Silver Hydrosols have been proven to support the immune system as a natural immunization and advances in this technology has been advanced with a new category of Silver Hydrosols called Uniform Picoscalar Concentrated Oligodynamic Silver Hydrosol - UPCOSH.

<http://www.bionaid.com/bionproduct.htm>

Doctors Concerned FluMist Vaccine Could Spread Live H1N1 Virus

Paul Joseph Watson--Tuesday, October 6, 2009--With 60 per cent of the U.S. population at risk, is swine flu nasal spray a pandemic waiting to happen? Doctors and hospitals are expressing concern that the FluMist vaccine could endanger people because it contains live H1N1 virus, unlike the injectable shot that contains antibodies. With no less than 60 per cent of the U.S. population immunodeficient in one way or another, could FluMist be a pandemic waiting to happen? Hospitals in Colorado and elsewhere are shunning the FluMist H1N1 vaccine, a nasal spray that contains live swine flu virus, because of fears it could infect people with weakened immune systems and underlying health conditions. "Several metro area hospitals said they won't be taking the FluMist because they don't want to endanger patients," reports [TheDenverChannel.com](http://www.denverchannel.com).

<http://www.prisonplanet.com/doctors-concerned-flumist-vaccine-could-spread-live-h1n1-virus.html>

Military to get mandatory swine flu shots soon

September 29, 2009, MSNBC/Associated Press--U.S. military troops will begin getting required swine flu shots in the next week to 10 days, with active duty forces deploying to war zones and other critical areas going to the front of the vaccine line. Air Force Gen. Gene Renuart also [said] that as many as **400 troops are ready to go to five regional headquarters around the country to assist federal health and emergency management officials**. The Pentagon has bought 2.7 million vaccines, and 1.4 million of those will go to active duty military. National Guard troops on active duty are also required to receive the vaccine, as are civilian Defense Department employees who are in critical jobs. "Because I can compel people to get the shots, larger numbers will have the vaccine," said Renuart, commander of U.S. Northern Command. "They will, as a percentage of the population, be vaccinated more rapidly than many of us. So we may see some objective results, good or not, of the vaccinations." Shots will be doled out on a priority basis, with troops preparing to deploy first, followed by other active duty forces, particularly any who might be needed to quickly respond to a hurricane or other emergency. Inoculating the military is a key requirement of the Pentagon's emergency plan, as a **way to ensure that troops are available to protect the nation**. They also will be on tap to provide help to states if problems come up as the flu season continues. http://www.msnbc.msn.com/id/33079725/ns/health-swine_flu/

++Did you know former President Clinton quietly signed Executive Order 13139 on September 30th, 1999? This order requires military personnel to receive experimental vaccines not approved by the FDA and denies the soldiers the right to refuse or to even to be provided with informed consent of what there are receiving.

You really need to watch:

A Personal Vaccination Tragedy Publicized

"An **alarming number of U.S. troops** are having severe reactions to some of the vaccines they receive in preparation for going overseas." This was not from the internet originally, though the video can be seen on the internet now. It was presented by a Cincinnati Ohio Target 5 local TV presentation in early 2007.

The story featured a local area young man 20 years of age in the Marine Corps, Lance Corporal David Fey, who had a strange experience at his Marine Base in California in November of 2005. "They asked us our name. We stood on these yellow footprints, and they gave us this shot, and we got the rest of the day off," he recalled. "After that shot, I started swelling up. I gained 30 pounds of water. My eyes swelled up where I couldn't see . . ."

David Fey almost died from kidney failure and was transported to a hospital in his home county. He had to undergo dialysis three times a week while waiting for a kidney transplant. His pain was so bad that his mother confessed praying for him to be "taken away in the night" to spare him of his misery.

All the attempts to uncover what was in the shot have leaded nowhere. David Fey's mother was told the information was classified or confidential. The military records didn't even show that David had been given any vaccination. After 11 months, *flu shot was entered by hand* into David's military medical record.

A military medical officer, who had his name withheld and identity obscured in the TV report, asserted that there are thousands of similar cases, ranging from arthritic pains to death after vaccinations, and when they complain they are usually told it's "all in their heads". The medical officer went on to say, "When the issue, I believe, of the use of the vaccine comes out, I believe it will make the Walter Reed scandal pale in comparison." He also speculated on the possibility that experimental vaccinations were being administered to military personnel.

Medical Mafia Author Speaks on Hidden Agenda Behind Swine Flu Vaccinations

French-Canadian medical doctor and author of *The Medical Mafia*, Dr. Guylaine Lanctot (pronounced "Ghee-Lane Lank-Toe"), speaks candidly about what she believes to be the hidden agenda behind the government's Swine flu vaccination hysteria.

Dr. Lanctot was prosecuted by the Canadian Medical Board for her expulsion from that medical community for her stance against vaccinations. She has reemerged with a sincere and frightening message regarding vaccinations.

"Since this trial, these same physicians have continued their career in public health, and now hold honorable positions. They are the very ones who are pushing the public toward a new world-wide epidemic. This A(H1N1) pandemic is concocted and orchestrated by the WHO (World Health Organization), and serves the same military, political and industrial interests as those of 1976. Have these physicians lost their memory, or were they serving those interests right from the beginning?"

"I am emerging from a long silence on the subject of vaccination, because I feel that, this time, the stakes involved are huge. The consequences may spread much further than anticipated. Here are the most important ones:"

- * Compulsory inoculation of vaccines containing a deadly virus;
- * Massive and targeted reduction of the world population;
- * Through vaccines, possible introduction of tiny microchips for mind control;
- * Establishment of martial law and police state;
- * Activation of the concentration camps built to accommodate the rebellious;

- * Transfer of power from all nations to a single United Nations government;
- * Fulfillment of the New World Order.

<http://loveforlife.com.au/node/6689>

Former Lieutenant Colonel Sues Florida Over Forced Vaccination Policy

A former lieutenant colonel who almost died from taking a smallpox shot is suing the state of Florida over a law that allows the government to forcibly vaccinate the public in the event of a pandemic. Carmen Reynolds claims that the vaccinations she was forced to take during her 20-year military career destroyed her physique and also wrecked her internally, causing excruciating pain and permanently damaging her immune system.

The Florida law mandating forcible vaccinations in the event of a public health emergency makes no exceptions for religion objections or health conditions and allows for police force to be used to quarantine individuals who refuse to take the shot, or even forcibly inject them at gunpoint if necessary.

"I refuse to be killed by another vaccine," stated Reynolds, who is suing Florida's governor, attorney general and surgeon general over the law. "I served my country for 22 years not to be told that I am a criminal, a 2nd degree misdemeanor offender because I raised my hand and said this isn't right. I don't want toxins in my body because it jeopardizes my health," [Reynolds told ABC 3 News.](#)

Similar laws are on the books across America and could easily be enforced should the swine flu pandemic return in the form of a deadlier mutation, as officials have been saying is likely to happen. <http://www.infowars.com/former-lieutenant-colonel-sues-florida-over-forced-vaccination-policy/>

Does The Swine Flu Vaccine Contain Adjuvants That Are Also Used In Sterilization?

Squalene emulsified in Tween 80 is used in swine-flu vaccine as an adjuvant according to Novartis patent & **is also used as immunization-sterility vaccine for domestic animals according to Ohio State patent.** Novartis is the pharmaceutical company which is producing swine-flu vaccine for western countries.

SQUALENE EMULSIFIED IN TWEEN 80 SURFACTANT USED AS IMMUNIZATION –STERILITY VACCINE ON DOMESTIC ANIMALS:

Big Pharma Microchip to Force Drugging

Andrew Jack--The Financial Times--September 22, 2009--Patients who fail to pop pills on time could soon benefit from having a chip on their shoulder, under a ground-breaking electronic system being developed by Novartis, the Swiss pharmaceuticals group. **The company is testing technology that inserts a tiny microchip into each pill swallowed and sends a reminder to patients by text message if they fail to follow their doctors' prescriptions.**

The partnership with Proteus Biomedical, which originally developed the technology, is one of several alliances under development by Novartis as it and rival pharmaceuticals companies attempt to maintain high prices for innovative medicines by ensuring that they are taken as the doctor ordered. Pfizer's Health Solutions division has developed a **system to telephone patients to encourage them to take medicine.**

Joe Jimenez, head of pharmaceuticals at Novartis, said tests using the system – which broadcasts from the “chip in the pill” to a receiver on the shoulder – on 20 patients using Diovan, a drug to lower blood pressure, had boosted “compliance” with prescriptions from 30 per cent to 80 per cent after six months.

WHY YOU SHOULD AVOID TAKING VACCINES

By Dr. James Howenstine, MD. December 7, 2003--Dr. James R. Shannon, former director of the National institute of health declared, “the only safe vaccine is one that is never used.” Cowpox vaccine was believed able to immunize people against smallpox. At the time this vaccine was introduced, there was already a decline in the number of cases of smallpox. Japan introduced compulsory vaccination in 1872. In 1892 there were 165,774 cases of smallpox with 29,979 deaths despite the vaccination program. A stringent compulsory smallpox vaccine program, **which prosecuted those refusing the vaccine**, was instituted in England in 1867. Within 4 years 97.5 % of persons between 2 and 50 had been vaccinated. The following year England experienced the worst smallpox epidemic in its history with 44,840 deaths. Between 1871 and 1880 the incidence of smallpox escalated from 28 to 46 per 100,000. The smallpox vaccine does not work.

Much of the success attributed to vaccination programs is actually been due to improvement in public health related to water quality and sanitation, less crowded living conditions, better nutrition, and higher standards of living. Typically the incidence of a disease was clearly declining before the vaccine for that disease was introduced. In England the incidence of polio had decreased by 82 % before the polio vaccine was introduced in 1956.

In the early 1900s an astute Indiana physician, Dr. W.B. Clarke, stated “Cancer was practically unknown until compulsory vaccination with cowpox vaccine began to be introduced. I have had to deal with two hundred cases of cancer, and I never saw a case of cancer in an unvaccinated person.”

Dr. J. Comment: Currently I have a rare surplus of 5000ppm Invive Mild Silver Protein. While supplies last I will be offering this surplus **5000ppm silver at 95.00 per bottle for quantities from 1-5 bottles and 85.00 per bottle for quantities of 6 or more bottles**. This is a 5.00 savings per bottle at both quantity levels mentioned and for this special each order will only charged a **5.00 flat shipping fee** (Contintenal US orders only) on all orders (which would be anywhere from a 10.00 to 25.00 savings over factory shipping; as when you order off my website the order goes through the Invive factory). These are the lowest prices for Invive Silver you will be able to find. This special is not available off my website.

Invive Silver Payment options:

I can take a check or money order or I can take Paypal [Click Here](#)

You can send payment to:

Dr. Scott Johnson

++ Because Invive Silver is so stable it has a 15 year minimum shelf life. The company started in 1993 and they still have perfectly good bottles of silver from 1993. There is a 'Retest Date' on the bottle for the year 2014, but that is purely there for FDA purposes. There is no colloidal silver in any form that can even come close to their shelf life or potency; nor has there been one case of Argyria (turning gray) reported from taking Invive Silver.

Dr. Johnson's Comment: Invive Mild Silver Protein is made under Pharmaceutical GMP (Good Manufacturing Practices) with double check off lists. The silver that is used is the finest available and is the same silver used in the 1938 Edition, 12th Volume of the British Encyclopedia of Medical Practice: Royal College of Physicians and Surgeons. The Compounds used to make this silver are identical as the silver compounds used in burn wards across America. As a result they can achieve uniform particle size between (.005 and .015 microns) which is something most companies have a very hard time doing. Now this particle size is much smaller than a bacterium which are approximately .5 microns. Therefore Invive silver particles can go wherever the bacteria are "because" the Invive particles are 100 times "smaller" than a bacteria, as Invive's smallest particles start at 005.

Today's modern antibiotics kill over 100,000 Americans per year, and cause horrendous liver and kidney damage, failure, and death, whereas the pre-1938 Mild Silver Protein formulation that has never caused one death.
